Hello Patrick,

Attached are the Sight Distance Certifications from the Tule Wind project, that went to Planning Commission on June 8, 2012. The attached file is from the staff report for that hearing that can be found at:

[http://www.sdcounty.ca.gov/dplu/PC/sop/PCHearing\\_stream.html](http://www.sdcounty.ca.gov/dplu/PC/sop/PCHearing_stream.html)

Even though the documents in the staff report for the Tule Wind project were deemed complete at the time of hearing, the project still has to go to the Board of Supervisors for a GPA and Rezone, so technically the project is not approved yet.

If your engineer can concur on the following , then that concurrence would be acceptable to the County contingent upon the Tule Wind project being approved at the Board of Supervisors.

- Sight distance certification for Access Point 1 (Ribbonwood Road at Rough Acres Ranch Road)
- Sight distance certification and recommendation on the design exception for Access Point 2 (McCain Valley Road at Rough Acres Ranch Road)
- Speed survey study for Access Point 3 in Tule along McCain Valley Road, to be used for nearby Access Point 5 for Soitec Rugged Solar

Let me know if you have any questions.

Thanks,

**René A. Vidales, PE** Civil Engineer
