Subject: Amphitheatre - Wikipedia, the free encyclopedia

I believe the Rugged project is going to be built in natural amphitheatre of mountains. Sounds can be heard for miles.

I24-1

The County of San Diego appreciates this information and will take it into consideration. Issues related to noise were discussed in Chapter 2.6, Noise, of the Draft Program Environmental Impact Report (DPEIR). Although there will be a change in the natural amphitheater-like environment, the analysis in the DPEIR found that noise impacts associated with the Proposed Project would be less than significant with proposed mitigation and would be consistent with County noise standards. The information in this comment will be provided in the Final Program Environmental Impact Report for review and consideration by the decision makers.
