

Photograph 1. View of the center of the project site. After realignment of Mountain Meadow Road, agriculture was abandoned and habitat reverted to Non-Native Grassland.

Photograph 2. View of large boulder outcrops that occur in much of the south-central portion of the project site.

Photograph 3. View of the small area of Southern Willow Scrub habitat that developed after realignment of Mountain Meadow Road.

Photograph 4. View of the Native Landscape area that was hydroseeded as part of the landscaping plan for the Mountain Meadow Road realignment.
