WEEKLY H1N1 UPDATE

There are no additional H1N1-related deaths to report. San Diego County has had 850 hospitalized cases of H1N1 to date.

Beginning next week, the San Diego County Health and Human Services Agency will no longer issue weekly H1N1 updates unless there is an H1N1-associated death to report.

The H1N1 vaccine is widely available to nearly everyone older than six months of age. The majority of vaccine in San Diego County has been distributed directly to medical providers. You should contact your medical provider about getting the H1N1 flu vaccine. If your medical provider does not have vaccine, or you do not have a regular medical provider, you can call 2-1-1 or visit www.sdcounty.ca.gov to learn where you can get vaccinated.

Several community health centers are offering H1N1 vaccine to the public this weekend.
