Chapter 5 - Actions and Strategies
As previously discussed, the Portside community has several census tracts with very high CalEnviroScreen 3.0 (CES 3.0) ratings. Specifically, it has four census tracts that are in the 98th percentile for CES 3.0 and another eight that are in the 85th percentile. Over 50,000 San Diegans reside in this area and are subject to significant pollution exposure.

Diesel particulate matter (PM) emissions, a known carcinogen and the greatest toxic air pollutant risk in the County, is one of the challenges the community faces. Eleven of the twelve census tracts (over 45,000 people) have an exposure risk greater than the 95th percentile. Four of the census tracts (over 15,000 people) are in the 99th percentile for diesel PM.

The Portside community is a very sensitive population as evidenced by its CES 3.0 indicators. Of particular concern is the asthma indicator with five census tracts (20,000 residents) in the 95th+ percentile. With the high asthma indicator and significant pollution exposure, residents are very vulnerable to the effects of asthma.

The sources of air pollution are often located close to homes, schools, and other community areas where the public can be exposed to harmful pollutants. As a result, reducing exposure to air pollution at schools and residential areas is a priority for the community.

In addition to the ongoing efforts described in this plan, the Community Steering Committee (CSC) is proposing new actions to reduce air pollution in the community. Each action is to be carried out based on a set of strategies, goals, and timelines. The entity (e.g., government agency or organization) responsible for the actions is also identified. The actions set forth in this chapter define a path to further reduce air pollution from sources in the community under the following seven categories:

1. Outreach
2. Incentives
3. Rule Development
4. Enforcement
5. Heavy-Duty Trucks
6. Land Use
7. Port-Related Activities
Outreach Strategies

To further communicate and provide outreach to protect the health and welfare of San Diego County residents in the community, the San Diego County Air Pollution Control District (District or APCD) is proposing three outreach strategies:

- **Incident Response Plan.** The District will prepare and implement an incident response plan that clearly defines the protocols and procedures prior to, during, and after an incident involving major, unplanned air contaminant releases and other emergencies with air quality impacts. The plan will provide for the protection of public health, safety and the environment. It will be developed in collaboration with other government agencies and the public to ensure understanding and readiness for any future incident.

- **Office of Environmental Justice.** The District will provide a guideline to help design, establish, and administer a new Office of Environmental Justice within the APCD. This strategy will help to provide under-served communities with additional opportunities to fully participate in decision-making processes. This new office will allow additional institutional support for the Community Air Protection Program.

- **Public Outreach.** The District will develop and implement a Public Participation Plan to enhance the effectiveness of the APCD's public outreach and engagement activities in disadvantaged communities and other communities throughout the region.

The strategies identified in the tables shown below align with the District’s commitment to continuing to foster environmental justice and community engagement.
**Action: Incident Response Plan**

**Course of Action**

Establish and implement an APCD Incident Response Plan:

- Develop protocols and procedures to address and manage the series of events during and after a major, unplanned incident with air quality impacts.
- Train staff to implement the incident response plan in order to protect public health, safety, and the environment.

**Strategies:**

- Collaboration and Engagement

**Goal(s):**

- Contribute in an advisory or support capacity to emergency response agencies utilizing the APCD’s resources and expertise for air sample collection, air monitoring, laboratory analysis, inspection, investigation, enforcement, identifying air emissions, health effects, media coordination and general public messaging during an incident.

**Estimated Timeline(s):**

In FY 2020-21:

- Establish the APCD Incident Response Plan including overall scope, roles, and responsibilities.
- Evaluate the costs and funding source for plan implementation.
- Train staff to implement the APCD Incident Response Plan.

**Implementing Agency, Organization, Business or Other Entity**

**Name:**

San Diego County Air Pollution Control District (APCD)

- Establish APCD Incident Response Plan
- Evaluate the costs and funding for plan implementation
- Ensure staff is trained to implement
- Coordinate with other jurisdictions

County of San Diego – Office of Emergency Services (OES)

- Provide priority notifications of incidents
- Communicate continued updates of the incident and progress made
- Joint efforts for resolutions

Community Steering Committee (CSC) Members

- Provide input to and receive updates from APCD on the plan.

**Additional Information:**

- SCAQMD has established an Incident Response Plan
  https://www.aqmd.gov/nav/about/policies/aqmd%27s-emergency-response-policy
**Action: Establish an Office of Environmental Justice within the APCD**

**Course of Action**

- Design, establish, and administer a new Office of Environmental Justice within the APCD.
- Develop and implement strategies to integrate environmental justice and equity in agency operations, policies, and regulations.
- Develop and implement strategies to improve APCD’s outreach and education efforts in communities, especially low-income and minority communities.

**Strategies:**

- Collaboration and Engagement

**Goal(s):**

- Make environmental justice considerations a standard practice in the way we do business.
- Engage under-served communities so that everyone can fully participate in decision-making processes.
- Provide additional institutional support for the Community Air Protection Program.
- Work towards meeting health-based air quality standards and reduce health risks from toxic air pollutants in all communities.

