---

Ms. Gungle...

The notice for this project for the Board of Supervisors' hearing on October 14, 2015, was in the afternoon mail.  
I no longer need answers to those questions.

Charlene

What is the status of this project?

You stated at the September 2015, BoulevardCPG meeting, that PDS was to appear at a BOS meeting prior to November 2, 2015, to rescind the certification of the EIR, remove all that had to do with the battery storage cargo containers, and recertify the EIR.

Is that still the schedule?

I am following this case (37-2015-00007420) in the online court records, and it appears to have been settled without all of that taking place.

What happened? Is this still scheduled for review at the BOS?
