

BLS

ALS

- Ensure patent airway
- O₂ Saturation prn
- O₂ and/or ventilate prn
- Remove excess/wet clothing

Heat Exhaustion:

- Cool gradually
- Fanning, sponging with tepid water
- Avoid shivering
- If conscious, give small amounts of fluids

Heat Stroke:

- Rapid cooling
- Spray with cool water, fan. Avoid shivering
- Ice packs to carotid, inguinal and axillary regions

Cold Exposure:

- Gentle warming
- Blankets, warm packs
- Dry dressings
- Avoid unnecessary movement or rubbing
- If alert, give warm liquids
- If severe, NPO
- Prolonged CPR may be indicated

Near Drowning:

- Spinal stabilization when indicated

- Monitor EKG
- IV/IO SO adjust prn

Severe Hypothermia with Cardiac Arrest:

- Hold medications
- Continue CPR
- If defibrillation needed, limit to 1 shock maximum

?Heat Exhaustion:

- 500ml fluid bolus IV/IO SO, if no rales.
MR x1 SO

Near Drowning:

- CPAP at 5-10cm H₂O SO for respiratory distress.
