

CoSD-LEMSIS Update

October 14th, 2016

County of San Diego Local EMS Data Collection System (CoSD-LEMSIS)

LICENSE MANAGEMENT SYSTEM

Coming Soon!

Field personnel should expect to receive an email mid-November with instructions on how to create a profile in CoSD-LEMSIS.

If you do not receive an email, contact your employer's CoSD-LEMSIS System Administrator.

CoSD-LEMSIS FAQs (NEW!)

Q. Is the system configurable to individual agencies?

A. The system is minimally configurable for field providers but during the implementation/training period many of the fields may not be fully configured. Users may be able to add or delete fields at a later date depending on input received from our providers (usually by consensus of the existing groups of EMS professionals).

Q. Is there a bulk purchase discount for hardware (tablets)?

A. No. Almost any internet-capable device can be registered and used on the ImageTrend™ System. There is no one best platform and therefore there is no offer of County Bulk Pricing for hardware options to support the agencies from EMS. (Privately owned smartphones are not recommend as each device must be registered on the ImageTrend™ System.) System requirements are available on the **ImageTrend™** website at: www.imagetrend.com/resources-system-requirements/.

What questions do you want to see answered in future updates?

Submit your questions to: Susan.Smith@sdcounty.ca.gov or Marlene.Goldstein@sdcounty.ca.gov.
