COMPLIANCE ADVISORY

Notice of Amendments to Rule 67.11
Wood Products Coating Operations

On June 27, 1995, the Air Pollution Control Board adopted amendments to Rule 67.11, an existing rule that regulates emissions of volatile organic compounds (VOCs) from wood products coating (painting) and cleanup operations. The amendments postpone the applicability of lower VOC limits for all coatings until July 1, 1997. In addition, the previous VOC limits for clear topcoats, sealers, and low-solids coatings were relaxed to allow the use of coatings that do not contain 1,1,1-trichloroethane, which is classified as a stratospheric ozone-depleting compound. Several minor changes were also made to clarify the rule.

The amended rule does the following:

Exemptions

Adds an exemption from the rule for coatings applied from non-refillable handheld aerosol spray containers.

Adds an exemption from the VOC limits for coatings applied to wooden musical instruments.

Adds exemptions from high transfer efficiency coating application equip ment requirements for air brushes whose coating capacity is two ounces or less and for coatings applied during touch-up operations.

Definitions

Adds, deletes or amends certain definitions for clarification.

VOC Limits

Provides separate VOC limits for 'new' and 'refinished' wood products coating operations.

Delays implementation of lower VOC limits until July 1, 1997.

Increases the VOC limits for clear topcoats, multi-colored coatings, sealers and low-solids coatings to 680, 685, 680 and 700 grams per liter, respectively.

Adds new specialty coating categories for fillers, inks and medium density fiberboard (MDF) coatings, with VOC limits of 500, 500 and 680 grams per liter, respectively.

Surface Preparation and Equipment Cleaning

Adds options for using high boiling point or low vapor pressure materials for surface preparation, stripping and equipment cleaning operations.

Adds additional approved methods for cleaning application equipment.

OVER

Printed on Recycled Paper

Recordkeeping Requirements	Clarifies existing requirements. Adds the option of keeping monthly rather than daily usage records for compliant materials if an existing permit condition does not specifically require daily usage records.
Test Methods	Updates and adds new test methods for determining compliance with the rule.

For more information, please call the District's Compliance Division at (619) 694-3340. A copy of Rule 67.11 and a list of wood coating manufacturers that distribute low-VOC coatings which can comply with the July 1, 1997 lower VOC limits is enclosed for permit holders. The District has compiled this information as a resource to aid you in complying with the future VOC limits of this rule. If you are not a permit holder and would like a copy of the amended rule, please call (619) 694-3307 to request a copy.

COATING FORMULATORS CONTACT LIST

The following list has been compiled by the District to provide contact information of companies which have low-VOC wood coatings available. The District hopes that this information will provide a resource for locating coatings which can be used in your operation. This list is in no way an endorsement of any companies which are listed.

Roger	Benvenuti	Akzo-Nobel	434 Meats, Orange, CA 92665	(714) 637-1817
William	Maligie	Alternative Materials Technology	1266 Humbolt, Chino, CA 95928	(916) 894-3585
Abdullah	Melik	Aquaday International, Inc.	1313 S. Evergreen, Arlington Heights, IL 60005	(708) 956-8511
Don	Bangle	Aztec Chemical, Inc.	10770 Lower Azusa Road., El Monte, CA 91731	(818) 448-9262
