For the attention of:

Bryan Woods
Chairman
San Diego Planning Commission

I am a resident of Fallbrook, California and wish to express my support of the Lilac Hills planned community. I have reviewed the research and the very well planned design of this community and feel it will be an asset to this area and indeed to all of San Diego County. As I'm sure you are aware, people will continue to be attracted to the San Diego area due to the climate and appeal of Southern California. To plan for this growth effectively, we need exemplary communities which include the very best utilization of energy and water and respect for the existing environment.

Lilac Hills promises to be one of the most energy and water efficient communities in the area. They will raise the bar on improving our environment with existing technology. Moreover, their plan considers the well being and health of the community with walking paths and community gathering places. I anticipate that this community will thrive because it will attract young families through senior citizens.

This is a community which deserves approval. I believe that San Diego will be proud to have this community as an example of quality living.

Thank you for supporting approval.

Best regards,
Carole Hodges
