San Diego, California 92101

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT
BRIGHTWATER RANCH
LAKESIDE, CALIFORNIA

Dear Mr. Shield:

As you requested on behalf of Project Design Consultants in care of Pulte Home Corporation, we have performed a Phase I Environmental Site Assessment (ESA) for a 73.81-acre property referenced as Brightwater Ranch (the Site) in Lakeside, California. The Site is located east of Melrose Lane, northeast of Jackson Hill Drive, northwest of Highway 8 Business, and southwest of Wellington Hill Drive. The Site is further identified by San Diego County Assessor's Parcel Number 397-180-13.

The majority of the Site is currently vacant, with the exception of a large above ground concrete municipal water tank in the western portion of the Site. You requested a Phase I ESA to provide information regarding the potential for existing hazardous substances or petroleum impacts at the Site as part of due diligence activities prior to developing the Site for residential use. The accompanying report presents the details of our Phase I ESA.

We appreciate the opportunity to have performed this Phase I ESA for Project Design Consultants in care of Pulte Home Corporation (the Client). Please contact us if you have any questions concerning this report or if we may be of further service.

Sincerely,

GEOCON INCORPORATED

Crystal A. Castellanos
Staff Geologist

Mukesh H. Mehta
Project Geologist

PHASE I ENVIRONMENTAL SITE ASSESSMENT

1. INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) for an approximately 73.81-acre property referenced as Brightwater Ranch (the Site) in Lakeside, California (Figure 1). The Site is located east of Melrose Lane, northeast of Jackson Hill Drive, northwest of Highway 8 Business, and southwest of Wellington Hill Drive. The majority of the Site is currently vacant, with the exception of a large above ground concrete municipal water tank in the western portion of the Site. Project Design Consultants in care of Pulte Home Corporation (the Client) requested this Phase I ESA as part of their due diligence process prior to developing the Site for residential purposes.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify ‘recognized environmental conditions’ (RECs) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of ASTM E 1527-13 defines a REC as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.” De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

ASTM E1527-13 also defines ‘Historical’ and ‘Controlled’ RECs. An ‘Historical REC’ is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” A ‘Controlled REC’ is defined as “a *recognized environmental condition* resulting from a past *release of hazardous substances or petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances or petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).”

The Phase I ESA was also conducted in accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

This Phase I ESA also includes *ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening (VES)*. The purpose of a Vapor Encroachment Screening (VES) is to assess the potential for chemicals of concern (COC) to migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property. A VES is not a requirement of and does not constitute, expand, or in any way define “all appropriate inquiry” as defined and approved by the U.S. Environmental Protection Agency (EPA). The goal of a VES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in the sub-surface of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site.

The main components of this report and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** The objective of reviewing physical setting references was to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Records Review:** The objective of the records review was to obtain information that could potentially help identify RECs at or potentially affecting the Site. We reviewed publicly available federal, state, and local regulatory agency records for the Site.
- **Site History:** The objective of consulting historical references was to assess previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical uses of the Site.
- **Site Reconnaissance:** The objective of the site reconnaissance was to observe site conditions and activities for indications of evidence of RECs. Offsite properties and features were also viewed, but solely from the vantage of the Site and public thoroughfares.

1.2 Scope of Services

The scope of services was performed in general accordance with ASTM Designation E 1527-13, ASTM Designation E 2600-10, and our Proposal No. EP-2013-071 dated October 9, 2013.

1.3 Report Limitations

The Phase I ESA report has been prepared exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records/site visits.

The Client should recognize that this report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic also was not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the ESA is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.4 Data Gaps

A data gap is defined by ASTM Standard E 1527-13 as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. No significant data gaps were identified during the preparation of the Phase I ESA.

2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The Site is located east of Melrose Lane, northeast of Jackson Hill Drive, northwest of Highway 8 Business, and southwest of Wellington Hill Drive, in the city of Lakeside, California (Figure 1). The address 8529 Melrose Lane is associated with the Site. The Site is comprised of approximately 73.81-acres of land and is associated with the following County of San Diego Assessor's Parcel Number (APN) 397-180-13. A copy of the parcel map associated with the APN is in Appendix A.

The Site is depicted in Sections 29, 30, and 31 of Township 15 South, Range 1 East, San Bernardino Base and Meridian on the United States Geological Survey's (USGS) *El Cajon, California, 7.5-minute Topographic Map*.

2.2 Site and Vicinity General Characteristics

The Site consists of 73.81 acres of predominantly vacant land, with the exception of an above ground water tank in the western portion of the Site. Melrose Lane extends from the western adjacent property onto the Site to provide access to the water tank. Unimproved trails are located across the Site. In general, the Site is surrounded by single family residences to the north and west, mobile homes to the south, and vacant land to the east and northwest. A Site Map depicting the site boundaries, features and surrounding properties is presented in Figure 2.

