Subject: Proposed Solar Panels of Tierra Del Sol Road, Boulevard. California

To whom it may concern,

I strongly protest any solar panels erected within a half mile of my well. The water usage alone would cause a disruption of the natural underground reservoir.

Because of the high wind and dirt that fly around here year round the panels would have to be washed at least once a week. I have heard of no plans that would recycle all the water used to clean all these solar panels.

Traffic up and down Tierra Del Sol would disrupt our back county way of life as well as the erosion caused by denuding the landscape. The night sky is something we all enjoy here and we can actually see the Milky Way.

Fires are always a concern, year round; any extra exposure to electrical wires will only put us in more danger.

We choose to live 50 miles from San Diego in a rural area because the community feeling and sense of neighborhood that was not present in town.

Please consider carefully the impact over 200 solar panels would have on this close nit neighborhood.

Sincerely,

Sondria Downing & *Robert Downing*
