Yersiniosis C,P	10	4	7	12	12
Zika Virus ¹¹ C,P	0	0	0	1	2

Note: Annual case counts are grouped by CDC disease year (with the exception of chlamydia, gonorrhea, syphilis, and tuberculosis, which are grouped by calendar year), following the schema of CDC disease weeks, which do not necessarily reflect the calendar year. Cases are grouped into year on the basis of the earliest of the following dates: onset date, laboratory specimen collection date, diagnosis date, death date, date report was received. Counts may differ from previously or subsequently reported counts due to differences in inclusion or grouping criteria, late reporting, or updated case information.

¹ Confirmed, Probable, or Suspect cases as defined by Council of State and Territorial Epidemiologists/Centers for Disease Control and Prevention (CSTE/CDC) surveillance case criteria when available; for some diseases/conditions, California Department of Public Health (CDPH) or locally defined criteria are used. When possible, inclusion criteria match that used by CDC or CDPH in published data to allow for comparisons.

² Chikungunya became legally reportable in California in 2016.

³ Through 2015, cases in persons <15 years of age were reportable.

⁴ Many cases of Hemolytic Uremic Syndrome (HUS) are preceded by diarrheal illness, particularly Shiga toxin-producing E. coli (STEC). Cases of post-STEC HUS are counted as both HUS and STEC.

⁵ Hepatitis C, Chronic case counts are subject to change due to delayed and ongoing case processing.

⁶ Human Immunodeficiency Virus (HIV) and AIDS case counts are no longer reported separately due to revisions in the surveillance case definition by CDC. HIV Disease is reported by year of diagnosis and includes newly diagnosed cases regardless of disease progression (i.e., counts include cases of Stage III HIV Infection, formerly referred to as AIDS).

⁷ Includes children with a newly-identified venous blood lead level ≥ 9.5 $\mu\text{g/dL}$.

⁸ Non-Rocky Mountain Spotted Fever

⁹ Includes all species of the family Vibrionaceae other than toxigenic Vibrio cholera O1 or O139

¹⁰ West Nile Virus Infection counts include asymptomatic blood donors as well as cases of West Nile fever and West Nile neuroinvasive disease.

¹¹ Zika Virus became legally reportable in California in 2016.
