ADDENDUM TO THE REVISED BIOLOGICAL RESOURCES REPORT
DATED OCTOBER 10, 2009
DATE: OCTOBER 24, 2014

This addendum is intended to supplement and make clarifications to the Revised Biological Resources Report dated October 10, 2009 and prepared by RC Biological Consulting, Inc. as a result of comments received during public review of the Mitigated Negative Declaration.

1. All references in the report shall be changed from the California Department of Fish and Game (CDFG) to the California Department of Fish and Wildlife (CDFW).
2. The reference to Fish and Game Code Section 670 shall be replaced with Fish and Game Code Sections 3503, 3503.5, 3505, 3511 and 3513.
3. The Cumulative Impacts section on page 21 of the Revised Biological Resources Report shall be supplemented to include the Cumming Ranch project. With the addition of the 12.94 acres of impacts to non-native grassland resulting from the Cumming Ranch project, the permanent loss of non-native grassland resulting from the cumulative project would be 522.32 acres (not 509.39 acres) and the collective loss of non-native grassland including the Spirit of Joy Lutheran Church's impacts to 7.6 acres of non-native grassland would be 529.44 acres (not 516.5 acres). The addition of the Cumming Ranch project to the cumulative impact analysis would not result in a changed significance conclusion to the Spirit of Joy Lutheran Church project's cumulative impacts on biological resources.
