Phase I Environmental Site Assessment

Tierra del Sol, California 91905

1.0 EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment (ESA) was conducted for the property located in Tierra Del Sol, Unincorporated San Diego County, California (subject property, Figure 1). The subject property is approximately 419 acres and is comprised of assessor's parcels 658-090-310, 658-090-540, 658-090-550, 658-120-020, 658-120-030. The subject property is currently unoccupied and undeveloped.

The findings of this investigation are based upon a review of historical source information, a search of regulatory records, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- A residence has been present on the subject property since 1923. Household refuse was burned in the vicinity of the residence between 1930 and 1962. Thus, there is a potential that burn ash is present on the subject property. Prior to development of the area where refuse was burned, soil samples should be analyzed to assess health and environmental risks.
- Cattle grazing occurred at the subject property from 1923 until 1978 and from 1995 until 2010.
- A septic tank associated with the residence is reportedly located on the subject property. The septic tank was not observed during the site reconnaissance.
- Orchards and gardens were present on the subject property from 1930 until 1956. Thus, it is possible that pesticides were used and residual pesticides exist in the soil.
- Petroleum products were stored on the subject property in 55-gallon drums from 1936 until 1960. No staining was observed in the area where the 55-gallon drums were reportedly stored.
- Miscellaneous debris in the form of PVC piping, wooden spools, shelving racks, petroleum containers (less than 5 gallons), tires, and heavy machinery were observed in a storage yard on the subject property. Some staining was observed in the vicinity of the petroleum containers. The staining is considered de minimus.
- Five inactive groundwater wells are located on the subject property. Wells can act as a conduit to transfer surface contamination to groundwater. Since the wells are no longer in use and the property is currently vacant, Dudek recommends that the on-site wells be destroyed or sealed and locked.

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

- A power line was observed transecting the subject property in an east-west direction. No staining was observed in the vicinity of the pole-mounted transformers associated with the powerline.
- Adjacent properties include private residences and the US/Mexico border.
- Based on the review of the EDR report, it is unlikely that off-site properties have impacted the environmental conditions at the subject property.

Dudek has performed this Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E 1527-05. Based on the information reviewed this report, the following recognized environmental conditions were identified:

- Orchards and gardens were present on portions of the subject property between 1930 and 1956. Thus, it is possible that pesticides were used. Organochlorine pesticides, such as DDT, were historically applied to agricultural land in the 1940s to 1960s, and arsenical pesticides, prior to 1950. Organochlorine pesticides degrade over time. As the orchards and gardens were reportedly not present after 1956, concentrations of pesticides in the soil are likely low.
- Household refuse was burned in the vicinity of the former residence between 1930 and 1962. Thus, burn ash is potentially present on the subject property. Burn ash is the residual ash that results from the low temperature combustion of soil waste. The residual ash from nonhazardous household refuse tends to contain metals at concentrations that may be considered hazardous under California regulations.

Based on these findings, Dudek recommends that samples be collected and analyzed for organochlorine and arsenical pesticides and metals in the areas formerly used for gardening/orchards and trash-burning. The results should be evaluated to assess potential human health and environmental risk. If the subject property is to remain vacant and no further development takes place, soil sampling would likely not be required by regulatory agencies. Additionally, Dudek recommends that the onsite wells be destroyed or sealed and locked in order to prevent surface contamination from impacting groundwater.

2.0 INTRODUCTION

This Phase I Environmental Site Assessment was performed according to the guidelines stipulated in the American Society for Testing and Materials Standard E 1527-05, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. The subject property is located in Tierra Del Sol, Unincorporated

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

San Diego County, California. This Phase I ESA is being conducted as environmental due diligence prior to the purchase of the property by Tierra del Sol Solar Farm LLC.

2.1 Assessment Procedure and Scope of Investigation

Phase I Environmental Site Assessments assist in identifying past and present land use, including identification of possible on-site releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports, files, and/or is currently visible on-site. The assessment reviews Local, County, State, and U.S. Environmental Protection Agency lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to this site.

The scope of the environmental investigation consisted of: 1) a reconnaissance of the subject property; 2) a computerized database search of regulatory agency records; 3) a review of available historical aerial photographs, topographic maps, and Sanborn fire insurance maps 4) an interview with the property owner; and 5) the preparation of this Phase I Environmental Site Assessment Report detailing the findings of the investigation.

These activities were conducted in order to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the ground, groundwater, or surface water on the subject property.

The term recognized environmental condition is not intended to include *de minimus* conditions. *De minimus* conditions are conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Qualifications of Environmental Professionals

The Phase I ESA was prepared by Rachel Ganiere, Environmental Engineer, Patrick Rentz, Geologist, and Glenna McMahan, Environmental Engineer. The site reconnaissance was conducted by Mr. Rentz. Qualifications for Ms. Ganiere, Mr. Rentz and Ms. McMahan are presented in Appendix A.