2.2.1 Topography

Elevations at the Site range from approximately 620 feet above mean sea level (MSL) in the eastern portion of the Site to approximately 990 feet above MSL in the western portion of the Site near the water tank (USGS, 1975). Topography at the Site slopes to the north, east, and south from the hill near the western portion of the Site.

2.2.2 Geologic Conditions

The Site is located in the Peninsular Ranges geomorphic province of Southern California (Norris and Webb, 1990). This geomorphic province encompasses an area that extends 900 miles from the Transverse Ranges and the Los Angeles Basin south to the tip of Baja California. In general, the province consists of rugged mountains underlain by Mesozoic igneous and metamorphic rocks to the east, and a dissected coastal plain underlain by Cenozoic sediments to the west. The province varies in width from approximately 30 to 100 miles, and is traversed by a group of faults and fault zones trending roughly northwest.

The geologic surface conditions at and in proximity to the Site were obtained from the *Preliminary Geology Map of the El Cajon 30' x 60' Quadrangle, Southern California* (USGS, 2004). The referenced geologic map indicates that the Site is underlain by Early Cretaceous Granitoid rocks. They are characterized as undivided tonalite and granodiorite.

2.2.3 Hydrologic and Hydrogeologic Conditions

We reviewed groundwater quality and occurrence information available from the California Department of Water Resources (DWR) and the San Diego Regional Water Quality Control Board (RWQCB) for the site vicinity. The Site is located in the Coches Hydrologic Sub Area (907.14) of the Lower San Diego Hydrologic Area (907.10) of the San Diego Hydrologic Unit (907.00). Groundwater in the Coches Hydrologic Sub Area has existing beneficial uses for municipal, agricultural and industrial use, and has a potential industrial process supply beneficial use by the RWQCB (RWQCB, 1994). According to the DWR, one well is located approximately 3,500 feet east of the Site near Los Coaches Creek, however, no groundwater data is provided for this well.

We checked the State Water Resources Control Board (SWRCB) GeoTracker website (<http://geotracker.waterboards.ca.gov/>) for groundwater information at leaking underground storage tank (LUST) facilities near the Site. Groundwater monitoring was conducted from 1994 to 1997 at the Southland Location No. 13662 located at 8625 Los Coches Road, approximately 1,700 feet east of the Site. This facility had groundwater depths ranging from 1.3 feet to 7.9 feet. The surface elevation is approximately 585 at this facility. Based on the elevation difference and geology, groundwater beneath the Site is likely to be at a depth greater than 50 feet. Groundwater flow is likely to follow topography.

2.3 Current and Planned Uses of the Site

The Site is currently undeveloped, with exception of the aboveground concrete water tank. The Client plans to develop approximately 66 single family residential lots on the northern and eastern portions of the Site, and have the western and southern portions of the Site to remain as open space. A detailed description of the current use and of conditions observed at the Site is in Section 6.0.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

The Site is currently undeveloped, with the exception of a paved road that provides access to a municipal above ground concrete water tank located near the western portion of the Site and brow ditches located in several places on Site. No other site improvements currently exist. Further description of the Site is in Section 6.0.

2.5 Current Uses of Adjoining Properties

The Site is bounded to the north, northeast, and west by single-family residences, to the southeast by a mobile home park, and to the northwest and east by vacant land. Additional information is provided in Section 6.4.

3. USER-PROVIDED INFORMATION

This section provides responses to inquiries made to the Client for site information. The Client was asked via a questionnaire (Appendix B) if they are aware of previous environmental reports or documents that may exist for the Site and if so, whether copies could be provided. They were also asked if they have knowledge of legal or administrative proceedings involving the Site. The questionnaire was completed by Mr. Sohail Bokhari, the Director of Land for Pultegroup Inc., and Centex Homes, the Client representative.

3.1 Title, Appraisal and Sale Agreement Records

Mr. Bokhari did not provide a preliminary title report for the Site.

3.2 Environmental Liens or Activity and Use Limitations

The Client representative indicated that he is unaware of any environmental liens or activity and use limitations regarding the Site.

3.3 Specialized Knowledge

The Client representative indicated that he has no specialized knowledge regarding the Site or nearby properties.

3.4 Commonly Known or Reasonably Ascertainable Information

The Client representative indicated that the Site is undeveloped land that is surrounded by a security fence.

3.5 Owner, Property Manager, and Occupant Information

Mr. Sohail Bokhari, the Client representative indicated via a questionnaire that the Site is currently owned by Pulte Home Corporation and is managed by Centex/Pulte. Pertinent information from the interviews is presented in Section 7.0.

3.6 Valuation Reduction for Environmental Issues

The Client representative indicated no knowledge of any environmental conditions that could lead to a potential valuation reduction of the Site.

