Poonam, thank you for the quick turn around. The consultants will work with you to provide the additional info. You are correct, we will have the batch plant in our next submittal in march.

Based on our conversations with the ARB reviewer we understand that he is looking for substantiation for certain assumptions that were made in the analyses. I've indicated where additional information should be provided to preempt additional questions in the next round. We're cognizant and supportive of your efforts to get ARB's clearance in the AB 900 process so I'd be happy to work with the consultants as they address these comments.

> Additionally, this version of the studies include reference to a concrete batch plant which is a new project feature. Air quality impacts associated with this additional source will need to be included in the Air Quality studies before the next submittal. Please let me know if you have any questions about this.

> I believe you have all the revised GHG studies that incorporate the comments from ARB Dave Mehl. Please let me know when you will have time to review the changes. We are anxious to get past the ARB step in the AB-900 process. If you review them and there are no required changes, I ask that you email the studies back to Dave dmehl@arb.ca.gov<<mailto:dmehl@arb.ca.gov>> and indicate that the County finds the reports acceptable. I appreciate your assistance with this. If you need anything from Soitec or any of the consultants, please do not hesitate to ask.