The Phase I ESA was conducted under the supervision of Glenna McMahan, an Associate Environmental Engineer, with 12 years of relevant experience. I declare that, to

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

3.0 SITE LOCATION

The subject property consists of approximately 419.6 acres of land located in in Tierra Del Sol, Unincorporated San Diego County, California (Figures 1 and 2; Appendix B, Photographs 1 through 18). The subject property is bordered to the north by Tierra Del Sol Road; to the east by a residence and private land; to the west by residences, private land, and Tierra Del Sol Road; and to the south by the border between the United States and Mexico.

4.0 ENVIRONMENTAL SETTING

General topographic information for the subject property and the surrounding area was obtained from a review of a USGS topographic map for Tierra del Sol, California, from the EDR report (Appendix C), and from the site visit. The topography of the subject property is characterized by a generally east-southeasterly sloping lot. The elevation of the subject property is between approximately 3720 and 3580 feet above mean sea level (Appendix C).

The subject property drains to the east and west via naturally eroded drainages from a gently sloping ridge which trends approximately north – south on the western portion of the subject property.

No subsurface geologic investigation was performed as part of the Phase I ESA. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS), the soils on the subject property consist predominantly of loamy coarse sand.

No water wells were mapped within 1 mile of the subject property in the EDR report. During the site reconnaissance, five groundwater wells were identified on the subject property. Depth to water was measured by Dudek in three of the five existing wells between October 12 and December 12, 2011. Measurements were not recorded in two wells due to obstructions inside the well casing. Depths to water ranged from 45.58 feet below ground surface (bgs) to 103 feet bgs.

5.0 INTERVIEWS

5.1 Site Representative Interview

Joseph H. Brown, the current property owner for 805 Tierra del Sol Road and owner representative for 905 Tierra del Sol Road, completed Property Background Information Questionnaires for the subject property and depicted locations of historical activities on aerial photos (Appendix E). Below is a summary of his responses.

805 Tierra del Sol Road

Mr. Brown indicated that parcels 658-090-310, 658-090-550, and 658-120-030 are associated with 805 Tierra del Sol Road. He indicated that the subject property is currently vacant and was formerly a portion of a homestead beginning in 1923. Mr. Brown indicated that cattle grazed on all of the parcels from 1995 to 2010. The individual parcel use is detailed below.

APN 658-090-310

This parcel was used as a cattle ranch from 1923 until 1978. The property was purchased as an investment property in 1978. Equipment used to maintain fire guards and dirt roads was stored within a chain linked fence between 1994 and 2011. In 2011, any remaining equipment which was not sold was removed from the parcel.

APN 658-090-550

The property was a portion of a homestead beginning in 1930. A residential building is located on the property. The residence was vacated in 1962 and the property has remained unoccupied. Household refuse was burned in the vicinity of the residence between 1930 and 1962. A septic tank associated with the residential building is still located on the property. Mr. Brown noted the approximate trash-burning area and location of septic tank on an aerial photo. In addition, between 1936 and 1950, gasoline, diesel, and kerosene 55-gallon drums were stored near the former residence. Mr. Brown stated that tires and car parts may still be located in the vicinity of the former residence.

APN 658-120-030

The property was a portion of a homestead beginning in 1930. Mr. Brown indicated that the property is vacant.

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

905 Tierra del Sol Road

Mr. Brown indicated that parcels 658-090-540 and 658-120-020 are associated with 905 Tierra del Sol Road. The property was a portion of a homestead beginning in 1930. Mr. Brown stated that the property was used for gardening, orchards, and cattle ranching between 1930 and 1960. Mr. Brown depicted the locations of the gardens and orchards on an aerial photo. A concrete water tank built in 1949 is located on the property. In addition, a small earthen dam is located on the property which was used to contain surface water. The property has been vacant since 1995.

Based on the responses to the questionnaires, burn ash and residual pesticides may be present on the subject property.

5.2 User-Provided Information

In accordance with ASTM Standard 1527-05, Dudek posed questions to the user of this Phase I ESA, Tierra del Sol Solar Farm LLC, who provided the following answers via email:

- 1) Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Tierra del Sol Solar Farm LLC ("TDS") is not aware of any cleanup liens filed against the property.

- 2) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

TDS has not been notified of, nor is aware of any land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed against the property.

- 3) As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

TDS does not have any specialized knowledge or experience related to the property or nearby properties and is not engaged in the same line of business as the current or former occupants of the property or adjoining property.

