

2.0 SIGNIFICANT ENVIRONMENTAL EFFECTS OF THE PROPOSED PROJECT

This chapter of the Environmental Impact Report (EIR) provides a detailed discussion of those subject areas for which project implementation would result in either: (1) significant impacts that cannot be avoided and/or (2) significant impacts that can be avoided, reduced, or minimized through mitigation measures. This includes information developed during the Initial Study and the response period for the Notice of Preparation (NOP). The following environmental issue areas are discussed in this chapter:

- Traffic/Transportation (Section 2.1)
- Agricultural Resources (Section 2.2)
- Cultural Resources (Section 2.3)

These environmental issue areas were determined to be significant, but impacts can be avoided, reduced, or minimized through mitigation measures.