**Estimated Timeline(s):**

In FY 2020-21:

- Establish the Office of Environmental Justice including overall scope, roles, responsibilities.
- Evaluate the feasibility, including costs and possible funding source, of establishing a satellite office within the Portside Community and discuss findings and any proposed next steps with the Steering Committee.

**Implementing Agency, Organization, Business or Other Entity**

</table>
Incentives Strategies

The District’s incentive programs are designed to provide funding to encourage owners of older, dirtier mobile equipment to replace it with newer cleaner machines before regulations require them to do so. Since 1999 the District incentives programs have provided over $131 million in funding to residents and businesses who work throughout the County and achieved over 1800 tons per year of emission reductions.

Funding for the District’s incentive programs typically comes from state or federal sources, include the California Air Resources Board (CARB) and the US Environmental Protection Agency (EPA). Each program the District administers follows guidelines to ensure projects using this funding provide the expected emission reductions for each program. In the last five years, the District has administered the following incentive programs:

- Carl Moyer Memorial Air Quality Standards Attainment Program (Carl Moyer Program and Moyer State Reserve Program)
- Community Air Protection Program (AB 617 CAPP)
- Funding Agricultural Replacement Measures for Emission Reductions (FARMER)
- Voluntary NOx Remediation Measure Program
- AB 2766 DMV Funding
- Goods Movement Emission Reduction Program (GMERP)

Along with these District-run programs, residents of San Diego can also participate directly in state incentive programs such as Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP), the Clean Off-Road Equipment Voucher Incentive Project (CORE), and programs for passenger vehicles like the Clean Vehicle Rebate Program and the Clean Vehicle Assistance Program. San Diego Gas and Electric also provides incentive funding for electric vehicle charging through their Power Your Drive program for passenger cars and medium and heavy-duty vehicles.

Community Air Protection Program

The District and state programs mentioned above provide opportunity for newer cleaner vehicles and equipment throughout San Diego County. While businesses and agencies in the Portside Environmental Justice Communities can and have participated in these programs, the Community Air Protection Program (CAPP) is focused on ensuring that incentive funding is available and spent on projects that directly benefit residents of state-designated disadvantaged communities. In the first year of the CAPP program (2019), San Diego awarded $2.1 million to four contractors for 14 projects in or adjacent to Portside. In 2020, the District has approximately $18 million available for projects in Portside. To date the District is contracting up to $11.2 million of that funding for projects in or adjacent to the Portside community and anticipates a second solicitation for projects to occur before the end of 2020. Projects funded with CAPP will reduce emissions from port equipment, trucks, construction equipment, and harbor craft.
Incentive Program Challenges

While the CAPP and other incentive programs are available for projects in the Portside communities, these programs have limitations that restrict the kinds of projects that can be done. The creation of this CERP allows the District to work with the community and CARB to determine what, if any, additional flexibilities can be introduced to the CAPP. The action below outlines some of the potential flexibilities the community has considered to allow a greater variety of projects to be funded with CAPP funds.

**Action: Create Additional Flexibility for Mobile Source Incentives**

<table>
<thead>
<tr>
<th>Course of Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Work with CARB to increase flexibility to provide funding for other projects in Portside community.</td>
</tr>
</tbody>
</table>

Potential flexibilities include:

- Modified cost-effectiveness limits for zero-emission Moyer-type projects
- Eligibility for new purchase without scrappage requirements
- Provide mechanism for funding pilot projects to demonstrate new technologies
- Eligibility for projects to reduce exposure including indoor air filtration, tree and vegetation plantings
- Eligibility for projects that reduce emission from passenger car use, including incentives for zero and near-zero emission vehicles, transit passes, bicycle, and pedestrian projects, and others.

**Strategies:**

- Incentives
- Public Information and Outreach
- Collaboration

**Goal(s):**

- Create two opportunities for non-Moyer type incentive projects by 2023

**Estimated Timeline(s):**

- Work with community and CARB to evaluate and prioritize initial slate of flexibilities by December 31, 2021.
- Implement initial flexibilities by the 2022 solicitation for AB 617 funding.

**Implementing Agency, Organization, Business or Other Entity**

<table>

---|---
Community Steering Committee (CSC) Members | Work with APCD and other local entities to provide community priorities for additional incentive flexibilities

**Additional Information:**
- Moyer Guidelines - [https://ww3.arb.ca.gov/msprog/moyer/guidelines/current.htm](https://ww3.arb.ca.gov/msprog/moyer/guidelines/current.htm)

**Incentives for Passenger Vehicles and Transportation Demand Management Strategies**

Because passenger vehicles also make up a large portion of our overall air pollution burden, strategies that can encourage cleaner vehicles (including zero-emission vehicles) and reducing the number of miles driven are an important consideration in this CERP. The action discussed below outlines a suite of potential passenger vehicle strategies that can help reduce pollution from this sector in the Portside communities.