Phase I Environmental Site Assessment Tierra del Sol, California 91905

- 4) If the purchase price of the subject property was below fair market value, did this occur because contamination was/is known or believed to be present at the property?

TDS is under contract to purchase the property at an agreed upon market price relating to its intended use. TDS has considered the likelihood of contamination and is not aware of any contamination known or present on the property.

- 5) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
- a. Do you know the past uses of the property?
 - b. Do you know of specific chemicals that are present or once were present at the property?
 - c. Do you know of spills or other chemical releases that have taken place at the property?
 - d. Do you know of any environmental cleanups that have taken place at the property?

TDS has been notified that the site was previously utilized for cattle grazing. TDS not aware of any chemicals present or that any were present at the property and/or spills or other chemical releases that have taken place on site. TDS has no knowledge of any environmental cleanups at the property.

- 6) As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

TDS is not aware of any obvious indicators that suggest or present evidence of any contamination at the property.

5.3 Agency Interviews

5.3.1 County of San Diego Department of Environmental Health

Dudek contacted the County of San Diego Department of Environmental Health (SD DEH) on February 9, 2012 to obtain information regarding the subject property.

Phase I Environmental Site Assessment Tierra del Sol, California 91905

According to Joyce Ellman with SD DEH, no records were found for the subject property (Appendix F).

5.3.2 County of San Diego Land Use and Environment Group

Permit records maintained by the County of San Diego Land Use and Environment Group were accessed online on February 10, 2012 to obtain permit information for the subject property. Permits and information on file are summarized as follows (Appendix F):

658-090-310 (805 Tierra del Sol Road)

The permits and information on file for the parcel includes water well, electrical, boundary adjustment, and agricultural preserve permits. Two water wells permits were issued in 1978 and 2003. An electrical permit was issued in 1990. The boundary adjustment permit was issued in 2009, but has an inactive status. An agricultural preserve permit was issued on March 16, 2011, but is currently assigned an inactive status.

658-090-540 (905 Tierra del Sol Road, formerly 709 Tierra del Sol Road)

The permits and information on file indicated that two addresses are associated with the parcel: 709 and 905 Tierra del Sol Road. The permits and information on file are related to boundary adjustment and a pre-application meeting.

658-090-550 (No associated address)

The permits and information on file include a boundary assessment and pre-application meeting.

658-120-020 (905 Tierra del Sol)

The permits and information on file include an electrical and pre-application meeting.

658-120-030 (No associated address)

No permits are associated with the APN.

5.3.3 County of San Diego Code Enforcement Division

Dudek contacted the County of San Diego Code Enforcement Division on February 10, 2012 to obtain violations at the subject property. According to the Code Enforcement

Phase I Environmental Site Assessment Tierra del Sol, California 91905

Complaint Line representative, Carl Hebert, no violations have been reported at the subject property.

6.0 SITE RECONNAISSANCE

A site reconnaissance was conducted on January 4, 2012, by Patrick Rentz of Dudek. The site reconnaissance consisted of walking the site, taking notes on observations, and taking photographs. Photographs are presented in Appendix B.

The majority of the subject property currently consists of undeveloped land (Photographs 1 and 2). The subject property is bordered to the north by Tierra Del Sol Road; to the east by private property; to the south by the U.S. - Mexico border; and to the west by Tierra Del Sol Road and private property. Several old and uninhabited structures (small, single story) are located on the central western portion of the subject property (Photographs 3 and 4). A network of maintained, unpaved roads provides access to the majority of the subject property (Photograph 5).

Wetlands and Natural Waterways

No wetlands or natural waterways were observed on the subject property.

Surface Water Discharge

Surface water drains to the east and west via naturally eroded drainages from a gently sloping ridge which trends approximately north – south on the western portion of the subject property.

Distressed Vegetation

No distressed vegetation was observed on the subject property or surrounding properties.

Indications of Solid Debris Storage

Solid debris storage was observed in what appeared to be an old graded storage yard surrounded by remnants of a chain link fence. Observed debris included PVC piping, large wooden spools, metal shelving racks, oil/sludge containers, tires and discarded machinery (Photographs 6 through 13).

Phase I Environmental Site Assessment Tierra del Sol, California 91905

Chemical Storage or Use

Evidence of oil storage was observed in the old storage yard during the site reconnaissance. Several small (less than 5 gallon) containers contained oil. Dark staining on the ground around several of these oil containers was observed (Photograph 12).

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools or Septic Tanks

Five inactive water wells were observed on the subject property; three water wells are located on the northwest portion, one water well is located on the eastern portion, and one water well is location on the southeastern portion of the subject property. (Photographs 15 through 18). Four wells were installed using a drill rig and one was hand dug. Septic systems were not observed on the subject property.

