---

Dear Mr. Koutoufidas, Thank you for the opportunity to comment on the JVR Energy Park Draft EIR. Please consider the following comments from SANDAG Mobility and Innovation Team below:

SANDAG appreciates the inclusion of a Transportation Demand Management (TDM) program to encourage construction workers to carpool or vanpool in order to reduce construction related to the construction of the JVR Energy Park. Please continue to work with the SANDAG iCommute program to promote pooled ride options, even beyond the construction phase to assist employees at the JVR Energy Park in choosing. More information on available regional TDM programs including the Regional Vanpool Program and carpool resources can be accessed through www.iCommuteSD.com.

Please let me tracy.ferchaw@sandag.org or Seth Litchney (seth.litchney@sandag.org) know if you have any questions.

Thank you,

Tracy Ferchaw, MBA
Associate Business Analyst
