Subject: RE: EIR hardcopies
Attachments: Pages from 4.0_Project Alternatives.pdf

Hi Donna,

Thanks for responding so quickly! We will be sure to have the hardcopy and CDs. I have meetings all day on January 2nd up until the CPG meeting, so I can't do a site tour that day. We can be available to tour the sites with you after that – maybe between the Jan 2nd and Feb 6th meetings? The week of the Jan 6th or the week Jan 13th would be best for me.

The Los Robles alternative site is comprised of two areas as shown in the attached figure. The western side is 945 acres and the eastern side is 517 acres. So 1460 acres total. The amount of development and megawatts depends on the selected alternative. For instance, one alternative is to relocate the Tierra Del Sol project to this location. If that is selected, then the Los Robles project would be 420 acres of development with 2,657 trackers and a similar MW as TDS. Another alternative is to relocate Lan East and Lan West to Los Robles; while still another alternative would relocate all three (TDS, Lan East, and Lan West). I hope that helps! Please let me know if you have other questions, or give me a call if you want to discuss.

Hi Mindy,

Just one hard copy for me. Please do bring a dozen or CD copies for our group.

I forgot--do you still want to come out to tour the project sites with me on January 2nd, or later?

Can you provide me any basic information on the new Soitec Los Robles site, MW, acreage, map?

Thanks

Donna

Hi Donna,

I know I just asked this on Thursday, but I already forgot. Did you want to have more than one copy of the EIR? Or just the one? I remember us talking about how large it is.