Sumps

No sumps were observed on the subject property.

Transformers

Transformers are located on several of the power poles (which are connected to the power lines transecting the subject property) that supply electricity to the subject property (Photograph 14). Several electric meters were observed on the subject property. No staining was observed near the transformers.

Abnormal Odor

Dudek did not notice any abnormal odors on the subject property.

Soil Disturbances

No soil disturbances were observed on the subject property.

Storage Tanks

No evidence of underground storage tanks was observed during the site reconnaissance.

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

7.0 REVIEW OF HISTORICAL AERIAL PHOTOGRAPHS

Dudek reviewed historical aerial photographs for the years 1953, 1980, 1989, 1994, and 2005 (Appendix G). The photographs provide background information needed to assess potential historical activities that could present environmental concerns.

The photographs indicate that the subject property was used as residential property with unimproved land and possible agricultural use from the 1953 through 2005. The aerial photographs are described in Table 1.

Table 1
Description of Historical Aerial Photographs

Date	Description
1953	<p>Shrubland/unimproved land, dirt roads, cleared areas, and residential sized buildings are visible on the subject property. The unimproved/shrubland areas are located along the southern portion of the subject property. Dirt roads and trails are visible throughout the subject property boundaries. Cleared areas are visible along the northern and southeastern portions of the subject property. These areas may have been used for agricultural purposes. Row crops are visible in the cleared areas located in the southeastern portion of the subject property. A residential-sized building is depicted along the west central portion of the subject property.</p> <p>Properties to the north, west, and east appear to be unimproved, scrubland. Roads are located along the north, east, and west boundaries of the subject property.</p>
1980	<p>The subject property appears similar to the 1953 aerial. An additional dirt road is visible in the northwestern portion of the subject property. The row crops are no longer visible in the southeastern portion of the subject property.</p> <p>Adjoining properties appear similar to the 1953 aerial photograph with the following exceptions: a structure is visible on the northern adjoining property and unimproved shrubland is visible on the southern adjoining property.</p>
1989	<p>The subject property and surrounding properties appear similar to the 1980 aerial with the following exceptions: two residential sized buildings are visible in the central and central eastern portions of the subject property, the electrical power transmission line is visible in a southwest-northeast orientation, a residential sized building is visible west of the subject property, and residential housing development is visible south of the subject property.</p>
1994	<p>The subject property and surrounding properties appear similar to the 1989 aerial photograph.</p>
2005	<p>A residential-sized structure is visible on the northwestern portion of the subject property. The remainder of the subject property and surrounding properties appear similar to the 1994 aerial photograph.</p>

Phase I Environmental Site Assessment Tierra del Sol, California 91905

8.0 REVIEW OF HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps are another historical source that can be used to document the prior use of the subject property and surrounding area. Topographic maps dated 1959, 1991, and 1996 were reviewed (Appendix D).

The topographic maps (Table 2) show the following:

**Table 2
Description of Historical Topographic Maps**

Date	Scale	Description
1959	1:24,000	<p>Unimproved land and shrubland are depicted on the subject property, along with an unimproved road, a residential sized building, a small reservoir, and a well. The unimproved road is located in the central western portion of the subject property and cuts southeast across the subject property. One small building is depicted on the western portion of the subject property south of the unimproved road. A small reservoir and well are depicted in the southeastern portion of the subject property.</p> <p>A light duty road and shrubland are depicted north and west of the subject property. A residential-sized building is depicted north of the central portion of the subject property. Shrubland, woodland, and an intermittent stream are depicted east of the subject property. A national boundary is depicted south of the subject property.</p>
1991	1:50,000	<p>The subject property and adjoining properties are depicted as shrubland. The residential sized building identified in the 1959 map is present south of the unimproved road. In addition, 12 residential-sized buildings are depicted in the southwestern portion of the subject property and one residential-sized building is depicted in the central portion of the subject property. A power line and light duty road are depicted crossing the central portion of the subject property in an east-west orientation. The unimproved road appears similar to the road depicted in the 1959 map. An additional unimproved road is depicted crossing the central portions of the subject property in an east-west orientation. The well and reservoir depicted in the 1959 map are not depicted in the 1991 map.</p> <p>The adjoining properties appear similar to the 1959 map, with the following exception: light duty roads are depicted east, west, and north of the subject property. The southern adjoining property is depicted as shrubland with residential-sized buildings and light duty roads. Additional residential-sized buildings are located on the northern adjoining property.</p>
1996	1:24,000	<p>The subject property is depicted as unimproved land with shrubland in the southeastern portion. The twelve residential-sized buildings in the southwestern portion of the subject property and one residential-sized building located in the central portion of the subject property are no longer depicted on the subject property. A residential sized building is depicted in the northwestern portion of the subject property in addition to the residential sized structure located in the western central portion of the subject property. An additional unimproved road is depicted in the northwestern portion of the subject property. The light duty road in the 1991 map is no longer depicted on the subject property. The remaining portions of the subject property appear similar to the 1991 map.</p> <p>Residential-sized buildings are depicted west and north of the subject property. The areas south of the subject property are depicted as developed areas. The remaining portions of the subject property appear similar to the 1991 map.</p>

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

9.0 SITE HISTORY

This site history is based on the interview and a review of historical aerial photographs and historical topographic maps.

