San Dieguito Community Trails and Pathways Plan

Trails: The Community Connection

The Community Trails Master Plan will be utilized to develop a system of interconnected regional and community trails and pathways. These trails and pathways are intended to address an established public need for recreation and transportation, but will also provide health and quality of life benefits associated with hiking, biking, and horseback riding throughout the County's biologically diverse environments.

Community trails serve a different function than regional trails, which are focused on the provision of long linear distances. Instead, community trails are "local public facilities" in close proximity to residents that provide transportation, recreation, access, infrastructure, linkages and safe routes throughout a community. The Community Trails Master Plan (CTMP) involves both trail development and management on public, semi-public and private lands. The CTMP has established two forms of non-motorized facilities called "Trails" and "Pathways" that provide passive recreational, and alternative modes of transportation.

San Dieguito Community Trail

Trails are typically away from vehicular roads that are primarily recreational in nature but can also serve as an alternative mode of transportation. They are soft-surface facilities for single or multiple uses by pedestrians, equestrians, and mountain bicyclists.

Pathways are a non-motorized transportation facility located within a parkway or road right of way. A riding and hiking trail located in the road right of way is considered a pathway. They are soft-surfaced

facilities intended to serve both circulation and recreation purposes. Pathways help make critical connections and are an integral part of a functional trail system.

COMMUNITY TRAILS STATEMENT

The popularity of hiking and horseback riding has increased significantly in recent years. People appreciate trail activities as healthful and enjoyable forms of recreation. The trend is especially evident in San Diego County where the pleasant natural environment offers a year-round invitation to trail enthusiasts.

The San Dieguito Community Character is clearly oriented toward a rural, estate residential life style. Horse ownership and various equestrian activities are a conspicuous and essential part of the San Dieguito lifestyle. The relatively high income levels of the residents of San Dieguito, combined with the spacious, rural character of the area has resulted in considerable interest in developing a trails system that would connect all parts of the Plan Area.

San Dieguito's rural locale is surrounded by rapidly urbanizing areas and as growth continues these scenic resources become more valuable. The qualities of the Plan Area mentioned above would indicate that a public investment in equestrian trails in San Dieguito is not only likely to be successful, but, in the long run, should be a vital, permanent part of the regional recreation system.

THE NEED FOR TRAILS

The community trail needs are based on an equation established by the Trails System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people.

The "Trail Need" is the minimum length of trail miles (baseline level of service) for each Community and Subregional Plan Area. The TSA calculations for community trail needs are as follows:

- **Trail Need =** (Community Population /1,000 residents x 0.8 miles of trails)

- **2000 Trail Need** = (**2000** population /1,000 residents x 0.8 miles of trails)

- **2020 Trail Need** = (**2020** population /1,000 residents x 0.8 miles of trails)

Population statistics from the 2000 U.S. Census were used to determine the current trail needs in San Dieguito. Based on the census, the population of the San Dieguito Community Plan Area is 12,528 and there is a current need for 10 miles of community trails. In the year 2020, the population is projected to increase to 32,360 and there would be a future need for 26 miles of community trails.

Does not include private trails in Rancho Santa Fe.

For additional information about the baseline level of service and trail needs, please refer to the discussion under "**The Need for Trails"** and **Tables NT-1** and **NT-2** in the CTMP.

COUNTYWIDE TRAIL GOALS AND POLICIES

The **"Countywide Goals and Policies"** contained in the CTMP apply to all community and sub-regional plan areas. Community-specific goals and policies are intended to accommodate specific needs and they will be implemented when feasible.

Where Community-specific goals and policies are not addressed, the **"Countywide Goals and Policies"** contained in CTMP shall apply.

DESIGN AND CONSTRUCTION GUIDELINES

Countywide trail guidelines in the Community Trails Master Plan apply to all community and sub-regional plan areas. Community-specific guidelines are intended to accommodate specific community needs and they will be implemented when feasible. Where Community specific guidelines are not addressed, the Countywide **"Design and Construction Guidelines"** contained in the CTMP shall apply.

SAN DIEGUITO COMMUNITY TRAILS MAP SUMMARY

As a result of the community trails outreach process for development of the CTMP, the San Dieguito Community Planning Group completed several tasks, and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a community trails map and index.

Proposed trails shown on trails maps contained in the Community Trail Master Plan depict corridors of general alignments. The term "general alignment" is used to describe the general location of a future trail within a designated corridor so that the specific alignment can be determined during the review and approval process when a discretionary application is submitted for a development permit for land that includes a trail corridor. The designated corridor is approximately one–quarter mile wide. A general alignment is useful because it allows the trail to be located to avoid extreme topographical conditions, sensitive habit or other site-specific constraints.

SAN DIEGUITO COMMUNITY TRAILS MAP INDEX

The following community trails map index was completed by the San Dieguito Community Planning Group and will be used as a reference tool. Neighboring communities are italicized and where trail or pathway connections exist, the community trail name and number are included.

SAN DIEGUITO TRAILS MAP INDEX

Trail #:	Name / Status / Type / Priority / Length	Connections: Trail Name (Trail #)	Trail Priority Criteria / Special Features
B	Name: San Dieguito River Park/Coast to Crest Trail Trail Status: ( ) Existing (X) Proposed Trail Type: (X) Trail ( ) Pathway Trail Priority: (X) 1 ( ) 2 ( ) 3 Estimated Trail Length in Miles: 9.20	Connections: Trail Name (Trail #) *City of San Diego Border* Via de Santa Fe/El Apajo Trail (34) Lusardi Creek Trail (41) Artesian Road Pathway (40) Avenida de Pompeii Trail (40A) River Park Connector Trail (29A) McCrink East Boundary Trail (31) 4-S Ranch Trail (61) Lake Drive Pathway (17A) *City of San Diego Border*	Trail Priority Criteria: Connectivity Loop Setting Special Features: Regional Trail.