3.7 Reason for Performing the Phase I ESA

The Phase I ESA was requested by the Client to provide information regarding the potential for existing hazardous substances/petroleum products at the Site, prior to site development for residential use. The Phase I ESA was also requested as part of a Tentative Map approval with the County of San Diego.

4. RECORDS REVIEW

This section summarizes our review of readily available agency records for the Site and properties and facilities in the surrounding vicinity.

4.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a search of federal, state, and local databases for the Site and surrounding area. The search distance for the review extended one mile from the site boundaries. The listings identified in a database are summarized in the table below. A copy of the report entitled *The EDR Radius Map™ Report with GeoCheck*, dated February 19, 2014, is in Appendix C.

Database Name	Search Radius (Mile)	Number of Listings
STATE AND LOCAL DATABASES		
LUST (Leaking Underground Storage Tanks)	½	5
San Diego Co. SAM	½	2
AST (Aboveground Storage Tanks)	¼	1
HIST CORTESE (Historical SWRCB LUST database)	½	2

Database Name	Search Radius (Mile)	Number of Listings
EDR PROPRIETARY INFORMATION		
EDR Historical Auto Stations	1/4	2

Note: TP = Target Property

4.1.1 Site

The Site is not referenced in any of the databases searched by EDR.

4.1.2 Offsite Properties

Based on the database search discussed in Section 4.1, no facilities listed on regulatory databases searched by EDR are within 1/8-mile of the Site (1/4-mile for LUST facilities). The potential for the facilities located greater than 1/8-mile of the Site is low.

4.1.3 Orphan Summary

The Orphan Summary in the EDR report identifies properties that have incomplete address information and therefore could not be accurately plotted. The Orphan Summary lists 20 facilities and/or properties. Based on information provided for the listed properties, their locations, and the databases on which the properties were listed, no significant adverse impact to the Site is expected from these properties.

4.2 Vapor Encroachment Screening/Conditions

The VEC application provided by EDR is a Tier 1 screening process that follows ASTM E 2600-10. The VEC application screens known or suspected contaminated properties with volatile or semi-volatile COCs within an area of concern (AOC) around the Site to determine if COCs in vapor from those properties could encroach upon the Site. If the length and widths of a contaminant plume from a property are known, then the AOC for a VEC extends 100 feet beyond the known plume dimensions. If the plume dimensions are not known, then ASTM E 2600-10 specifies AOC dimensions based on each type of COC plume (non-petroleum or petroleum).

The AOC for volatile, non-petroleum hydrocarbon COCs (i.e., COCs from dry cleaner sites, industrial sites, manufactured gas plants, hazardous waste disposal sites, and landfills) extends 1,760 feet (1/3 mile) from the site boundary. The AOC for volatile petroleum hydrocarbon COCs (i.e., COCs from gasoline stations or bulk distribution facilities) extends 528 feet (1/10 mile) from the site

boundary. However, the AOC around the Site for both types of COCs can be reduced based on known groundwater flow direction, as summarized in the following table:

Location of COC Release Relative to Groundwater Flow Direction	AOC Distance	
	Volatile Non-Petroleum Hydrocarbon COCs	Volatile Petroleum Hydrocarbon COC
Up-gradient of the Site	1,760 feet or 1/3 mile	528 feet or 1/10 mile
Cross-gradient from the Site	365 feet	165 feet
Down-gradient of the Site	100 feet	100 feet

If a known release of volatile COCs is within the AOC, there is a potential that a VEC exists on the Site unless it can be ruled out based on the presence of a hydraulic or physical barrier. A river can act as a hydraulic barrier or a clay layer in soil can act as a physical barrier that would impede the migration of volatile COCs in vapor onto the Site. Manmade or natural features or conditions such as utility corridors or fractured bedrock, can also create preferential vapor pathways that enable vapor to encroach onto the Site.

Based on information in *The EDR Vapor Encroachment Screen Report*, dated March 3, 2014, provided by EDR (Appendix D), no properties were identified within the AOC for the Site having releases of volatile non-petroleum hydrocarbon COCs or with releases of volatile petroleum hydrocarbon COCs.

4.3 Additional Environmental Record Sources

We performed a search of additional readily available environmental record sources. The search distance for the review extended approximately one mile from the Site, unless otherwise noted. A summary of our findings is presented below.

4.3.1 GeoTracker and EnviroStor Websites

We reviewed the SWRCB GeoTracker database (<http://geotracker.swrcb.ca.gov/>) and the Department of Toxic Substances Control (DTSC) EnviroStor database (<http://www.envirostor.dtsc.ca.gov/public/>) for information regarding facilities with reported impacts to groundwater within ¼-mile of the Site. One GeoTracker database listing, Wildfire Burn San Dieguito, was identified on the Site. No properties within ¼-mile of the Site were identified on the GeoTracker or EnviroStor databases.