Based on review of the historical aerial photographs and topographic maps, agency records, City Directory listings, building permit reports, and the site owner/representative interview, a residence associated with a homestead has been present on the subject property since 1923. Portions of the subject property were used for gardening and orchards between 1930 and 1956. Cattle grazed on portions of the subject property between 1923 until 1978 and again between 1995 and 2010. Household refuse was burned in the vicinity of the residence between 1930 and 1962. Additionally, gasoline, diesel, and kerosene were stored in 55-gallon drums in the vicinity of the residence. Five inactive groundwater wells and a septic tank are located on the subject property. Additionally, a power line has been located on the subject property since at least 1989.

Adjacent properties have consisted of public roads, unimproved land and residential properties.

Sanborn Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. The Sanborn Map Report lists the subject property as an unmapped property (Appendix H).

City Directory

City Directory listings were requested from EDR as another source of historical information (Appendix I). No entries for the subject property address were reported in the City Directory listings. Entries for surrounding properties were listed for 666, 686, 770, 869, 871, and 872 Tierra del Sol Road. City Directory listings indicate these addresses have been listed as residential properties.

10.0 PUBLIC AGENCY RECORDS SEARCH REVIEW

The regulatory database search report gives a listing of sites, within an approximately one-mile radius of the subject property, which are known to be chemical handlers, hazardous waste generators, or polluters. Information in these listings includes the location of the site relative to the subject property, sources of pollution, and the status of

Phase I Environmental Site Assessment Tierra del Sol, California 91905

the site. The search performed for this assessment was conducted in December 2011 by EDR. The complete database search report is included as Appendix C.

The subject property was not listed in any of the computerized regulatory databases searched by EDR.

Two additional sites within the specified search distances were identified in the database search. The following sections describe which databases were searched and how many facilities were identified within those databases:

10.1 U.S. Environmental Protection Agency (EPA) Federal Sources

Computer databases included in this search are shown in Table 3.

**Table 3
Federal Regulatory Environmental Databases**

Acronym	Database	Search Distance
NPL	National Priorities List (including proposed NPL sites)	1 mile
Proposed NPL	Proposed National Priority List Sites	1 mile
Delisted NPL	National Priority List Deletions	1 mile
NPL LIENS	Federal Superfund Liens	Target Property
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)	0.5 mile
CERC-NFRAP	CERCLIS No Further Remedial Action Planned	0.5 mile
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile
RCRA TSDF	RCRA - Transportation, Storage, and Disposal	0.5 mile
RCRA GEN	RCRA registered small or large generators of hazardous waste	0.25 mile
ERNS	Emergency Response Notification System of spills	Target Property

The subject property was not listed in the EDR search of State and local records.

Two sites within the specified search areas were identified in the EDR report with listings

- Campo Indian Reservation is located approximately 3.9 miles east of the subject property. This site was listed in the INDIAN RESERV database. This database does not indicate contamination or a release.
- Alpine is incorrectly located as being 0.02 miles west of the subject property. Based on the information given, the site is located more than 30 miles northwest of the subject property. This site was listed on the WMUD/SWAT database. This database does not indicate contamination or a release.

11.0 EVALUATION OF POTENTIAL HAZARDS AND ENVIRONMENTAL CONCERNS

Dudek obtained information regarding the following potential sources of hazards and hazardous material releases from the interview, site reconnaissance, and the EDR report.

Agricultural Use

Based on a review of historical aerial photographs, the subject property has been used for agriculture. According to the current owner/trustee, orchards and gardens were present on the subject property between 1930 and 1956. Portions of the subject property were used for cattle grazing from 1923 until 1978 and from 1995 until 2010.

Off-Site Sources

Based on the results of the database search by EDR it is unlikely that off-site sources have impacted the environmental conditions of the subject property.

Residential Use

Based on a review of historical aerial photographs, interview, and the City Directory listings, the subject property has been previously used as a residence.

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

Burn Ash

Based on the interview, household refuse was burned in the vicinity of the residence between 1930 and 1962. No burn ash was observed during the site reconnaissance.

