Active Transportation Plan

POD 14-006

The County of San Diego has initiated an update to the [Bicycle Transportation Plan](#), [Pedestrian Area Plans](#) and will create a combined [Active Transportation Plan \(ATP\)](#) in support of efforts to promote active transportation options through pedestrian and bicycle improvements in the unincorporated county. Development of the plan includes and analysis of existing pedestrian and bicycle conditions.

Public and community input will be important components of the plan development as the ATP will ultimately identify mobility improvements and provide a prioritization of projects for implementation. All members of the community are encouraged and welcomed to be participants in the outreach activities, including workshops, and on-line surveys, to be announced.

Climate Action Plan (CAP)

- What is a CAP?
- What are the benefits of having a CAP?
- Are local jurisdictions legally required to have a CAP?
- Why does the County need a CAP?

2011 - General Plan Update

- Conservation and Open Space Element Policy (COS-20.1)
- EIR Climate Change Mitigation Measure (CC-1.2)

2012 - Climate Action Plan (CAP)

- Addendum to General Plan EIR

Sierra Club v. County of San Diego

- Did not include comprehensive and enforceable GHG emission reduction measures
- Lacked detailed deadlines for GHG reductions
- EIR is required

2015 - County Board of Supervisors rescinded:

- CAP
- Addendum to the GP EIR
- County's GHG Significance Guidelines

Assembly Bill (AB) 32

- By 2020, reduce GHG emissions to 1990 levels

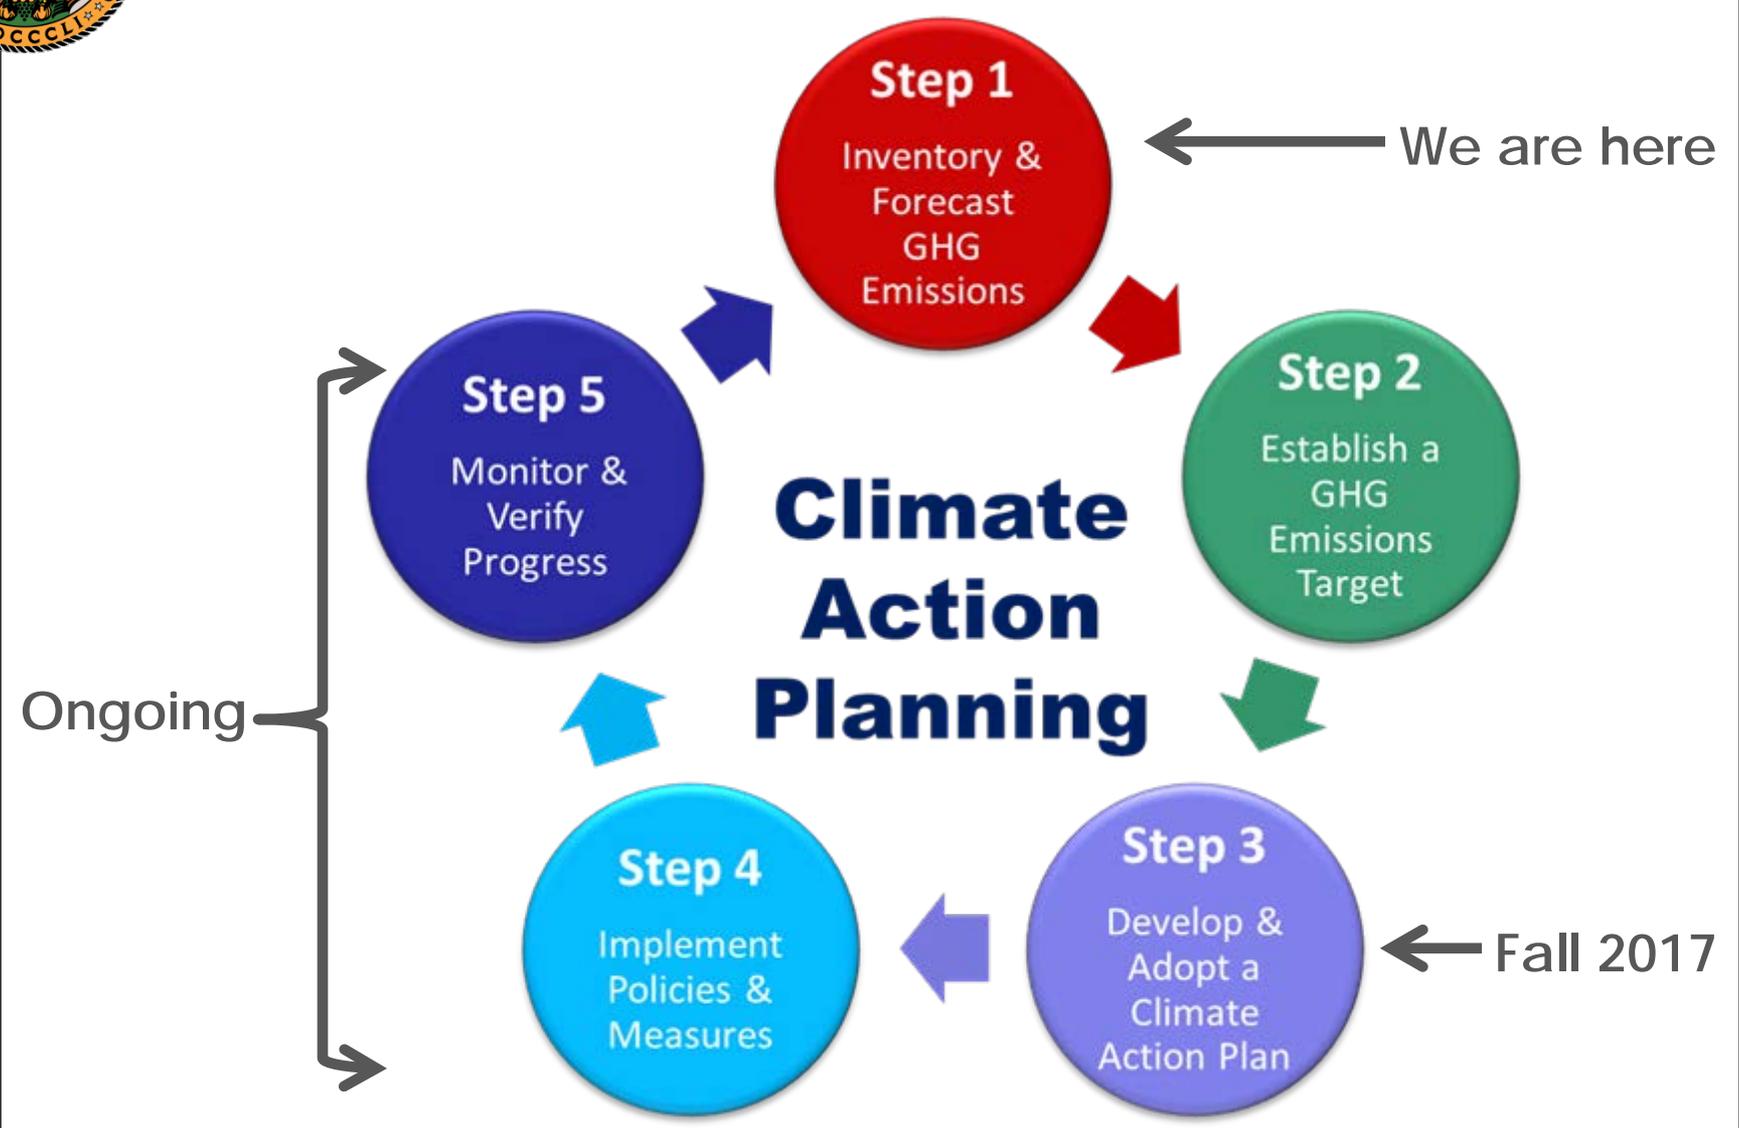

Other Considerations

- Post-2020 GHG Goals – *pending*
- Newhall Supreme Court Ruling
 - Developing interim GHG Analysis Guidance for development projects

County of San Diego

Climate Action Plan

Community Planning/Sponsor Group Quarterly Meeting – April 16, 2016

County of San Diego

Climate Action Plan

Public Outreach Flyer

