Subject: Soitec EIR Review - Groundwater

Hi Rob,

I've completed my review for groundwater. Here's a list of studies and whether they are accepted or requiring revisions. Dudek has already been informed of edits needed and is working on it:

TDS Groundwater Investigation – Accepted

TDS GMMP – Edits required, Patrick Rentz is revising Figure 2 and will be re-submitting

Rugged Groundwater Investigation – Accepted

Rugged GMMP – Accepted

PVMWC Groundwater Investigation – Edits required, Trey Driscoll is working on it.

PVMWC GMMP – Edits required, Trey Driscoll working on it.

JCSD Groundwater Investigation – Edits required, Trey Driscoll is working on it.

JCSD GMMP – Edits required, Trey Driscoll is working on it.

EIR – Hydrology and Utilities – I provided edits and placed it in the revised docs folder. One issue was a discrepancy for water supply from JCSD. The Hydrology section indicates 27.6 acre-feet of water is available from JCSD and the Utilities section indicates 48 acre-feet. I commented on this in both the docs. Otherwise, there are minor edits in each docs that I've asked be made.

The groundwater docs folder has been updated with the most current docs. I will remove and replace with new docs as they come from Dudek.

Thanks,

Jim Bennett, P.G. #7707, CHG#854
