## **NOTICE OF WORKSHOP**

### **FOR DISCUSSION OF PROPOSED AMENDMENTS TO RULE 67.4 – METAL CONTAINER, METAL CLOSURE AND METAL COIL COATING OPERATIONS**

The San Diego Air Pollution Control District (District) will hold a public workshop to discuss proposed amendments to Rule 67.4 – Metal Container, Metal Closure and Metal Coil Coating Operations. Comments or questions may be submitted in writing before or made at the workshop, which is scheduled as follows:

**DATE:** Thursday, January 13, 2011

**TIME:** 9:00 a.m. to 10:00 a.m.

**PLACE:** San Diego Air Pollution Control District  
Main Conference Room  
10124 Old Grove Road  
San Diego, CA 92131

Air quality in San Diego County has substantially improved over the past two decades due to comprehensive efforts to reduce air pollutant emissions. Nevertheless, State and federal air quality standards for ozone are not met in the region. Consequently, emissions of air pollutants that form ozone, including volatile organic compounds (VOCs), must be reduced. State and federal laws require the District to update its rules to control VOC emissions from stationary sources as control technologies improve or control costs are reduced. Specifically, State law requires the District rules to reflect all feasible control measures that were implemented and proved successful for VOC emission sources in other California air districts.

Existing Rule 67.4 regulates VOC emissions from can and coil coating and related cleaning operations. The rule was last amended in 1996. During the last decade, many new materials with a lower VOC content used in these operations were introduced in the marketplace. The District is now proposing to amend the rule to reflect the availability of low VOC content cleaning materials and to generally update the rule, where necessary.

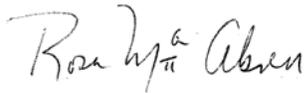

In summary, the proposed amendments will:

- Include a new section to require the use of high transfer efficiency coating application methods;

**OVER**

- Reduce the VOC content limit for cleaning materials to 25 grams per liter unless some other specified cleaning and emission control equipment is used;
- Clarify record keeping requirements;
- Clarify and update existing definitions;
- Update the test methods for determining VOC content and exempt compounds contents of coatings, cleaning materials and the overall control efficiency of emission control systems.

The District requests that workshop participants bring their own copies of proposed amended Rules 67.4. Copies may also be downloaded from the District's website at [http://www.sdapcd.org/homepage/public\\_part/workshops/public\\_workshops.pdf](http://www.sdapcd.org/homepage/public_part/workshops/public_workshops.pdf). Those without internet access may contact Janet McCue at (858) 586-2712. If you have any questions concerning the proposal, please contact Angela Durr at (858) 586-2753, Natalie Yates at (858) 586-2756 or Robert Reider at (858) 586-2640.

ROSA MARIA S. ABREU, Assistant Director  
Air Pollution Control District