In July 2015, the County of San Diego (County) started developing a Climate Action Plan (CAP), which will address actions to be implemented in the unincorporated communities of San Diego County. The effectiveness of the CAP relies heavily on public input and engagement. The goal is for the CAP to be adopted in the fall of 2017 – so please get involved now!

1. What is a Climate Action Plan?

A Climate Action Plan (CAP) provides detailed steps local governments – in coordination with communities, businesses and other groups – will take to address the challenges of a changing climate and to reduce the communities' contribution to greenhouse gas emissions.

2. Why do I care about the County's Climate Action Plan?

The changing climate has potentially severe economic, health, social, and environmental consequences. The County's CAP is an important step in identifying local strategies, measures and actions to address these threats to our communities.

The CAP will also help achieve the vision of the County's General Plan, which involves:

- improving opportunities for children;
- managing resources to ensure environmental preservation, quality of life and economic development; and
- promoting safe and livable communities.

Finally, the CAP will help the County reduce greenhouse gas emissions, which will result in co-benefits such as lowering energy costs, reducing pollution in our air and waterways, improving transportation conditions, supporting economic growth, and enhancing the resiliency of communities in the face of changing climatic conditions.

3. How do I get involved with the County's Climate Action Plan?

Everyone has a role to play in developing the CAP! From residents, businesses, and environmental organizations in the unincorporated County, to the County Board of Supervisors and County staff, all members of the community are encouraged to participate in the climate action planning process. Please visit the County's CAP project website to learn more about the process and points of engagement for you to provide input and feedback:
