RE: Lilac Hills Ranch

Dear Ms. Fitzpatrick:

It is with pride and pleasure that I am writing this letter to endorse the further development and completion of the Lilac Hills Ranch project.

As a resident of both Fallbrook and Bonsall for over fifteen years I have been aware of this development for several years. I have been keenly interested from the onset and followed the progress with much interest. I have attended several meetings and listened attentively to both pros and cons throughout the last several years. What I have found, is that every issue that has been presented has been met with great consideration and with purposeful responses which are always focused to both enlighten and to clear-up any misgivings.

After a lot of learning and watching, I can tell you as a senior this is exactly what I will be seeking in the next couple of years.

I do understand the rural atmosphere that exists within the Bonsall, Valley Center and the Fallbrook region. It is what brought me here in the first place. I can also understand and sympathize with those who believe change will not be for the best. However, I believe it is without the lack of foresight to think that this area will or can stay agricultural and completely rural indefinitely. Our merging population, water situation and the general cost of land are just a few items that long- term residence as well as our commissions and leaders must consider.

With people like Randy Goodson who genuinely care about every detail of this project, I do not see where it will not be of great benefit to both the area and the population in general.

I Further believe that this State-of-the-Art project will be a model for future development and will require even greater designs and modern technology as the bar has been set quite high with the Lilac Hills Ranch project.
