Importance: High

Good afternoon Ms. Fitzpatrick,

I am a resident of Fallbrook and I'm writing to share my personal recommendation for approving the Lilac Hills Ranch Project.

The rumor mill in the Bonsall/Fallbrook area ran amuck regarding this project. Generally speaking, those spreading the rumors are not informed, or they are in denial and wouldn't accept any change to the rural environment we all call home. I love our rural environment which was the primary reason I moved to this area. I am also realistic about growth in this region. I know growth will take place. I know responsible growth is the answer. I too had concerns about road safety as I travel south on I15 to work each weekday to the Palomar College campus in San Marcos. Lilac Hills Ranch will be improving the roads and making them safer not just for their residents but for all of us who travel in proximity of the development.

Another issue that comes up often is water. I have attended several public meetings learning about how this project will use extensive conservation technologies to ensure that water is re-used and recycled. If this project doesn't get approved, the next prospective land developer may not be so conscientious.

Lilac Hills Ranch has done their homework and is acting in the most responsible way. They have mitigated every concern presented to them and they exhibit good faith.

Please listen to the members of the community at large. We are the citizens our county supervisors serve.

Let OUR voices be heard!

Respectfully,

Pam Grasso
