**Subject:** Mt. Ridge Road (25 mph) on Tentative Master Map  
**Date:** Saturday, August 01, 2015 1:10:35 PM

---

Dear Mr. Wardlaw:

Pursuant to your decision to deny Road Design Exception Request #7, the County is recommending that Mountain Ridge Road be built to a 25 mph design speed (Page 2-52 of Staff letter) and Mountain Ridge Road built to a design speed of 25mph is included in the Tentative Master Map (Attachment E, page 310).

**Neither the DEIR, REIR nor the draft FEIR have ever studied Mountain Ridge Road built to a design speed of 25 mph. You are proposing an alternative that has never been studied and therefore the community has never had a chance to comment on.**

**For the record, you need to point out to the Planning Commissioner's that this option has NEVER been studied, and as a result, there is no factual basis for this recommendation.**

Please remove Mt. Ridge Road built to a design speed of 25 mph from the Tentative Master Map and inform the Planning Commission that your recommendation has never been discussed nor studied.

Thanks,

James Gordon
