The County of San Diego Recycles

It's In Our Nature!

This guide provides recycling information for automotive do-it-yourselfers and residents in San Diego County. This is your handbook for proper disposal and recycling of tires, motor oil, other automotive fluids, and parts.

WHY RECYCLE?

Recycling your oil is free and easy.

One in four San Diego County residents changes their own motor oil. While this practice can save money, it can come at the expense of our environment if used oil and other automotive fluids are poured on the ground, down storm drains, or in the trash. Improper disposal of used motor oil is dangerous and illegal-just one gallon of used oil can contaminate one million gallons of water!

Tires, batteries, engines, and automobile parts are unsightly and hazardous when abandoned in canyons and along roadsides. They can leak dangerous chemicals into the ground, which can pollute local drinking water, streams, and oceans.

Use this guide to find recycling centers or other disposal options for all of your automotive parts and fluids, and help keep our water clean.

- **Never pour anything** into storm drains, gutters, or streets.
- **Use all fluids and share** with neighbors. Motor oil and most clean auto fluids will last for several years.
- **Take used motor oil,** filters, batteries, and antifreeze to a local recycling center listed in this guide. Most facilities accept motor oil and filters for free.
- **As a last option,** take materials to a Household Hazardous Waste facility.

RECYCLE USED OIL

INTEGRATED WASTE MANAGEMENT BOARD

Funded by a grant from the California Integrated Waste Management Board.

For more information, call **1-877-R-1-EARTH** (toll free).

Automotive Recycling/Disposal

FINISH THE JOB RIGHT!
RECYCLE YOUR AUTO PARTS AND LIQUIDS.
CALL 1-877-R-1-EARTH TO FIND OUT WHERE.

Auto And Truck Donations
Some Charitable organizations accept donated cars and trucks.

AIR CONDITIONING FREON
Take to a Household Hazardous Waste drop-off facility. If freon is leaking, don't add more; have the leak repaired.

ANTIFREEZE
Take to a recycling center or to a Household Hazardous Waste drop-off facility. Used antifreeze may contain metals that can contaminate soil and groundwater. Recycle antifreeze and use recycled antifreeze in vehicles. Be very careful when storing antifreeze. Antifreeze is toxic to humans and animals.

AUTOMOBILES
Some charitable organizations accept donated cars and trucks, or take to an auto salvage center listed in this guide.

AUTOMOBILE BATTERIES
Trade in when purchasing a new battery, sell to a recycler, or take to a Household Hazardous Waste drop-off facility. Most stores that sell car batteries will also recycle them. Car batteries are hazardous and should be recycled or sent to a hazardous waste facility. Lead-acid batteries are used in large equipment and machinery (cars, trucks, boats, motorcycles, etc.).

BRAKE FLUID
Take to a Household Hazardous Waste drop-off facility.

GASOLINE AND DIESEL FUEL
Use remaining fuel or take it to a Household Hazardous Waste drop-off facility.

MOTOR OIL AND OIL FILTERS
Drain filters over collection pan for 24 hours, take to an oil recycling center or check with curbside recycling service provider.

POWER STEERING FLUID
Take to a Household Hazardous Waste drop-off facility.

TIRES
Take to a recycling center listed in this guide.

TRANSMISSION FLUID
Take to a recycling center or a Household Hazardous Waste drop-off facility.

USED AUTO PARTS
To recycle auto parts, check with used or new auto part dealers or take them to a scrap metal recycler. Purchasing used automotive parts saves you money and conserves natural resources. For a list of local used auto part vendors, visit www.sdusedautoparts.com.

PAINTS, SOLVENTS, WAX, AND POLISH
Take to a Household Hazardous Waste drop-off facility.

Use Safe Paints and Solvents
Use paints with higher solids content, or water-based paints with no solvent, whenever possible. Clean parts manually, rather than chemically. Try to find one multi-purpose solvent that can serve a variety of uses, rather than having a different solvent for each operation. Substitute less hazardous products, such as water or detergent-based solutions, for solvent cleaners.

WINDSHIELD WIPER FLUID
Take to a Household Hazardous Waste drop-off facility.

Motor Oil Recycling

DID YOU KNOW?

- Used motor oil and oil filters are hazardous wastes. It is illegal to use motor oil as a dust suppressant or to put oil and filters in the trash, on the ground, or down the drain.
- Over 90% of the used oil filters in California are not recycled.
- If all Americans recycled their used oil, the U.S. could save 1.3 million barrels of oil each day—reducing our dependence on foreign oil production.
- It takes 42 gallons of crude oil to make 2.5 quarts of virgin lubricating oil. But only 1 gallon of used motor oil is needed to make the same 2.5 quarts of re-refined oil!
- Re-refined motor oil is just as high in quality as virgin oil. The County of San Diego's auto fleet uses 18,000 gallons of re-refined motor oil a year.
- Motor oil never goes bad, it just gets dirty! It is 100% recyclable!
- Oil recycling in San Diego County is easy and FREE!
- None of the oil collection centers in this guide charge for their services. Some centers even offer a 16¢ per gallon rebate for your used oil.

YOU CAN RECYCLE THE FOLLOWING:

- Vehicle crankcase oils
- Engine lubricating oils
- Transmission fluids
- Gearbox and differential oils

HOW TO RECYCLE:

1) Use drip pans to catch lube oils and drain oil from filter. Drain oil from filter for 24 hours.
2) Transfer oil to a clean container with a tight lid that holds no more than 5 gallons.
3) Transport drained filter in a plastic bag or a leak-proof container.
4) Call oil recycling center to confirm the maximum quantity of oil accepted and that the center accepts oil filters.