**Action: Reduce Emissions from Passenger Vehicles**

**Course of Action**
- Implement incentive program for zero and near-zero vehicles for low income residents in disadvantaged communities (Clean Cars 4 All or similar)
- Implement EV charging infrastructure incentive program (CALeVIP)
- Coordinate with other jurisdictions and agencies to support improvements to pedestrian, bicycle, and transit infrastructure

**Strategies:**
- Incentives
- Public information and outreach
- Collaboration

**Goal(s):**
- CALeVIP incentives available in late 2020
- Clean Cars 4 All or similar in 2021
- Provide letters of support from APCD and community to leverage external grant funding opportunities

**Estimated Timeline(s):**
- CALeVIP open November 2020
- Clean Cars 4 All or similar open in 2021
- Provide letters of support for projects in Portside requesting funding in 2021 and beyond

**Rule Development Strategies**

The District develops local rules and regulations to improve air quality and protect the health and welfare of San Diego County residents and the environment. The District is considering evaluating the following rules to identify potential measures to reduce emissions and further protect public health.

- **Evaluate District Rule 1206 to potentially regulate residential structures between 1-4 dwelling units.**

  Asbestos is a naturally occurring mineral fiber that is resistant to heat and fire and has been used extensively in building construction materials such as sprayed-on surface materials, pipe insulation, resilient floor tiles, and roofing materials. If not properly controlled, asbestos fibers can be released into the air when asbestos-containing materials are disturbed during building demolition or renovation activities. Inhalation of the airborne asbestos fibers can cause serious health problems including chronic lung disease and cancer. In fact, there is no known safe level of exposure to asbestos.

  Asbestos is federally regulated through the National Emissions Standards for Hazardous Air Pollutants (NESHAP) and locally regulated under Rule 1206 (Asbestos Removal, Renovation, and Demolition). Pursuant to the NESHAP and Rule 1206, building materials that are suspected to contain asbestos must be sampled and laboratory tested prior to renovation or demolition activities. Laboratory testing is required because the presence of asbestos cannot be detected visually by the unaided eye and it may be excluded from safety data sheets under certain conditions. If identified, regulated asbestos-containing materials must be removed under controlled conditions prior to renovation or demolition activities so that asbestos fibers are not released into the air.

  Federal and local rules only regulate residential structures with more than 4 dwelling units. However, since there is no known safe level of asbestos exposure, regulating all residential structures (including 1-4 dwelling units) under Rule 1206 would provide an increased level of protection to the public. Approximately 80 percent of residential structures in San Diego County have 1-4 dwelling units, which is currently exempted under Rule 1206. Additionally, approximately 50 percent of these structures were built before 1980, which increases the probability of the presence of asbestos.

  The District’s asbestos program is essential to protect public health and enhance the quality of the environment by reducing exposure to hazardous air pollutant emissions. This program is even more critical in communities with older buildings and structures that have a higher probability of containing asbestos materials.

- **Evaluate District Rule 1210 to potentially reduce toxic air contaminants**

  The California Air Toxics "Hot Spots” Information and Assessment Act (AB 2588) was enacted by the Legislature in 1987 and requires facilities to quantify emissions of toxic air contaminants, conduct a public health risk assessment for emissions of concern, notify the
affected public if there is an elevated risk, and reduce significant health risks to acceptable levels. The District is the implementing agency for San Diego County and is required to publish an annual report summarizing program efforts and results. Rule 1210 (Toxic Air Contaminant Public Health Risks - Public Notification and Risk Reduction) governs the public notification and risk reduction aspects of the program.

Rule 1210 requires facilities whose public health risk assessment shows potential risks above that level to implement a risk reduction plan to reduce those risks below the significance level within five years. The current cancer risk reduction level is 100 in one million, meaning that if one million people were exposed to a facility’s emissions, 100 of those persons might develop cancer due to the facility’s emissions.

Evaluating District Rule 1210 to potentially lower the threshold at which stationary sources must reduce the cancer risk would decrease the health risk from regulated sources impacting surrounding communities.

- Evaluate existing rules and the adoption of new rules that can benefit the communities.

The District regulates emissions from various stationary sources within the county, including volatile organic compounds (VOC) emissions, which contribute to the formation of ozone in the air we breathe. When inhaled, ozone can damage the lungs and cause chest pain, coughing, shortness of breath and throat irritation. Ozone may also worsen chronic respiratory diseases such as asthma and compromise the ability of the body to fight respiratory infections. The District also regulates particulate matter emissions, which is an air pollutant that is a concern for people's health when levels in air are high. Particulate matter are small particles in the air that reduce visibility and cause the air to appear hazy when levels are elevated. Particulates can penetrate deep into the lungs and blood streams unfiltered, causing heart attacks, respiratory disease, and premature death.

