

**County Name**

County of San Diego

**Work Plan Title**

CY-FSP: Children and Youth - Full Service Partnerships

**Population to Be Served**

These programs serve children, youth, and transition age youth (TAY) up to age 21, who have a diagnosis of serious emotional disturbance or serious mental illness and their families. Special targeted populations include indigent/unserved Latinos and Asian/Pacific Islanders (API), homeless or runaway children and youth, and children and youth who are Medi-Cal eligible, transitioning home or to a home-like setting from residential-based services, and at risk of returning to a higher level of care.

**Work Plan Description**

\*This work plan has been consolidated and includes the following old work plans: CY-3, CY 5.3, CY-7 and CY-10. Beginning in 2016 programs in their entirety are shifted to operate under the FSP model and moving away from offering FSP to a subset of clients within a program.

This program provides an array of full service partnership services including assessment, case management, intensive mental health services and supports, psychiatric services, referrals, linkage with community organizations and co-occurring services. Services are strength-based, family-oriented, focus on resilience and recovery, and encompass mental health education, outreach, and a range of mental health services as required by the needs of the target populations.

- Cultural/Language Specific Services is based on principles of community involvement, cultural and linguistic competence, and outreach to underserved Latino and Asian/Pacific Islander (API) children and youth and their families.
- Homeless and Runaway Services focuses on conducting outreach and engagement to homeless youth, making connections with homeless-specific community organizations, and linking clients to existing homeless youth outreach workers and community resources.
- Child Welfare Services (CWS) and Probation Department Services provide highly individualized services to maximize the capacity of the family to meet the child's needs, thereby reducing the child's level of care from a group home placement to a home or home-like setting. In addition, Early Periodic Screening Diagnosis and Treatment (EPSDT) services provide medication support for children and adolescents who are full scope Medi-Cal beneficiaries.
- Clinic and School/Community Based Services are provided throughout the County to a diverse range of children, youth, and families. These services are designed to emphasize wellness and promote access to medical, social, rehabilitative, or other needed community services and supports. Case managers, rehabilitation workers, peer/family partners, and/or alcohol and drug counselors provide rehabilitative services, home visits, and assistance to parents to manage treatment appointments and service plans. Many workers have bilingual language capacity to serve parents who are often monolingual.

This program furthers the goals of the MHSa by providing culturally competent, wraparound services for identified unserved and underserved populations with a focus on family inclusion. Services are designed to address access disparities and reduce stigma associated with mental health services and treatment. The program also strives to reduce institutionalization and promote integrated service experiences for clients and families.
