Notes:

- This is a measure of prenatal care initiation and does not account for the frequency of care.
  - Births with unknown time of prenatal care start are excluded from the total (denominator in rate calculations).
  - Beginning in 2007, "Date of first prenatal visit" was collected in addition to the "Month prenatal care began" on birth certificates. Therefore, statistics before and after 2007 are not comparable.
  - The large proportion of births with unknown race/ethnicity affects the accuracy of statistics by race/ethnicity.
  - The large proportion of births with unknown educational attainment affects the accuracy of statistics by educational attainment.
  - The "Unknown" category under "Weeks of Gestation" includes births with unknown or improbable gestation lengths (under 17 or more than 53 complete weeks).
- \*Numbers are censored and rates are not calculated when the number of events is fewer than 5 (indicated by "<5"). Interpret with caution rates calculated for fewer than 20 events since they are considered statistically unreliable.