To further protect public health, the District is considering the following:

- Evaluating District Rule 61.2 (Transfer of Organic Compounds into Mobile Transport Tanks) to potentially reduce VOC emissions from the transfer of organic compounds into mobile transport tanks.
- Evaluating District Rule 67.0.1 (Architectural Coatings) to potentially reduce VOC emissions from the application of coatings to stationary structures.
- Evaluating District Rule 67.18 (Marine Coating Operations) to potentially reduce VOC emissions from the application of coatings to marine vessels.
- Evaluate the feasibility of adopting a rule for commercial charbroiling and deep-frying operations to identify potential measures to reduce PM and VOC emissions from these sources.
- Evaluate the feasibility of adopting a new rule to control emissions from indirect sources (any facility, building, structure, or installation, or combination thereof) that generates or attracts mobile source activity which results in emissions of any pollutant (or precursor). An indirect source rule links air quality to decisions about how to build and provides an incentive for developers to consider ways to make
their projects more energy efficient, more walkable and bikeable, and in the end, more livable and healthy for the entire community.

- **Evaluate District Rule 1401 to revise Title V thresholds**

Under federal law, stationary sources that are considered *Major Sources* of emissions must apply for and obtain a federally enforceable permit known as a Title V Operating Permit. A Title V Permit will include conditions required to demonstrate compliance with all applicable rules and regulations, and may include enhanced monitoring, recordkeeping and reporting requirements compared to a non-Title V permit. District Rule 1401 (Title V Operating Permits - General Provisions) specifies the thresholds when a stationary source is considered a *Major Source* for Title V purposes. The US Environmental Protection Agency reclassified the District’s ozone non-attainment status, and as a result, Rule 1401 will need to be amended to lower the threshold at which facilities must apply for and obtain a Title V Operating Permit.

These strategies are further discussed in the tables below.

<table>

**Action: Evaluate District Rule 1210 to Potentially Reduce Health Risks**

**Course of Action**

- Evaluate District Rule 1210 (Toxic Air Contaminant Public Health Risks - Public Notification and Risk Reduction) to potentially lower the threshold at which stationary sources must reduce the cancer risk that impact surrounding communities.
- Work with stakeholders to discuss various options, the impacts each option will have on stationary sources, and the benefits to the surrounding communities.

**Strategies:**

- Rules and Regulations
- Public Information and Outreach

**Goal(s):**

- Evaluate the feasibility of reducing cancer risk impacting communities.
  - Some sources that would be subject to a cancer risk reduction are either within the Portside Community or in close proximity to it.
  - This strategy could reduce the cancer risk impacting surrounding communities.

**Estimated Timeline(s):**

- By October 2021 propose District Rule 1210 amendments to the Air Pollution Control Board.
### San Diego County Air Pollution Control District (APCD)
- Evaluate and develop options for reducing cancer risk
- Develop proposed amended rule

### Community Steering Committee (CSC) Members
- Participate in APCD rule development process (e.g., attending workshops, providing comments on draft rule materials)

### Regulated Facilities
- Participate in APCD rule development process (e.g., attending workshops, providing comments on draft rule materials)

### Action: Evaluating Existing Rules and Considering New Rules

#### Course of Action
- Evaluate the feasibility of amending District Rule 61.2 (Transfer of Organic Compounds into Mobile Transport Tanks), Rule 67.0.1 (Architectural Coatings) and District Rule 67.18 (Marine Coating Operations) to identify potential measures to reduce emissions from sources regulated under these rules.
- Evaluate the feasibility of adopting a new rule to control emissions from commercial cooking operations for charbroiling and deep-frying operations.
- Evaluate the feasibility of adopting a new rule to control emissions from indirect sources (any facility, building, structure, or installation, or combination thereof) that generates or attracts mobile source activity which results in emissions of any pollutant (or precursor).

#### Strategies:
- Rules and Regulations
- Public Information and Outreach

#### Goal(s):
- Evaluate the feasibility of amending rules 61.2, 67.18, and 67.0.1 to identify potential measures to reduce emissions from sources regulated by these rules.
- Evaluate the feasibility of adopting a new rule for commercial charbroiling and deep-frying operations to identify potential measures to reduce emissions from these sources.
- Evaluate the feasibility of adopting a new rule to control emissions from indirect sources.
**Estimated Timeline(s):**

- By December 2021 complete the evaluation of these rules to identify any potential changes to reduce emissions from sources regulated by these rules.

### Action: Propose the amendment of District Rule 1401

#### Course of Action
- Propose the amendment of District Rule 1401 (Title V Operating Permits - General Provisions) to lower the threshold at which facilities must apply for and obtain a Federal Title V Operating Permit.
  - Title V Permits are required of Major Sources of air pollution (some of which are located in the Portside community) and may include enhanced monitoring, record-keeping, and reporting requirements.

#### Strategies:
- Rules and Regulations
- Public Information and Outreach

#### Goal(s):
- Propose the amendment of District Rule 1401

#### Estimated Timeline(s):
- By March of 2021 propose amendments to District Rule 1401 to the District’s Board

Enforcement Actions/Strategies

In addition to the ongoing enforcement efforts described in the enforcement chapter of this plan, the District is proposing five enforcement strategies which were developed to:

1. Foster environmental justice in disadvantaged communities and minimize the environmental harm and impact on areas where a violation occurred.
2. Increase compliance rates.
3. Promote community engagement and enhance services provided by the District’s Enforcement Division.

