The approved HRA results are used to determine public health risk notification and risk reduction requirements under District Rule 1210. The approved HRA results indicate that potential public health risks exceed the public notification levels specified in Rule 1210 Section (d)(1).

Therefore, within 45 days of receipt of this notice, your facility must submit a revised or updated public notification plan that specifies the procedures you intend to use to notify the public of the results of the HRA, as this was the first HRA conducted for your facility utilizing the 2015 revised HRA guidelines from the State Office of Environmental Health Hazard Assessment (OEHHA). The required elements of the plan are described in District Rule 1210, Subsections (d)(5)(i) through (d)(5)(viii).
