SOITEC: GENERAL RESPONSES

Use these general responses in response to comments and elaborate as needed to respond to specific comments. If changes to the EIR are necessary, summarize the change and document location in the tracking spreadsheet.

Subject	Response
General acknowledgement of comment	The comment is noted and will be included in the administrative record.
Comment is vague and doesn't relate to adequacy of DEIR	The comment does not raise a significant environmental issue for which a response is required.
General adequacy of the DEIR	Refer to common response XXX-X (e.g. INT-1). [Add more specifics if needed].
DEIR revision required (note change on tracking sheet)	<p>In response to this comment, the County has made revisions and clarifications to the DEIR. These revisions to the EIR are presented in strikeout-underline format; refer to page XX in Section X.X. [Summarize revisions when appropriate].</p> <p>These changes and additions to the EIR do not raise important new issues about significant effects on the environment. Such changes are insignificant as the term is used in Section 15088.5(b) of the CEQA Guidelines.</p>
Opposition to the project	The commenter's opposition to the project is noted and will be included in the administrative record.
Support for the project	The commenter's support of the project is noted and will be included in the administrative record.
Review period extension	Refer to common response XXX-X (e.g. INT-1).
Project Description Adequacy	Refer to common response XXX-X (e.g. PD-1).
Mitigation measures implementation response – enforcement mechanism (adequacy)	Refer to common response XXX-X (e.g. MM-1).
EIR/EIS adequacy / studies	Each section of the DEIR lists references used in the preparation of that section, including the studies used to support the analysis and conclusions presented in the DEIR. The referenced sections provide all studies used as

incorporated by
reference

reference and background material within the analysis of each applicable section of the DEIR. All important data or material was incorporated directly into the analysis of the DEIR. No additional information from the reports is relied upon for the analysis or conclusions aside from the specific discussion within the DEIR or what was included within the appendices. The DEIR includes summarized technical data pursuant to Section 15147 of the CEQA Guidelines, and provides sufficient material “to permit full assessment of significant environmental impacts by reviewing agencies and members of the public.” Any reports associated with technical analysis were made available for public review. [Discuss how the reports meet County standards, when necessary]