The GeoTracker website references the Wildfire Burn San Dieguito facility on the Site as an emergency conditional temporary waiver of statutory requirements to file a report of waste discharge for adoption of waste discharge requirements for management and disposal of solid waste from the 2003 wildfire destruction in the San Diego Region. It appears that the Site may have been used as an area where temporary waste piles (for purposes of waste staging) to facilitate the emergency cleanup and disposal of wildfire related solid wastes. The case is listed as completed case closed as of October 23, 2003. A note in the database indicates that waste was excavated from the Site on September 30, 2005.

4.3.2 State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR)

We reviewed information available from the DOGGR website (<http://www.conservation.ca.gov>) for existing/former oil, gas, or geothermal wells on or within the site vicinity. According to the website, no wells are located within one-mile of the Site.

4.3.3 County of San Diego Department of Agriculture, Weights and Measures

We submitted a request to the County of San Diego, Department of Agriculture, Weights and Measures (DAWM), Pesticide Use Enforcement Division regarding possible use of restricted pesticides/herbicides at the Site. The Department maintains such records for approximately four years. According to the County, no record of restricted pesticide/herbicide use was reported for the APN associated with the Site for the period of 2010 through 2013.

4.3.4 San Diego Air Pollution Control District

We submitted a request to the San Diego Air Pollution Control District (APCD) for records pertaining to the Site. According to the APCD, no records were on file for the APN associated with the Site.

4.3.5 County of San Diego Department of Environmental Health

We submitted a request to the DEH for records pertaining to the Site. According to the DEH, no records are on file for the APN associated with the Site.

4.4 Previous Documents/Reports

We previously performed a Phase I ESA for the Site for Centex Homes of Carlsbad, California. Findings of the investigation are documented in our report titled *Phase I Environmental Site Assessment, Los Cocheros Project, San Diego County, California* dated August 22, 2003 (Project No. 09366-06-01). Information in the report is summarized below:

- **User- and Owner-provided Information:** Information obtained from the user of the Phase I ESA (Centex Homes) did not indicate that there were RECs or other potential environmental concerns associated with the Site.
- **Records Review:** Neither the Site nor properties in the site vicinity were identified in the databases researched. There were no indications that there have been facilities or land uses associated with the Site or properties in the site vicinity with the potential to negatively impact the environmental condition of the Site.
- **Historical Use:** Review of historical aerial photographs and topographic maps did not indicate that the Site has previously been developed. There were no indications that there have been facilities or land uses associated with the Site or properties in the site vicinity with the potential to negatively impact the environmental condition of the Site.
- **Site Reconnaissance:** The Site and properties adjacent to it were observed to be generally the same as they currently exist. No RECs or other potential environmental concerns associated with the Site or adjacent properties were observed.
- **Conclusions and Recommendations:** The Phase I ESA did not identify RECs or other potential environmental concerns associated with the Site or adjacent properties. On that basis, we concluded that no further environmental investigation of the Site appeared to be warranted.

5. HISTORICAL USE

This section summarizes information obtained from a variety of sources regarding the historical uses of the Site and identifies those uses that could have led to RECs. The sources of information included Sanborn fire insurance maps, historical aerial photographs, historical topographic maps, and an abstract of city directories provided by EDR.

5.1 Sanborn, Inc. Fire Insurance Maps

According to EDR's Sanborn Map Report dated February 19, 2014, Sanborn maps do not exist for the Site or site vicinity.

5.2 Aerial Photographs

Historical aerial photographs provided by EDR for the years 1953, 1963, 1974, 1980, 1994, 2005, 2009, 2010 and 2012 (Appendix E) were reviewed for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum. The following table summarizes our observations of the Site and adjacent properties visible on the aerial photographs.

Year	Observations	
	Site	Adjacent Properties
1953 (1" = 500')	The Site appears to have been vacant undeveloped land covered with grasses, brush, and scattered trees.	Properties to the north and east of the Site appear to have been undeveloped. Land to the south-southeast of the Site appears to single-family residences and orchards. Land to the west of the Site appears to have been a quarry operation.
1963 (1" = 500')	The Site appears that several unpaved roads and trails extended across portions of the Site. Otherwise, the Site appears to have been undeveloped land.	Adjacent properties east, south, and north of the site appeared to be undeveloped land with several unimproved roads/trails across them. Otherwise, the use and condition of the adjacent property to the west appears the same as in 1953.
1974 (1" = 500')	Site conditions were similar to those observed on the 1963 aerial photograph.	Land to the west of the Site appears to have been expanded quarry operations. A mobile-home park appears to be adjacent to the south. Otherwise, the use and condition of adjacent properties appears to have been generally the same as in 1963.

