Thank You. However, the section that you sent is the part void of mentioning the chemical components in the miles of solar panels planned. There is no reference to material safety data sheets (MSDS), safety data sheets (SDS), [or product safety data sheets (PSDS) regarding whether these substances are safe in high concentrations, especially in the likely event of fire. There is no information such as the melting point, boiling point, flash point, toxicity, health effects, first aid, reactivity, storage, disposal, protective equipment, and spill-handling procedures. There is a duty to properly identify these substances and their risk factors related to health and/or environmental risk. Hopefully the county would not allow huge industrial projects in residential areas without knowing the chemical components of the proposed large scale structures involved.

Very truly yours,  
Barrance Q Zakar

Barrance,

I am in receipt of your comments.

Please see the Hazards and Hazardous Materials section of the EIR for a discussion and evaluation of the potential hazards resulting from these projects:

[http://sdcountry.ca.gov/content/dam/sdc/pds/ceqa/Soitec-Documents/Final-EIR-Files/3.1.4\\_HazardsHazardousMaterials.pdf](http://sdcountry.ca.gov/content/dam/sdc/pds/ceqa/Soitec-Documents/Final-EIR-Files/3.1.4_HazardsHazardousMaterials.pdf)

Thank you,

Ashley

Thank you for sending the Soitec EIR. To the extent that you keep track of comments, please register this continued objection to these proposed projects, especially the Tierra Del Sol one.

The report that you sent is intentionally long winded. The report and the projects are intended to overburden the residents. A thousand page report, or whatever it is, I stopped reading after a few hundred pages, doesn't convince me that these projects are not completely out of place, due to aesthetics, fire, water and material hazards, At least they admit in the report that the Tierra Del Sol project is totally aesthetically out of place and with no way to rectify that. Obviously you cannot put miles of industry in the country and make it look right. You don't need a thousand page report to analyze this. It should be a non starter from there. Also, please advise where in the report is the list of hazardous materials that would be in the solar panels, especially materials that are toxic in the event of fire, given the high fire prone planned location of these projects? This seems to be a serious shortcoming in the report, wherein it is admitted that eventual fires are likely in the area of the projects

Very truly yours,

Barrance Q Zakar

**Subject:** Soitec Solar Development Final Program EIR

This email is to inform you that the proposed Final Program Environmental Impact Report (FPEIR) for the Soitec Solar Development Project can now be viewed at the following website: <http://sdcounty.ca.gov/content/sdc/pds/ceqa/Soitec-Solar-EIR.html>. Hard copies of a Notice of Availability of the Soitec Solar Development FPEIR will follow.

The Soitec Solar Development project is scheduled for the January 16, 2015 Planning Commission hearing. Hard copies of the Notice of Public Hearing will also follow.

Thank you for your continued interest in the Soitec Solar Development Project. We look forward to working with you as we prepare the project for Planning Commission and Board of Supervisors consideration.

Sincerely,

Ashley