PCB Items

Pole mounted transformers were observed on the subject property. No stained soil or stained electric line poles were observed beneath the transformers.

Chemical Storage or Use

Evidence of oil storage was observed in the old storage yard during the site reconnaissance. Oil was observed in several small (less than 5-gallon) containers. Staining on the soil surface around several of these oil containers was observed. Between 1936 and 1960, 55-gallon drums containing gasoline, kerosene, and diesel were stored on the subject property.

Fill Material

No fill material was observed during the site reconnaissance.

Debris

PVC pipe, large wooden spools, metal shelving racks, oil/sludge containers, tires, and discarded machinery were observed within an old graded storage yard surrounded by remnants of a chain link fence.

Tanks

No tanks were observed on the subject property. Based on information provided from the current site owner/trustee, a septic tank is located in the vicinity of the residence.

Wells

Five wells were observed on the subject property. The conditions of these wells were investigated by Dudek Hydrogeologists and the results conveyed to the user.

Phase I Environmental Site Assessment

Tierra del Sol, California 91905

12.0 CONCLUSIONS AND RECOMMENDATIONS

Dudek has performed this Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E 1527-05. The following conclusions and recommendations are based on the recognized environmental conditions identified in Section 1.

Household refuse was burned in the vicinity of the residence between 1930 and 1962. Thus, it is possible that burn ash containing elevated metal concentrations could be present where the refuse was burned.

Orchards and gardens were present on the subject property between 1930 and 1956, as noted by the current owner in Appendix E. Thus, it is possible that pesticides were used and residual concentrations exist in soil. Organochlorine pesticides, such as DDT, were historically applied to agricultural land in the 1940s to 1960s, and arsenical pesticides, prior to 1950.

Based on these findings, Dudek recommends that samples be collected and analyzed for organochlorine and arsenical pesticides and metals in the areas formerly used for gardening/orchards and trash-burning. The results should be evaluated to assess potential human health and environmental risk. If the subject property is to remain vacant and no further development takes place, soil sampling would likely not be required by regulatory agencies. Additionally, Dudek recommends that the onsite wells be destroyed or sealed and locked in order to prevent surface contamination from impacting groundwater.

14.0 LIMITATIONS

The findings and conclusions presented in this report are professional opinions based solely upon the indicated data described in this report, visual observations of the property and vicinity and our interpretation of the available historical information and documents reviewed. Dudek makes no warranty as to the accuracy of statements made by others or the accuracy of information included in documentation reviewed in connection with this study. It should be recognized that this study was not intended to be a definitive investigation of potential contamination at the property and that the recommendations do not necessarily include all conditions that may be present. Because the scope of the

Phase I Environmental Site Assessment Tierra del Sol, California 91905

investigation was limited, it is possible that currently unrecognized conditions or contamination might exist at the property.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except that this report has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services. The conclusions are intended exclusively for the purpose outlined herein and may not be suitable to satisfy the needs of other users. Thus, any use or reuse of this document is at the sole risk of said user.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 11/29/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 03/12/2012
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704

Number of Days to Update: 36	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011
Date Made Active in Reports: 08/08/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Last EDR Contact: 10/05/2011
Next Scheduled EDR Contact: 01/16/2012
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 12/09/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/26/2012
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 10/03/2011	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/04/2011	Telephone: 202-267-2180
Date Made Active in Reports: 11/11/2011	Last EDR Contact: 10/04/2011
Number of Days to Update: 38	Next Scheduled EDR Contact: 01/16/2012
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/07/2011	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/08/2011	Telephone: 916-323-3400
Date Made Active in Reports: 12/13/2011	Last EDR Contact: 12/14/2011
Number of Days to Update: 35	Next Scheduled EDR Contact: 02/20/2012
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SACRAMENTO COUNTY:

Toxic Site Clean-Up List

List of sites where unauthorized releases of potentially hazardous materials have occurred.

Date of Government Version: 08/02/2011	Source: Sacramento County Environmental Management
Date Data Arrived at EDR: 10/12/2011	Telephone: 916-875-8406
Date Made Active in Reports: 11/08/2011	Last EDR Contact: 10/07/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

Master Hazardous Materials Facility List

Any business that has hazardous materials on site - hazardous material storage sites, underground storage tanks, waste generators.

Date of Government Version: 08/02/2011	Source: Sacramento County Environmental Management
Date Data Arrived at EDR: 10/14/2011	Telephone: 916-875-8406
Date Made Active in Reports: 11/08/2011	Last EDR Contact: 10/07/2011
Number of Days to Update: 25	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

SAN BERNARDINO COUNTY:

Hazardous Material Permits

This listing includes underground storage tanks, medical waste handlers/generators, hazardous materials handlers, hazardous waste generators, and waste oil generators/handlers.