- **Foster environmental justice in disadvantaged communities and minimize the environmental harm and impact on areas where a violation occurred.**

The District is proposing to formalize its Supplemental Environmental Project (SEP) program. Enforcement through penalties plays an important role in deterring environmental violations, but penalties alone do not address the environmental harm that communities suffer because of these violations. SEPs are community-based projects funded by a portion of penalties received during the District’s settlement of violations. SEPs provide an opportunity to improve public health, reduce pollution, increase environmental compliance, and raise public awareness to communities most burdened by environmental harm.

- **Increasing compliance rates.**

The Mobile Source Program has been an integral part of emission reduction strategies for the Portside community given the large percentage of emissions coming from mobile sources. The community has expressed concerns over excess emissions from idling and the level of diesel particulate matter in the community. CARB and the District have worked together in the past to create a first of its kind enforcement program for mobile sources at the District level. The District has had great success in increasing compliance rates for the regulations it currently enforces through the Memorandum of Understanding (MOU) with CARB. To continue this effort, the District is proposing to expand its mobile source program to enforce additional regulations that reduce diesel particulate matter (PM) and oxides of nitrogen (NOx). Localized enforcement of these additional regulations will help reduce excess ozone forming pollution as well as diesel particulate matter.

The District is also proposing to incorporate a portable combustion emissions analyzer (Testo 350) into its inspection procedure to verify compliance with emission limits more frequently. Certain fuel-fired emission units, such as boilers and engines, are subject to emission limits and are typically required to conduct and pass a source test annually to quantify the actual emissions from these units. The proposed portable analyzers would allow inspectors to verify compliance with emission limits (equivalent to a smog check) during unannounced routine inspections, increasing the frequency of emission testing from annually to multiple times per year. This analyzer would help identify potential emission exceedances sooner and require facilities to make the necessary adjustments or repairs to return emissions to compliant levels.
• **Promote community engagement and enhance services provided by the District’s Enforcement Division.**

The District is proposing to have an office in the Portside area to further increase its presence in the community, decrease complaint response times, and have multiple inspectors traveling in and out of the community observing nearby activities and closely monitoring areas of concern.

The District is also proposing to evaluate its complaint program (in accordance with the requirements in AB423) and provide a recommended plan for updating the process including:

- 24-hour hotline
- Response to complaints within 48 hours or less
- Whistle-blower and public complainant protections

Currently District inspectors are only available during regular working hours unless an investigation is needed afterhours. The District currently has a MOU with the County’s Department of Environmental Health to have their inspectors respond to afterhours complaints. Under this proposal the District would evaluate the need of having its inspectors available 24/7.

The enforcement-based strategies identified in the tables shown below align with the District’s commitment to continuing to expand and evolve its enforcement program to foster environmental justice and community engagement.

### Action: Propose the Development of a Supplemental Environmental Project (SEP) Program within the Violation Settlement Program

<table>
<thead>
<tr>
<th>Course of Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Formalize a SEP program to fund community-based projects from a portion of penalties received under the District’s Violation Settlement Program by:</strong></td>
</tr>
<tr>
<td>• Developing a SEP policy, which would include the appropriate criteria to qualify for these projects.</td>
</tr>
<tr>
<td>• Publishing the SEP policy and projects proposed by community members and stakeholders on the District’s website.</td>
</tr>
<tr>
<td>• Discussing SEP options through the District’s Violation Settlement Program.</td>
</tr>
</tbody>
</table>

**Strategies:**

- Enforcement
- Community Outreach

**Goals:**
- Explore projects to minimize the environmental harm and impact on communities.
- Focus enforcement efforts to help foster environmental justice in disadvantaged communities.
- Utilize a portion of penalties to fund community-based projects that provide a tangible environmental or public health benefit to the community.

### Estimated Timeline(s):
- By July 1, 2021 the District will formalize its SEP program.

### Implementing Agency, Organization, Business or Other Entity

US Environmental Protection Agency (EPA’s) SEP Policy and Background Guidance: [https://www.epa.gov/enforcement/supplemental-environmental-projects-seps#policy](https://www.epa.gov/enforcement/supplemental-environmental-projects-seps#policy)

The California Air Resources Board (CARB) SEP Policy: [https://ww2.arb.ca.gov/our-work/programs/supplemental-environmental-projects-seps/about](https://ww2.arb.ca.gov/our-work/programs/supplemental-environmental-projects-seps/about)
### Action: Evaluate the Feasibility of Expanding Mobile Source Enforcement Program

#### Course of Action
- Work with the California Air Resources Board (CARB) to evaluate the feasibility of obtaining authority to enforce additional mobile source regulations including:
  - **Marine:**
    - Commercial Harbor Craft Regulation
  - **On-Road and Cargo Handling:**
    - Mobile Cargo Handling Equipment Regulation
    - Solid Waste Collection Vehicle Regulation
    - Tractor-Trailer Greenhouse Gas (TTGHG) Regulation