Year	Observations	
	Site	Adjacent Properties
1980 (1" = 500')	Site conditions were similar to those observed on the 1974 aerial photograph.	It appears that existing streets and several existing single-family residences were on adjacent property immediately west of the Site. Portions of the adjacent properties to the north and east appeared to be undeveloped land with several unimproved roads/trails across them. Otherwise, the use and condition of adjacent properties appears to have been generally the same as in 1974.
1989 (1" = 500')	The Site appears to have a paved road leading to a water tank on the western portion of the Site. Fewer unpaved roads/trails and more near-surface vegetation.	Conditions were similar to those observed on the 1980 aerial photograph. Wellington Hill Drive has been paved up to the central eastern boundary of the Site.
1994 (1" = 500')	Site conditions were similar to those observed on the 1989 aerial photograph.	Conditions were similar to those observed on the 1989 aerial photograph.
2005 (1" = 500')	Site conditions were similar to those observed on the 1994 aerial photograph.	Conditions were similar to those observed on the 1994 aerial photograph.
2009 (1" = 500')	Site conditions were similar to those observed on the 2005 aerial photograph.	Conditions were similar to those observed on the 2005 aerial photograph.
2010 (1" = 500')	Site conditions were similar to those observed on the 2009 aerial photograph.	Conditions were similar to those observed on the 2009 aerial photograph.
2012 (1" = 500')	Site conditions were similar to those observed on the 2010 aerial photograph.	Conditions were similar to those observed on the 2010 aerial photograph.

It appears that the Site has been undeveloped land from at least 1953 to sometime after 2012. The use of adjacent/nearby properties has generally been the same as currently exists since their development. No obvious indications of RECs associated with the Site or adjacent/nearby properties were observed in the aerial photographs.

5.3 Topographic Maps

Historical topographic maps provided by EDR for the years 1893, 1901, 1904, 1939, 1948, 1955, 1967, 1975, and 1996 were reviewed and are in Appendix F. The following table summarizes observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1893 (1:62,500)	No structures or land use is depicted on the Site.	No structures or land use is depicted on the adjacent sites.
1901 (1:62,500)	Conditions are similar to those depicted on the 1893 topographic map.	Similar to conditions depicted on the 1893 topographic map.
1903 (1:125,000)	Conditions are similar to those depicted on the 1901 topographic map.	Similar to conditions depicted on the 1901 topographic map.
1904 (1:250,000)	The scale of this map is too large to discern details of development on the Site.	The scale of this map is too large to discern details of development on the Site.
1939 (1:62,500)	No structures or land use is depicted on the Site.	Los Coches Road is depicted on the eastern boundary. An unimproved road is depicted to the south. No structures or land use is depicted on the adjacent sites to the north or west.
1948 (1:50,000)	Conditions are similar to those depicted on the 1939 topographic map.	Similar to conditions depicted on the 1939 topographic map.
1955 (1:24,000)	Conditions are similar to those depicted on the 1948 topographic map.	Similar to conditions depicted on the 1948 topographic map.
1967 (1:24,000)	Conditions are similar to those depicted on the 1955 topographic map.	A gravel pit is depicted in the adjacent property southwest of the Site. Residential development is depicted in the adjacent property to the east. Information on the map with respect to adjacent/nearby properties is generally the same as depicted on the 1955 map.
1975 (1:24,000)	Conditions are similar to those depicted on the 1967 topographic map.	A trailer park is depicted in the adjacent property to the south. Information on the map with respect to adjacent/nearby properties is generally the same as depicted on the 1967 map.
1996 (1:24,000)	A water tank is depicted on the western portion of the Site. Otherwise, conditions are similar to those depicted on the 1975 topographic map.	Coloration on the map indicates that adjacent properties to the north, south, east and west of the Site are "built-up" areas. Information on the map with respect to adjacent/nearby properties is generally the same as depicted on the 1975 map.

Based on a review of the topographic maps, it appears that the Site has been vacant and undeveloped since at least 1893. No obvious indications of RECs associated with the Site or adjacent/nearby properties are depicted on the topographic maps.

5.4 City Directory

EDR prepared an abstract of city directories including city, cross-reference, and telephone directories. The directories were reviewed at approximately 5 year intervals, if available, from 1970 to 2013. A

copy of the EDR city directory abstract dated February 19, 2014, is included with information regarding offsite facilities in Appendix G.

According to EDR, no addresses are associated with the Site. EDR researched multiple addresses associated with the following streets in the site vicinity: Highway 8, Highway 8 Business, HWY 8, and Wellington Hill Drive. According to EDR, Highway 8, Highway 8 Business, and HWY 8 are listed in the directories as residential and commercial from 1970 to 2013. Most of the listings identified for Wellington Hill Drive has historically been residential (e.g. single-family residences). Based on the identified property uses and/or distance from the Site the potential for these properties to have impacted the Site appears to be low.