Tip: Do not mix oil with other liquids, especially antifreeze, brake fluid, water, gasoline, or parts cleaner.

RE-REFINED MOTOR OIL

Re-refined oil is filtered, refined, and reformulated from used oil base stocks. Using re-refined oil is the environmentally responsible choice because it conserves valuable non-renewable petroleum resources. Re-refined oil meets or exceeds all American Petroleum Institute standards (look for the API starburst), as well as new car and truck warranty requirements. Testing shows that it matches virgin-base stocks in performance and protection.

BRANDS TO LOOK FOR:

- America's Choice by Safety-Kleen
- Eco by Chevron
- Enviroil by Lyondell
- Firebird by Unocal 76
- SOAR by Rosemead

If you can't find these brands on the shelf, it's because not enough people know about the quality of re-refined oil. Many fleet managers, including the County of San Diego, use these products in bulk, but retailers need to know that you want them, too. If you or your fleet manager would like to learn more about using re-refined oil, call the Solana Center for Environmental Innovation at (760) 436-7986.

So...ASK for re-refined oil products and SPECIAL ORDER if necessary.

Tire Recycling

WHY RECYCLE YOUR TIRES?

Illegally dumped and stockpiled tires can create serious health and safety problems. Tires serve as breeding grounds for disease-carrying pests, like mosquitoes which can carry West Nile Virus. Tire piles are also potential fire hazards. If you need to keep tires for home use, store them indoors or covered with a tarp or boards to keep rain out.

RUBBER IN THE ROADS

Rubberized asphalt concrete is a quieter and more durable road surface than traditional concrete roads. Projects in California use more than 2 million scrap tires per year. It takes 2,000 tires to make 1 mile of rubberized asphalt concrete road. Tires are also recycled into roofing shakes, carpet cushioning, playground safety mats, mouse pads, and speed bumps.

MAKE YOUR TIRES LAST

The longer your tires last, the more money you save! Your gas mileage improves, your car handles better, and you reduce the number of scrap tires because you get the mileage the tires were designed for.

SHOP FOR QUALITY AS WELL AS PRICE

Ask the dealer about traction and temperature grades for tires. For the best wear, look for high temperature or "A" rated tires. The Center for Auto Safety recommends dividing price by mileage rating to determine the cost per mile.

BUY THE RIGHT SIZE TIRE

Tires are sized by diameter and width and are rated by their weight-carrying capacity. Overloading a tire by as little as 10% causes it to wear out faster.

USED TIRES AND TIRE RETREADING

Before you buy a new tire, ask if there are any used or retreaded tires available. These tires are a good choice because you extend the life of the tire and get more miles for less money. To learn about retreading for large vehicles and fleets, check out **www.retread.org**

California generates over 30 million waste tires yearly. Approximately 22.1 million tires are diverted from landfills for recycling and reuse each year.

MAINTAIN PROPER PRESSURE

Too much or too little air pressure shortens the life of a tire. Check tire pressure when the tires are cold. The recommended pressure is specified by the vehicle manufacturer and is listed on the edge of the driver's door, the glove box door, or fuel door.

Proper tire inflation is important. Under-inflation is the leading cause of tire failures, and overinflated tires puncture more easily and cause excessive wear.

CHECK TIRES OFTEN FOR DAMAGE

Visually inspect your tires monthly for punctures, nails, glass, cracks, bulges and signs of abnormal wear and leaks.

KEEP WHEELS ALIGNED AND TIRES BALANCED

Improperly aligned wheels can cause uneven and premature tread wear. Schedule periodic alignment checks and balancing as recommended in your vehicle owner's manual. Use a qualified tire dealer to check your alignment and balance if you feel "pulling" or vibration in the wheel.

ROTATE TIRES REGULARLY

Most manufacturers recommend rotating tires every 6,000 miles. Rotating tires regularly can help achieve and maintain uniform tire wear. The proper rotation sequence and timing can usually be found in the car owner's manual or by consulting the tire manufacturer or dealer.

REPLACE TIRES WHEN THERE IS 1/16" OF TREAD LEFT

All new tires have "wear bars" that indicate when there is only 1/16" of tread left. When you see the bars, replace the tire immediately.

PRACTICE GOOD DRIVING HABITS

Avoid excessive speed. High speeds heat up tires, which can cause the rubber to wear out more quickly. Avoid sudden stops, starts, and cornering at high speeds. Smooth driving habits prolong tire life, save gas, and increase your mileage.

How To Do More

WHEN WORKING ON YOUR VEHICLE, HELP KEEP SAN DIEGO'S WATER CLEAN!

- Never pour anything into storm drains, gutters, or streets.
- Wash your car at a carwash that captures the water and recycles it! Or wash your car on a grassy area in your yard.
- Keep your car tuned up and running clean! Check your car for leaks routinely. Fix leaks promptly.
- Clean up oil spills and recycle or dispose of waste properly.
- Is a new car in your future? Check into alternative fuel vehicles that are less polluting.
- Make new friends; save gas and money! How? Join a car pool. Call "1-800 COMMUTE" to find a carpool for your route.

For more information or to report stormwater pollution, call the Regional Stormwater Hotline at 1-888-846-0800 or www.projectcleanwater.org.

OTHER COUNTY RECYCLING GUIDES