#### Strategies:
- Enforcement
- Outreach

#### Goal(s):
- Increase number of inspections in San Diego County and increase compliance rates as they relate to these regulations that are designed to:
  - Reduce diesel particulate matter (PM) and oxides of nitrogen (NOx) from ocean-going vessels auxiliary engines while they are docked at California ports.
  - Reduce diesel particulate matter (PM) and oxides of nitrogen (NOx) from commercial harbor craft vessels including ferries, excursion vessels, tugboats, towboats, push boats, crew and supply vessels, barge and dredge vessels, work boats, pilot vessels, and commercial and charter fishing boats.
  - Reduce diesel particulate matter (PM) and oxides of nitrogen (NOx) from cargo handling equipment at ports and intermodal rail yards.
  - Reduce diesel particulate matter (PM) from solid waste collection vehicles and on-road diesel cranes with a single engine.
  - Reduce Greenhouse Gas (GHG) emissions from on-road heavy-duty tractor-trailers.

#### Estimated Timeline(s):
- By December 1, 2021, determine feasibility of expanding the mobile source program to enforce additional mobile source regulations under the Memorandum of Understanding (MOU) with CARB.

### Implementing Agency, Organization, Business or Other Entity

### Action: Evaluate the Feasibility of Utilizing Portable Emission Analyzers to Verify Compliance

#### Course of Action
- Evaluate the feasibility of utilizing Testo 350 portable emissions analyzers to enforce District requirements as they relate to combustion sources.

#### Strategies:
- Enforcement

#### Goals:
- Use Testo 350 portable emissions analyzers to verify emission standards for combustion sources (boilers and prime engines).
- Enforce emission standards.
- Identify areas of concerns to prevent future non-compliance.
- Provide information to facilities that combustion equipment requires adjustment, repair, or replacement.
- Conduct more focused inspections.

#### Estimated Timeline:
- By December 1, 2020 reach out to impacted sources to obtain input.
- By July 1, 2021 consider input from the regulated entities and determine if the analyzer can be used for enforcement purposes.

#### Implementing Agency, Organization, Business or Other Entity

**Heavy Duty Truck Strategies**

The CERP steering committee created subcommittees to discuss and establish specific actions to reduce emissions from various sources within the Portside community. A subcommittee was formed to focus on the technological and institutional challenges to electrification of heavy-duty truck fleet, specifically trucks that serve the port’s cargo terminals. Trucks serving port activities traverse the Portside communities, exposing residents to diesel emissions.

Below are some of the actions EPA and CARB have committed to take to reduce truck emissions statewide.

<table>
<thead>
<tr>
<th>Agency</th>
<th>Upcoming Action</th>
<th>Expected Decision</th>
<th>Expected Phase-in Period</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>EPA</strong></td>
<td>Cleaner Truck Initiative – In response to a petition from South Coast AQMD, EPA has committee to updating its truck engine standard to reduce NOx emissions.</td>
<td>2020-2021</td>
<td>2024</td>
</tr>
<tr>
<td><strong>CARB</strong></td>
<td>Transport Refrigeration Unit Regulation – Measure to reduce residual risk from TRUs by transitioning to zero-emission technologies.</td>
<td>2019</td>
<td>2025-2030</td>
</tr>
<tr>
<td><strong>CARB</strong></td>
<td>Drayage Truck Rule – Updated regulation to transition to zero-emission trucks</td>
<td>2022</td>
<td>2026</td>
</tr>
<tr>
<td><strong>CARB</strong></td>
<td>Advanced Clean Truck Rule – Requires truck manufacturers to sell an increasing percentage of zero-emission trucks by 2030 (up to 15% or 50%, depending on truck type). Also will require on-time fleet reporting for large businesses</td>
<td>2020</td>
<td>2024-2030</td>
</tr>
<tr>
<td><strong>CARB</strong></td>
<td>Zero-Emission Fleet Rule – Would require fleets to transition to zero-emissions</td>
<td>2022</td>
<td>2024</td>
</tr>
<tr>
<td><strong>CARB</strong></td>
<td>Heavy-Duty Low NOx Rule – Would set new statewide engine standards for NOx reduction from trucks by 2026, and additional reductions including and after 2027.</td>
<td>2020</td>
<td>2024</td>
</tr>
</tbody>
</table>
While CARB and APCD have taken many actions to reduce truck pollution through regulation, enforcement, and incentive programs, Portside residents are still disproportionately affected by trucks in their neighborhoods. As activity at the Port increases in coming years, these impacts could be greater without concerted action.

The CERP Trucks Subcommittee met weekly from May 22 through July 31, 2020 to develop a set of strategies to reduce truck emissions and exposure to those emissions in the Portside communities. The committee recognizes that trucks play a vital role in the movement of goods in Portside and other communities, and truck drivers and businesses should have opportunities to transition to clean technologies and minimize impacts on neighborhoods. The subcommittee identified actions to support electric trucks and charging infrastructure, support dedicated truck route(s) in the community to minimize exposure to at-risk populations, provide for the needs of truck drivers and businesses that rely on them, ensure fair outcomes for truck drivers with regard to incentives and promote enforcement of mobile source air quality rules.

