Ashley and Mindy,

Attached are my comments/edits for Chapter 2.8.

I have two issues to make you aware of: 1) It appears that pursuant to previous discussions with the consultant that we need to provide additional information related to EMFs (see Section 2.8.5); and, 2) Our significance guidelines document for emergency response (Propose a structure greater than 100 feet...) state that the Sheriff's Dept and CDF are to be notified at public review (see comment r72). I recommend that notification be commenced as soon as possible either by the applicant or us, if it hasn't already been done.

Thanks,
Rob