6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Ms. Crystal Castellanos with Geocon performed the site reconnaissance on February 26, 2014, and had access to all areas of the Site. We were accompanied by a Mr. Jim Leathers, a site representative for Pulte Home Corporation. There were no limiting conditions to our ability to observe the Site or surrounding properties. The offsite survey was performed by observing adjacent properties from the Site and adjacent public streets. Weather on the day of the site reconnaissance was mostly sunny with temperatures in the high-50s. Photographs of various site features and offsite properties are appended. Figure 2 is a site plan illustrating selected site features. The locations and orientations of photographs of selected site features are also shown on Figure 2.

6.2 General Site Setting

In general, the Site vicinity is comprised of suburban residential community with vacant undeveloped land intermingled. The Site is bound by Melrose Lane, northeast of Jackson Hill Drive, northwest of Highway 8 Business, and southwest of Wellington Hill Drive.

6.3 Onsite Survey

The Site consists of low to moderate relief, vacant undeveloped land, vegetated with grasses, shrubs, trees and unimproved trails traversing the Site. (Photograph Nos. 1 through 4 and 8). The south/southeastern portion of the Site, was observed to contain a ravine and a drainage. Rocky outcrops, household trash and debris were observed at various locations throughout the Site. (Photograph Nos. 5 and 6). We observed a concrete brow ditch in the central eastern portion of the Site (Photograph No.7). Melrose Lane was observed to lead to an aboveground concrete municipal water tank, with a capacity of 800,000 gallons, bounded by a chain-linked fence both owned and maintained by Helix Water District on the western portion of the Site (Photograph Nos. 9 and 10). Chain-link fences and overhead power lines border the northern portion of the Site (Photograph No.11).

No odors, pools of liquid, drums, stained soil or distressed vegetation were observed on the Site. No evidence of RECs was observed on the Site.

6.4 Offsite Survey

Properties within the site vicinity are single family residences to the north and west, mobile homes to the south, and vacant land to the east and northwest. Observations of properties adjacent to the Site are summarized below:

- **North:** The Site is bordered by vacant land similar to the Site and single-family residences adjacent to the north of the Site (Photograph No. 11).
- **South:** The Site is bordered by a mobile home park adjacent to the south of the Site (Photograph No. 12).
- **East:** The Site is bordered by single-family residences adjacent to the northeast of the Site (Photograph Nos. 13).
- **West:** The Site is bordered by single-family residences adjacent to the west of the Site (Photograph No. 14).

There were no obvious indications that activities previously associated with adjacent/nearby properties had impacted the Site. No evidence of RECs was observed on the surrounding properties.

7. INTERVIEWS

7.1 Mr. Sohail Bokhari, a client representative for Pulte Home Corporation

We interviewed Mr. Sohail Bokhari, a Client representative for Pulte Home Corporation, via a questionnaire (Appendix B). Mr. Bokhari stated that the Site was undeveloped land and has not been developed. His company purchased the property in June 2005. Mr. Bokhari indicated that the property is currently zoned as residential under the current General Plan for the County of San Diego.

He stated that Helix Water District provides water service to the area, and Lakeside Sanitation District provides sewer service to the area. San Diego Gas and Electric provide electricity and natural gas, and Waste Management provide trash disposal for the Site.

Mr. Bokhari indicated that he was unaware of fill dirt being brought onto the Site from an offsite source. To his knowledge, no bodies of water or underground storage tanks are present onsite. Mr. Bokhari indicated he is not aware of any existing or historical environmental concerns at the Site.

7.2 Mr. Jim Leathers, a consultant for Pulte Home Corporation

We also interviewed Mr. Jim Leathers, a consultant who was hired to supervise the undeveloped Site. To his knowledge, the large above ground concrete water tank, with a capacity of 800,000 gallons, as well as the easement on Melrose Lane are both owned and maintained by Helix Water District (HWD).

8. SUMMARY OF FINDINGS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, for a 73.81-acre property referenced as Brightwater Ranch (the Site) in Lakeside, California. The majority of the Site is currently vacant, with the exception of an above ground concrete municipal water tank, and associated paved road from Melrose Lane leading up to the tank in the western portion of the Site. We understand the Client intends to develop the Site for residential development purposes.

The following table presents a summary of findings and opinions associated with the Phase I ESA performed at the Site, including known or suspect RECs, historical RECs, and de minimis environmental conditions.

Assessment Category	Observed (Y/N)	REC (Y/N)	Recommended Actions
Hazardous Substances/Petroleum Products	N	N	NFA
Hazardous Wastes	N	N	NFA
Non-Hazardous Wastes	N	N	NFA
Aboveground/Underground Storage Tanks	Y	N	NFA
Unidentified Substance Containers	N	N	NFA
Equipment Potentially Containing PCBs	N	N	NFA
Wastewater Systems	N	N	NFA
Evidence of Releases	N	N	NFA
Pools of Liquid, Pits, Ponds, Lagoons	N	N	NFA
Wells	N	N	NFA
Other Site Issues	N	N	NFA
Nearby Properties	N	N	NFA
Historical Land Use – Site	N	N	NFA
Historical Land Use – Adjacent Properties	N	N	NFA
Recommended Action: AA = Additional action recommended. NFA = No further action required at this time. DM = De minimis condition where additional activities do not appear warranted at this time.			