Date of Government Version: 11/30/2011	Source: San Bernardino County Fire Department Hazardous Materials Division
Date Data Arrived at EDR: 12/01/2011	Telephone: 909-387-3041
Date Made Active in Reports: 12/16/2011	Last EDR Contact: 11/14/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 02/27/2012
	Data Release Frequency: Quarterly

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/09/2010	Source: Hazardous Materials Management Division
Date Data Arrived at EDR: 09/15/2010	Telephone: 619-338-2268

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/21/2011	Source: Department of Environmental Protection
Date Data Arrived at EDR: 11/22/2011	Telephone: 860-424-3375
Date Made Active in Reports: 12/22/2011	Last EDR Contact: 11/22/2011
Number of Days to Update: 30	Next Scheduled EDR Contact: 03/05/2012
	Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

TIERRA SOLAR
UNINCORPORATED COUNTY, SAN DIEGO
BOULEVARD, CA 91905

TARGET PROPERTY COORDINATES

Latitude (North):	32.60470 - 32° 36' 16.9"
Longitude (West):	116.3243 - 116° 19' 27.5"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	563403.1
UTM Y (Meters):	3607477.0
Elevation:	3651 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	32116-E3 TIERRA DEL SOL, CA
Most Recent Revision:	1991

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN DIEGO, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06073C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> TIERRA DEL SOL	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: KITCHEN CREEK

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:
2	20 inches	53 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:
3	53 inches	57 inches	weathered bedrock	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX E

Property Background Information Questionnaires

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

- 1) Describe the current uses of the Property. How long has the property been used for these purposes, and how long have you occupied the Property?

SEE EXHIBIT A #1

- 2) Describe the past uses, owners, and operators of the Property.

SEE EXHIBIT A #2

- 3) List the existing structures on the property and their age.

FENCES, REMAINS OF OLD BUILDINGS

- 4) Utilities including electricity, natural gas, water, sewer, and trash removal are provided to the Property by which utility/companies

Water - WELLS
Sewer - SEPTIC
Electricity SAN DIEGO GAS & ELECT.
Natural Gas NOT APPLY
Trash N/A

- 5) Have the Property or adjoining properties been used for industrial activities including the following? (Please note that an adjoining property is a property that is next to your Property, even if it is across the street).

Gasoline Station	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Printing Facility	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Metal Plating Manufacturing	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Landfill	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Motor Repair Facility	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Dry Cleaners	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Junkyard	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Waste Treatment	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Storage, Disposal, or Recycling Facility	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No

Describe other industrial activities, if any. N/A

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

- 6) Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped above ground, buried, or burned on the Property? Yes No

If yes, please describe. SEE EXHIBIT A & C

- 7) Have any of the following items been stored on the Property in containers greater than 5 gallons?

Paint	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Chemicals	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Pesticides	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No

- 8) Have hazardous substances or petroleum products been stored on the Property or transferred across the Property in pipelines, either above or below ground?

MARCEL # 458-090-55 Yes No Unknown
1936-1950 GASOLINE, DIESEL, KEROSENE IN 55 GAL DRUMS NEAR OLD HOME SITE

- 9) Have 55 gallon drums or sacks of chemicals been stored on the Property?

Yes No Unknown

- 10) Has fill dirt been brought onto the property from an offsite source?

Yes No Unknown

- 11) Is there evidence that the fill dirt in Question 10 may be contaminated? N/A

Yes No Unknown

- 12) Are there currently any pits, ponds, or lagoons on the Property?

Yes No Unknown

- 13) Have any pits, ponds, or lagoons previously existed on the Property?

Yes No Unknown

- 14) Are there currently areas on the Property with stained soil?

Yes No Unknown

- 15) Have stained soils previously existed on the property?

Yes No Unknown

- 16) Do underground or above-ground storage tanks exist, or have they existed previously on the Property?

Yes No Unknown

SEPTIC TANK NEAR OLD HOME SITE

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

17) Do fill pipes, vent pipes, or access ways indicating the presence of underground storage tanks exist on the Property?

Yes No Unknown

18) Have fill pipes or vent pipes which may indicate the presence of an underground storage tank been removed from the Property?

Yes No Unknown

19) Are floor drains stained with anything other than water in any area on the Property? *N/A*

Yes No Unknown

20) Do floor drains on the Property emit foul odors? *N/A*

Yes No Unknown

21) Is the Property served by private well or non-public water source?

Yes No Unknown

22) Are contaminants known to exist in any private well or non-public water system serving the Property?

