# NOTICE OF WORKSHOP

## FOR DISCUSSION OF
## 2015 AIR TOXICS "HOT SPOTS" PROGRAM REPORT

The San Diego County Air Pollution Control District (District) will hold a public meeting to receive comments on the 2015 Air Toxics "Hot Spots" Program Report, which is scheduled as follows:

**DATE:** **Wednesday, October 12, 2016**

**TIME:** **1:30 p.m. – 3:30 p.m.**

**PLACE:** **San Diego Air Pollution Control District**
**Main Conference Room**
**10124 Old Grove Road**
**San Diego, CA 92131**

The District has prepared the 2015 report of the local program implementing the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588). The Air Toxics "Hot Spots" program requires facilities that emit toxic substances to provide local air pollution control districts with information that will allow an assessment of the air toxics problem, identification of air toxics emission sources, notification of the public exposed to significant health risk from toxics air emissions, and development of effective strategies to reduce potential risks to the public.

The report summarizes the "Hot Spots" program elements, the current status of the program in San Diego County, stationary and mobile emission estimates, emission reduction efforts and current status of public notifications and risk reduction plans. Stationary source emission estimates, by facility, are available on the District's website at http://bit.ly/2cakKCk.

The draft report is available on the District's website at http://www.sdapcd.org/content/sdc/apcd/en/Rule_Development/Workshops.html. If you have any questions or comments concerning the draft report, the Air Toxics "Hot Spots" program, or the upcoming workshop, please contact Archi dela Cruz at (858) 586-2732 or archi.delacruz@sdcounty.ca.gov. Comments regarding the report may be submitted at the workshop, or in writing no later than 5:00 p.m. on October 26, 2016. A summary of comments received will be prepared and provided to the Air Pollution Control Board as part of its consideration of the 2015 report at a public hearing.

JIM SWANEY, Chief, Engineering Division
Air Pollution Control District