There are no obvious indications that existing or previous uses of the Site or adjacent/nearby properties have materially impacted the environmental condition of the Site. The Phase I ESA did not identify RECs or potential environmental concerns associated with the Site or adjacent/nearby properties.

9. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, for a 73.81-acre property referenced as Brightwater Ranch (the Site) in Lakeside, California.

The Phase I ESA did not identify RECs or potential environmental concerns associated with the Site or adjacent/nearby properties. On that basis, additional environmental assessment of the Site does not appear to be warranted at this time.

11. QUALIFICATIONS

This Phase I ESA report was prepared by Ms. Crystal Castellanos and Mr. Mukesh H. Mehta. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Mehta is a California Professional Geologist and Certified Engineering Geologist with over 23 years of environmental and geotechnical consulting experience in California. Mr. Mehta is also a Registered Geologist in Oregon, Licensed Geologist in Washington State and Certified Professional Geologist in Alaska, with a Bachelor of Science degree in Geology. His professional experience includes performing many environmental and geotechnical site investigations, remedial investigations including Phase I and Phase II site assessments. Most of these projects have demanded a broad range of expertise, including groundwater flow, soil and water quality evaluation, and remediation technologies. His experience with environmental and geotechnical assessments include drilling, trenching and sampling at industrial, commercial, residential, state and federal properties throughout western United States.

Ms. Castellanos has a BS degree in Geological Science and experience in the preparation and management of Phase I ESAs and other site investigation activities. Ms. Castellanos performs research, environmental assessments and field sampling programs for industrial sites, commercial/retail areas, residential and agricultural properties throughout Southern California.

CLIENT-PROVIDED INFORMATION FOR THE SITE

SITE: Brightwater Ranch, Project No. 09942-06-01

***Please elaborate on any question answered "yes." If the question does not apply to the site, please answer "N/A".**

1. If possible, please provide us with the title, appraisal, or sale agreement records to review and discuss in the Phase I ESA. Will order Title report from First American Title Co. and provide.
2. Are you aware of any environmental liens or activity and use limitations associated with the Site? NO
3. Do you have any specialized knowledge of the Site? NO
4. Please provide any commonly known or reasonably ascertainable information about the Site. Raw land, currently with a security fence, in Lakeside San Diego.
5. Who currently owns, manages, and operates the Site? Title held by Centex Homes, (Pultegroup Inc.), is being managed by Centex/Pulte.
6. Has the monetary value of the Site been reduced due to environmental issues associated with the Site or adjacent properties? No
7. Why are you requesting a Phase I ESA for the Site? As part of Specific Plan and Tentative Map approval with the County of San Diego

**PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR SITE
OWNER, OCCUPANT, OR REPRESENTATIVE**

SITE: Brightwater Ranch, Project No. 09942-06-01

***Please elaborate on any question answered “yes.” If the question does not apply to the site, please answer “N/A”.**

- 1) Describe the current uses of the Site. Raw land.

- 2) How long has the Site been used for these purposes? Has been in this state since acquisition

- 3) How long have you occupied the Site? Since June 1st 2005

- 4) List the existing structures on the property and their age. N/A

- 5) Describe the past uses, owners, and operators of the Site. (Be as detailed as possible and note approximate time periods.) Raw Land

- 6) Utilities including electricity, natural gas, water, sewer, and trash removal are provided to the Site by which utility/companies.

Water – Helix Water District
Sewer – Lakeside Sanitation District
Electricity – San Diego Gas and Electric
Natural Gas – San Diego Gas and Electric
Trash – WM Waste Management

- 7) What type of heating, ventilating, and air conditioning (HVAC) system is located at the Site and how is the HVAC system powered? N/A

8) Have the Site or adjoining properties been used for industrial activities, such the following? (Please note that an adjoining property is a property that is contiguous with, or directly across the street from the Site.)

- | | |
|--|---|
| Gasoline Station | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| Printing Facility | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| Metal Plating Manufacturing | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

| Storage, Disposal, or Recycling Facility | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

Describe other industrial activities, if any.

9) Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped aboveground, buried, or burned on the Site?

Yes No

10) Have any of the following items been stored on the Site in containers greater than 5 gallons?

Paint Yes No

Chemicals Yes No

Pesticides Yes No

11) Are hazardous wastes generated at the Site? If yes, describe the means of disposal and frequency of disposal.

Yes No

12) Have petroleum products been stored on the Site or transferred across the Site in pipelines, either above or belowground?

Yes No

13) Has fill dirt been brought onto the Site from an offsite source?

Yes No

14) Is there evidence that the fill dirt in Question 13 may be contaminated?

Yes No N/A

15) Are there currently any pits, ponds, or lagoons on the Site?

