2015 Pest Control Adviser Registration Notice

News

You play an important role in **bee protection**. You are responsible for protecting bees when recommending pesticides. If you recommend a product which says “toxic to bees” on the label, we strongly encourage you to visit our website at: www.sdcounty.ca.gov/awm/pesticides.html or call your inspector to learn more about your important role in bee protection.

Please remember if you use Agrian or other software to write your recommendations it is still your responsibility to ensure the site and/or commodity is listed on the pesticide label. We have seen instances where the computer software does not evaluate the label correctly. Don't assume the software is always correct, review the actual label to assure your recommendation is in compliance and.

Please ensure the property operator and the Pest Control Business doing the application, if applicable, has a copy of your recommendation.

Do you know when a written Pest Control Adviser recommendation is required? It is required for:

- Any pesticide application to publicly owned land such as parks, golf courses, street medians, etc.
- A pesticide application of a restricted material to non-production agriculture when applied by a pest control business.
- Whenever you make an agricultural recommendation.

If you have any questions please call your inspector or (858) 694-8980.

Annual Registration Information

Pest Control Advisers (PCAs), must **register** with the Agricultural Commissioner in all counties where they write recommendations each calendar year.