Yes No Unknown

AREA BARRED IN THE HAND DUG WELL NEAR OLD HOME SITE

23) Does the Property discharge wastewater, other than domestic wastewater or storm water, into the sewer?

Yes No Unknown

24) Other than permission for domestic hookup, have any city, county, or local permits for wastewater discharge been issued to the Property?

Yes No Unknown

25) Does a septic tank exist, or has one existed previously at the Property?

Yes No Unknown

26) Do cesspools or cisterns currently exist on the Property?

Yes No Unknown

27) Have cesspools or cisterns previously existed on the Property?

Yes No Unknown

28) Other than storm water, does the Property discharge waste water onto the neighboring Property?

Yes No Unknown

29) Is there a transformer or capacitor that may contain PCBs on the Property?

Yes No Unknown

SOGTE

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

30) Is there any hydraulic equipment such as automobile lifts or elevators on the property?

Yes No Unknown

31) Are PCBs contained in hydraulic oil associated with hydraulic equipment located on the Property?

PARCEL # 658-490-31

EQUIPMENT HAS BEEN REMOVED
 Yes No Unknown

EQUIPMENT WAS KEPT IN CHAIN LINKED FENCE AREA 1994-2011

32) Has an asbestos and/or lead based paint survey been conducted at the Property?

Yes No Unknown

33) Have pesticides, herbicides, or insecticides been applied on the Property?

Yes No Unknown

34) Are you aware of any environmental liens against the Property that are filed or recorded under federal, tribal, state, or local law?

Yes No Unknown

35) Have any environmental violations or citations associated with activities conducted on the Property been issued?

Yes No Unknown

36) Has the property been included in other environmental assessments?

Yes No Unknown *C/K JDC+E*

37) Have other environmental assessments identified hazardous substances or petroleum products that exist, or may have existed on the Property?

Yes No Unknown

38) Are there any pending law suits that involve the release or threatened release of hazardous substances associated with the Property?

Yes No Unknown

39) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the Property and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes No Unknown

40) Are you aware of any commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Yes No Unknown

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

41) Do you have any specialized knowledge or experience related to the Property or near-by properties, including the knowledge of the chemicals and processes used by this type of business?

Yes No Unknown

42) Based in your knowledge or experience related to the Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Property?

Yes No Unknown

43) If the purchase price of the Property was below fair market value, did this occur because contamination was/is known or believed to be present at the Property?

Yes No N/A

PROPERTY ADDRESS:

805 TIERRA DEL SOL ROAD
BOULEVARD CA. 91905

Vacant Land in Tierra Del Sol, Parcel # 658-090-31-00, 658-090-55-00 and 658-120-03-00,
Presently owned by Joseph H. and Norma J. Brown Co-Trustees
Of the Brown Family Trust dated August 17, 2001

Exhibit A

Answer to question # 1.

- a. Parcel # 658-090-31 is vacant land investment property, purchased from Bob Maupin. Used as investment property after purchase in 1978. Owned 1978 to present time. Did not live on the property.
- b. Parcel # 658-090-55 and 658-120-03 is vacant land investment property. Used as investment property after acquiring in 1995. Owned 1995 to present. Did not live on the property. The property consist of 132 acres one half of original homestead.

Answer to question # 2.

- a. Parcel # 658-090-31 160 acres past use by the Maupin's was for cattle ranch land. Original owner was Clinton Over's homestead beginning in 1923. A land developer Company owned the land after Over died and before Maupin. The only use of the property was for cattle ranch.
- b. Parcel # 658-090-55 and 658-120-03 original use was homestead ranch by James Ennes Brown 1930 to 1960. Luz Brown Trust owned the property 1960 to 1995. Luz Brown was wife of James Ennes Brown and lived in the old home until she vacated the property in 1962 and moved to Boulevard.

Answer to question # 6.

Regarding parcel # 658-090-55. The old home site was on this parcel. Tires and old car parts may still remain around the old home site near the large rock formations. Household trash was burned near the old home site 1930 to 1962. Some tin containers may still remain.

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER, OCCUPANT, OR REPRESENTATIVE

1) Describe the current uses of the Property. How long has the property been used for these purposes, and how long have you occupied the Property?

SEE EXHIBIT B

2) Describe the past uses, owners, and operators of the Property.

SEE EXHIBIT B

3) List the existing structures on the property and their age.

CONCRETE WATER TANK BUILT 1949

4) Utilities including electricity, natural gas, water, sewer, and trash removal are provided to the Property by which utility/companies

Water - WELL

Sewer N/A

APPENDIX G
Aerial Photographs

Tierra Solar

Unincorporated County, San Diego
Boulevard, CA 91905

Inquiry Number: 3231359.4
January 04, 2012

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Dudek & Associates (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
