Donna,  
I'm currently reviewing Chapter 1, then plan to move to Chapter 4.

Thanks,  
Rob

Donna,  
My review of the Aesthetics chapter is attached for forwarding to Dudek. Minor revisions are included as well as a few comments. Comments may be ignored for the sake of expediency.

Thanks,  
Rob

Donna,  
I'm nearing completion of the Aesthetics Chapter. It's been rather slow working off a small screen, trying to see the extent of areas of new text, and referring to figures in other chapters and studies.

I'm attaching several chapters that contain my previous comments and revisions. You are welcome to assign any staff necessary to review/compare these to the new documents that have come in. Please let me know what gets signed off and I will not so much as glance at it before public review. After I get done with Aesthetics I will send it to you and I will plan to review Chapter 1 and 4.

Thanks,  
Rob

Rob –

We need to keep this review focused. If staff can help we need to ask them now. As you know I have completed the cultural and paleo chapters. What chapters would you like me to review next. I can review the ag and hazards chapters. Just let me know where the comments are and I will review to make sure that they were addressed.

Thanks,

*Donna Beddow*

Donna,

I emailed Poonam earlier today so she has the locations of where the air and ghg files are located. During the previous review I had discussed a few issues with her and captured those in my revisions/edits to the air and ghg chapters. I also plan to review these chapters. I don't recall that Don and Dennis were involved in the last review. I reviewed the ag and hazard eir chapters and will look at those again. I believe geology and minerals were already part of chapter 3 at the last review which was reviewed by Mindy. Minerals may have already been determined to be less than significant in the Initial Study as it's in chapter 3.2 along with parks and rec, and population and housing. However, Chapter 3 is substantially revised as many issue areas that had been in Chapter 2 are now in Chapter 3. Please see if she needs to take another look at chapter 3. I will review Chapter 3 for those issues that I had reviewed previously. Let me know if you have any other questions.

Thanks,  
Rob

**Importance:** High

Rob –

The email that you sent out on Tuesday requesting staff review did not include specialists for the following:

Air – EIR, Tech Studies	P.Boparai
GHG – EIR, Tech Studies	P.Boparai
Agriculture – EIR, Tech Studies	D.Campbell
Hazards – EIR, Tech Studies	D.Kraft
Geology – EIR	J.Bennett
Minerals – EIR	J.Bennett

Do these sections need to be reviewed or have they been accepted as complete?

If they need to be reviewed we need to get staff on board Immediately.

Thanks,

***Donna Beddow***
