

# Childhood Lead Poisoning Risk Areas, County of San Diego

- 2013 Cases
- 2012 Cases
- 2009-2011 Cases

- Risk Areas**
- Very High 99 - 530
  - High 531 - 961
  - Medium 962 - 1392
  - Low 1393 - 1823

Risk for childhood lead poisoning was evaluated using: (1) percentage of families whose income in the 12 months prior to the American Family Survey was below poverty level, (2) number of home structures built before 1980, and (3) total population under 5 years of age. Census tracts were ranked by each variable, with a ranking of '1' being the highest risk, '2' the next highest, etc. The ranks across variables were added for each census tract. Resulting sums were categorized into 4 classes using Equal