<table>
<thead>
<tr>
<th>Action: Advance the deployment of heavy-duty on-road electric trucks to demonstrate operational feasibility and reduce emissions within the Portside Community and other disadvantaged communities.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strategies and Course of Action</td>
</tr>
<tr>
<td>- Develop and implement a Short-haul on-road electric truck pilot program to/from Port tidelands for one or more routes.</td>
</tr>
<tr>
<td>- Develop EV Truck charging needs assessment and strategy to support EV Truck expansion beyond above pilot. Install charging facilities to support deployment of on-road electric trucks (include DC Fast charging and wireless).</td>
</tr>
<tr>
<td>- Implement a Community (Off Port) Operators Mitigation Strategy to coordinate with other operators for their transition to ZEVs, infrastructure, truck routes and truck operations.</td>
</tr>
<tr>
<td>- Pursue all grant funding opportunities.</td>
</tr>
<tr>
<td>- Explore implementing a truck fee or surcharge for non-ZEV trucks calling to the Port’s marine terminals to promote zero and near-zero emission trucks, as part of an exhaust emissions reduction program.</td>
</tr>
<tr>
<td>- As City of San Diego and National City acquire ZE Trucks, encourage the Cities to prioritize utilizing them in the Portside Community.</td>
</tr>
<tr>
<td>- As City of San Diego and National City acquire ZE light duty vehicles, encourage the Cities to prioritize utilizing them in the Portside Community.</td>
</tr>
<tr>
<td>Goals:</td>
</tr>
<tr>
<td>- Develop a short-haul on-road electric truck pilot program that seeks to displace between 3,000 and 10,000 diesel vehicle miles traveled (VMT) annually or more, and yields the corresponding emission reduction benefits, during pilot program implementation.</td>
</tr>
<tr>
<td>- Install EV charging in conjunction with the above pilot(s).</td>
</tr>
<tr>
<td>- Seek to implement the pilot program for a period between one and two years.</td>
</tr>
</tbody>
</table>
• Include an evaluation component in the pilot program that (1) identifies lessons learned and (2) recommends actions to accelerate the implementation of electric trucks to/from Port tidelands.
• Identify a process to introduce this strategy to the Cities with staff from San Diego Gas and Electric (SDG&E), San Diego Association of Governments (SANDAG), ACCELERATE TO ZERO EMISSIONS etc.
• Develop EV Strategy for region including opportunities in Portside communities.
• Incorporate SANDAG’s EV Management Strategies (currently in development).
• Develop process to obtain necessary permits to make sure all of the cities are EV ready (e.g., State of CA Go-BIZ may have resources).
• Work with Barrio Logan CPG and other stakeholders to establish working group to identify businesses (including private waste hauling services), and companies within the Portside Community that can pilot EV truck routes.
• Target funding between 85% and 90% of all heavy-duty on-road electric truck projects and studies with outside grant support.

**Targeted Timeline(s):**

- Develop a short-haul electric truck pilot program and seek to secure environmental approvals and entitlements within an 18 to 24-month period.
- Develop EV Needs Assessment by end of Q1 2021.
- Identify a minimum of three candidates within the Portside Community to deploy an EV delivery program in 2022.
- Prepare a market study/feasibility analysis for the Port of San Diego’s Board of Port Commissioners consideration by the end of 2023, that explores potential fees and implications to the District’s revenue and maritime business opportunities.
- Obtain commitment from San Diego and National City in 2022 that prioritizes deploying ZE Medium Duty and Heavy-Duty Trucks, including ZE Garbage Trucks, within the Portside Community.
- Obtain commitment from San Diego and National City in 2022 that prioritizes deploying ZE Light Duty vehicles within the Portside Community.

**Implementing Agency, Organization, Business or Other Entity**

</tr>
</tbody>
</table>
San Diego County Air Pollution Control District (APCD)  
Target funding of 85-90% of all heavy-duty on-road electric truck projects with outside (federal, state, or local) grant support.

San Diego Gas and Electric (SDG&E)  
Develop process to obtain necessary permits to make sure all of the cities are EV ready (e.g., State of CA Go-BIZ may have resources

Port District  
Develop electric truck pilot program, secure environmental approvals, install EV charging stations, implement pilot program for 1 to 2 years. Prepare feasibility analysis for the Board of Port Commissioners by 2023 that explores potential fees and implications to the District’s revenue and maritime business opportunities.

Additional Information:  
N/A

**Action: Support dedicated truck route and avoid truck impacts to local community**

**Strategies and Course of Action**
- Implement robust stakeholder outreach and educational component.
- Improve street truck signage regarding designated truck route.
- Implement Harbor Drive 2.0 Improvements (consider incorporating wireless charging technology in this concept).
- Reinstitute aggressive enforcement of designated Truck Haul route and keep the Barrio Logan CPG updated on enforcement efforts.