Yes No

16) Have any pits, ponds, or lagoons previously existed on the Site?

Yes No

17) Are there currently areas on the Site with stained soil?

Yes No

18) Have stained soils previously existed on the Site?

Yes No Don't know

19) Do chemical-containing underground or aboveground storage tanks exist, or have they existed previously on the Site?

Yes No Previous status unknown

20) Do fill pipes, vent pipes, or access ways indicating the presence of current or former underground storage tanks exist on the Site?

Yes No

21) Have fill pipes or vent pipes which may indicate the presence of a current or former underground storage tank been removed from the Site?

Yes No Do not know

22) Are floor drains stained with anything other than water in any area on the Site?

Yes No N/A

23) Do floor drains on the Site emit foul odors?

Yes No N/A

24) Is the Site served by a private well or a non-public water source?

Yes No

25) Are contaminants known to exist in any private well or non-public water system serving the Site?

Yes No N/A

26) Does the Site discharge wastewater, other than domestic wastewater or storm water, into the sewer?

Yes No

27) Other than permission for domestic hookup, have any city, county, or local permits for wastewater discharge been issued to the Site?

Yes No

28) Does a septic tank exist, or has one existed previously on the Site?

Yes No Do not previous status

29) Do cesspools or cisterns currently exist on the Site?

Yes No

30) Have cesspools or cisterns previously existed on the Site?

Yes No Do not previous status

31) Other than storm water, does the Site discharge waste water onto the neighboring Site?

Yes No

32) Is there a transformer or capacitor that may contain PCBs on the Site?

Yes No

33) Is there hydraulic equipment such as automobile lifts or elevators on the Site?

Yes No

34) Are PCBs contained in hydraulic oil associated with hydraulic equipment located on the Site?

Yes No N/A

35) Has an asbestos and/or lead-based paint survey been conducted at the Site? If so, what were the findings?

Yes No

36) Other than small quantities of legal pesticides used for landscape maintenance (e.g., Roundup), have pesticides, herbicides, or insecticides been applied on the Site?

Yes No

37) Are you aware of any environmental liens against the Site that are filed or recorded under federal, tribal, state, or local law?

Yes No

38) Have any environmental violations or citations associated with activities conducted on the Site been issued?

Yes No

39) Has the Site been included in other environmental assessments? If so, can copies of the reports be provided?

Yes No

40) Have other environmental assessments identified hazardous substances or petroleum products that exist, or may have existed on the Site?

Yes No

41) Are there any pending lawsuits that involve the release or threatened release of hazardous substances associated with the Site?

Yes No

42) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place on the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes No Property is zoned under the current General Plan for the County of San Diego. As residential

43) Are you aware of any commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of hazardous substance releases or threatened hazardous substance releases?

Yes No

44) Do you have any specialized knowledge or experience related to the Site or nearby properties, including the knowledge of the chemicals and processes used by this type of business?

Yes No

45) Based in your knowledge or experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

Yes No

46) If the purchase price of the Site was below fair market value, did this occur because contamination was/is known or believed to be present on the Site?

Yes No N/A

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 12/16/2013 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 2 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

7-ELEVEN FOOD STORE #13662	8625 LOS COCHES RD	E 1/4 - 1/2 (0.314 mi.)	A8	20

State and tribal registered storage tank lists

AST: A listing of aboveground storage tank petroleum storage tank locations.

A review of the AST list, as provided by EDR, and dated 08/01/2009 has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
C W MCGRATH INC	13080 HY 8 BUSINESS	SSE 1/8 - 1/4 (0.191 mi.)	1	8

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 2 HIST CORTESE sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

EXECUTIVE SUMMARY

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 2 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 11/11/2013
Number of Days to Update: 94	Next Scheduled EDR Contact: 03/10/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704

Number of Days to Update: 151	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 12/09/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/06/2013	Source: Department of Toxic Substances Control

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/10/2013	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

Longitude (West):	116.9141 - 116° 54' 50.76"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	508039.7
UTM Y (Meters):	3632530.8
Elevation:	716 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	32116-G8 EL CAJON, CA
Most Recent Revision:	1975

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN DIEGO, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06073C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> EL CAJON	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/2 - 1 Mile ESE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: VISTA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
2	14 inches	29 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
3	29 inches	33 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6
2	9 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
3	59 inches	74 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6

Soil Map ID: 3

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Impact on Target Property: VEC Can Be Ruled Out

Comments: Chemicals of concern are not likely to be present at this source.

The hydrologic characteristics of the physical setting suggests that vapors would not migrate from the source to the target property.

The source is not within the area of concern, based on its distance, gradient and suspected chemical of concern.

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 04/15/2013

Source: EPA

Number of Days to Update: 72

Telephone: 202-564-6023

Last EDR Contact :01/02/2014

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Last EDR Contact :11/11/2013

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
