- Project **IS** located within the 100 year floodplain. Stream/River name _____ Sheet No. NA
- Pre-application Fee paid. **Take Fee from Trust Account**

INSTRUCTIONS

The purpose of this evaluation is to determine whether the project site is located within the 100 year floodplain and, therefore, subject to the Resource Protection Ordinance requirements as they relate to floodplains. This form must be completed and submitted as part of a Resource Protection Study application.

1. Provide an accurate location map (Thomas Brothers) with the boundaries of your project to the Flood Control Counter, and a copy of the Tax Assessor's Map for your parcel.

 If all or part of your proposed project is located in a floodplain on a County Floodplain Map, then the project must also be plotted on the County Floodplain Map (available at the Department of Public Works Mapping Counter).
2. Bring this form and your map to the Flood Control Section. The counter staff will indicate whether your proposed project is in or out of a floodplain by initialing the appropriate boxes above.
3. If your proposed project is located in the floodplain, then further evaluation will be necessary and will require the following:
 - Submit a \$200.00 fee to the Flood Control Counter.
 - Provide a floodplain map with an accurate plotting of the proposed project and submit one copy of project map, indicating type of discretionary permit, to the Flood Control Counter.
 - Submit this form, appropriately marked, as part of your Resource Protection Study application to the Department of Planning and Land Use.
4. A preliminary check of your map will be made within 7 days. At the time the evaluation will be either completed and returned to the Project Planner, or you will receive Notice that further information and a fee may be requested.
