HANDHELD FINGERPRINT READERS
WITH MOBILE ID LICENSES
(Valley Center, Alpine, Rural)

Description of Project

This project will fund the acquisition cost for six (6), Handheld Fingerprint Readers with Mobile ID Licenses, six (6) Samsung Galaxy III Mobile Devices, and six (6), two-year service contracts (data package only).

Indian Gaming casinos have become inviting targets for criminals conducting financial crimes, illegal narcotics trafficking, theft, and other criminal acts. Casino parking areas, especially large parking structures or venues, are prime target areas to hide in, or steal vehicles from.

Often times, criminals are contacted due to their actions being suspicious in nature. It is not uncommon for criminals to provide false identifying information when contacted by law enforcement. If a person knows they have a warrant, are on parole or probation or wanted for some other crime, they may be able to avoid apprehension if law enforcement cannot determine their true identity.

The Sheriff's Department's Valley Center and Alpine Sheriff's Substation and the Rural Sheriff's Command propose to deploy six (6), handheld fingerprint readers in and around the areas that include the Valley View, Harrah's Rincon, Pala and Pauma Casinos, Viejas, Golden Acorn as well as the surrounding communities.

These readers require a smart phone or tablet in order to function and have the ability to scan a fingerprint in the field and provide a name if the person in question is found to be in the fingerprint database. If the person in question is identified through the use of the reader, the

deputies will respond accordingly, by making an immediate arrest or, where appropriate, notifying Tribal Police who may determine that they do not want the person on their property.

The benefits of using Handheld Fingerprint Readers with Mobile ID Licenses include the ability to:

- Identify and apprehend wanted persons
- Apprehend criminal warrants and fugitives
- Identify parole/probation violations
- Monitor sex offenders
- Interdict narcotics and drugs

Relationship between the Project and Impacts on Casinos

In comparing the crime trends related to calls for service from 2011 to 2012, with cases that would be more difficult to identify suspects such as trespassing; mentally ill and unable to care for their safety or are a danger to others; suspicious persons and prowlers; as well as crimes that would not require a jail booking; Pala saw an increase in both calls for service in the non-casino areas and an increase in crime cases in both casino and non-casino areas of the reservation; Pauma saw an increase in non-casino calls for service and casino related crime cases; Rincon saw an overall increase to both calls for service and crime reports in both casino and non-casino areas of the reservation; San Pasqual saw an increase in crime reports for casino and non-casino areas alike; Campo saw an increase in calls for service and crime cases related to the Golden Acorn Casino and an increase in calls for service in other areas of the reservation.

How proposed Project will Mitigate the Impact of the Casinos

The use of this technology as a crime-fighting increases efficiency for deputies on patrol and enables a broad apprehension of criminal suspects; making the surrounding communities safer for tribal members and casino guests. If deputies are able to easily identify potential criminals, they will be able to remove them from the area and avoid repeated calls for service.

Notice to the Public

If awarded, the Sheriff's Department will prepare a press release and/or other publicity as determined by the Sheriff's Media Relations personnel to inform the public of the award for the Handheld Fingerprint Readers with Mobile ID licenses. The Sheriff's Department's Valley Center and Alpine Sub-stations and the Rural Sheriff's Command will also announce the award at community meetings and forums.

Below is a chart listing FI's, relevant CFS's, and relevant cases for both casino and non-casino parts of the various reservations. In all three cases activity has increased from 2011 to 2012. For calls and cases the data is limited to those activities/arrests that wouldn't usually involve a trip to SDCJ (where identity would be confirmed through Cal-ID).
