**F1. Project Description**

The Deer Springs Fire Protection District (District) is requesting the financial assistance from the IGLCBC in the amount of \$23792.00 to purchase needed extrication equipment, self-contained breathing apparatus (SCBA) air bottles, and associated 800 MHz radio batteries and chargers for its' three front line paramedic engine companies. These funds will allow the District to procure new and reliable extrication equipment (rescue stabilization struts), current OSHA/National Fire Protection Association (NFPA) compliant SCBA air bottles, and increase the District's radio communication interoperability with County and Indian Country emergency agencies that will have an immediate effect of providing safe and effective access to trapped and injured victims of our many traffic collisions and vehicle fires along Interstate 15 and our local road system leading to the Casinos of Pala, Pauma, Harrah's, and Valley View.

This equipment will assist in the firm stabilization of a damaged vehicle from an accident, allowing accident victims to be rescued and removed from entangled wreckage in a safe and timely fashion. This will further allow the patients to be transported to trauma centers where they would be able to receive definitive emergency medical care within the "Golden Hour." It is well documented in the New England Journal of Medicine and many Emergency Medical Services trade journals that having the multi-systems trauma patient treated within 60 minutes from the time of the incident to the delivery at the trauma operating room increases the patient's survivability significantly. The new air bottles will serve two purposes, one, being utilized to operate vehicle extrication air bags and pneumatic air chisels which will further enhance the patient extrication process and second, to give our firefighters OSHA/NFPA compliant air bottles for their SCBA's when combating vehicle fires. This funding will further allow our District to maintain and enhance our 800 MHz portable radios in regards to San Diego County communication interoperability (including the four Indian Reservations/Casinos) with the purchase of more robust radio batteries and vehicle chargers.

Once the award has been received, the District will purchase three compliments of the extrication tools, twelve SCBA air bottles, and 25 Motorola portable radio batteries and six vehicle chargers, having the equipment in service and ready for immediate emergency response within 30 days. With the knowledge that the District would be submitting a proposal for a new set of Rescue Struts, SCBA air bottles, and radio accessories, formal bids have been received from our local San Diego County vendors. They are all local companies who understand the daily trials of the San Diego County area fire agencies. They have further indicated that they have the tools and equipment in stock and have indicated that initial training with the new equipment will be provided for as part of the total price.

### **M. Public Announcement/SB 621 Notice Requirement**

The Deer Springs Fire District will accommodate the public announcement by submitting press releases to the North County Times, Valley Center Roadrunner, and the Meadow Lark newspapers. A similar press release will be added to our fire district's website. This press release would include a picture with Tribal leaders.
