## 2016 Pest Control Adviser Registration Notice

### News

New this year! **You can now pay your registration fees online.** Please see the enclosed flyer for step by step directions.

You play an important role in **bee protection**. You are responsible for protecting bees when recommending pesticides. If you recommend a product which says “toxic to bees” on the label, we strongly encourage you to visit our website at: [www.sdcounty.ca.gov/awm/pesticides.html](http://www.sdcounty.ca.gov/awm/pesticides.html) or call your inspector to learn more about your important role in bee protection.

Please remember if you use pest control advisor software to write your recommendations it is still your responsibility to ensure the site and/or commodity is listed on the pesticide label. We have seen instances where the computer software does not evaluate the label correctly. Don’t assume the software is always correct. Review the actual label to assure your recommendation is in compliance with all the requirements.

Please ensure the property operator and the Pest Control Business doing the application, if applicable, has a copy of your recommendation.

Do you know when a written recommendation is required? It is required for:

- Any pesticide application to publicly owned land such as parks, golf courses, street medians, etc.
- A pesticide application of a restricted material to non-production agriculture when applied by a Pest Control Business.
- Whenever you make agricultural recommendations.

If you have any questions please call your inspector or (858) 694-8980.
