K -1	<p>As an Alpine resident who would be affected directly by the increased density proposed by those who have a direct interest in getting this designation pushed through in FCI lands, I am encouraging you to not support any proposal designed to increase density in our community. When we make the decision to buy property in Alpine, we accept any property we purchase with its current designation not expecting to have a different use/zoning. not ours or our neighbors. Those pushing to have higher use of their land by subdividing it keep bringing up as if they feel they are entitled to higher profits at the expense of their neighbors. Increased traffic, increased population, decreased safety, when the infrastructure does not support it would be the result if change in designation is passed, The issue had already been heard and agreed upon not to allow this. Please, do not support any changes that allow increased density.</p>	<p>The County acknowledges the commenter's request to avoid any increase in density on the FCI lands in Alpine. This comment will be included in the Final SEIR and made available to the decision makers for their consideration.</p>