**Goals:**
- In 2021 - 50% Operations within Portside Community (warehouses, storefronts, small restaurants, etc.) will be notified of designated truck route in the first year.
- Ensure concept gets included in the San Diego Association of Governments (SANDAG’s) South Bay to Sorrento Comprehensive Multimodal Corridor Plan (CMCP) and consider for inclusion in the San Diego Forward: 2021 Regional Plan.
- Target environmental approvals for the infrastructure improvements identified in the Harbor Drive 2.0 project and related infrastructure improvements identified in the South Bay to Sorrento CMCP by 2024/2025.
- Continue the Barrio Logan Truck Route Enforcement Task Force, that was established and implemented by the San Diego Police Department in October 2019 and continued through March 2020.
- Update the Barrio Logan CPG on # of truck stops, # of tickets, and # of warnings on a monthly basis.
• Ensure adequate funding for enforcement, such as Supplemental Environmental Projects (SEP) funding.

Targeted Timeline(s):
• In 2021 – 85% of Port tenants and assoc. trucking companies will be provided training info.
• By the end of 2021, present a plan to the City of San Diego and California Department of Transportation (CALTRANS) for consideration, that identifies upgrades to existing street signage and locations to install new street signage informing truck drivers of the designated truck haul route.
• Target installation of new signs in calendar year 2022 by the City of San Diego and CALTRANS.
• By 2023/2024, develop a concept of operations for the intelligent transportation system (ITS) technologies in the Harbor Drive 2.0 project and related ITS systems identified in the South Bay to Sorrento CMCP, focusing on implementing freight signal priority, gate operating system, truck reservation system, and/or geofencing.

### Implementing Agency, Organization, Business or Other Entity

</table>
Land Use Strategies

The CERP steering committee created subcommittees to discuss and establish specific actions to reduce emissions from various sources within the Portside community. The Land Use Subcommittee was formed to focus on a series of strategies to reduce exposure to toxic air contaminants in the Portside Communities. The Subcommittee reviewed over 125 proposals and identified those strategies with the highest priority for the stakeholders (Phase 1), as well as additional strategies (Phase 2) which would continue to be developed to further these goals. The subcommittee identified strategies which would provide for reduced exposure through improved community planning, transportation planning, development of additional community green space, indoor air filtration, enforcement of truck regulations, as well as further study of health inequities in the communities.

Some of the strategies call for the development and adoption of community plan documents which provide for increased separation between sensitive receptors and sources of toxic air contaminants (TACs), as well as additional green space in the communities. Additional physical separation between sensitive receptors and sources of TACs can reduce the community exposure and associated health risks from those TACs. Additional green space in the community can provide physical separation, as well as provide important recreational opportunities for community residents.

The strategies also call for the development of grant programs to provide air filtration to residents within 500 feet of the Port, freeways, or industrial land uses, as well as the development of vegetative buffers along freeways. In order to reduce exposure in local public schools, the strategies call for the installation of air filtration systems, and increased use of electric school buses.

Further study and documentation of health inequities in the Portside communities is also an identified strategy from the Subcommittee. The strategies call for the completion of health equity assessments for Portside communities in order to inform CERP health outcomes, as well as a transportation and health equity study of all mobility project strategies in CERP. These studies will assist with information needed for several Phase 2 strategies to provide relief to local communities by supporting neighborhood resiliency and housing stability for AB617 neighborhoods as a health/racial/environmental justice cross agency goal.
Finally, transportation planning is also an important strategy in reducing the exposure to air pollution. Traffic congestion and idling, especially from diesel vehicles, can result in increased pollution in communities. As a result, the Subcommittee identified a priority project related to grade separation of the local trolley network in order to reduce freight, truck, and vehicle impacts and emissions on Portside communities, while reducing traffic congestion from the working waterfront by improving transportation efficiencies. Several Phase 2 strategies related to transportation planning have also been suggested.

### Action: Buffer Zones/Increased Setbacks in Portside Community

**Course of Action**

- Provide Steering Committee support for Barrio Logan Community Plan (“BLCP”) Update with proposed transition zone that proposes separation of land uses & increased setback for specific source types.
- Coordinate air quality policies and goals in BLCP Update.
- Support adoption of the Port of SD Maritime Clean Air Strategy (“MCAS”).
- Support Balanced Plan adoption that will ensure implementation of open space expansion for Pepper Park in National City.

**Phase 2:**

- Support for Westside Specific Plan amortization strategy (WSP LU strategy #’s 3.4 & 3.5).
- Collaborate with National City to finalize the development of the mechanism for industrial use expansion permits in conjunction with Strategy #5 (WSP strategy #3.6).
- Support the development of a truck route(s) or ordinance in National City.

**Strategies:**

- Public information and outreach
- Collaboration
- Planning

**Goals:**

**BLCP Update**

- Adoption of the New Barrio Logan Community Plan with a transition zone as a buffer.
- Confirm air quality policies and goals in New BLCP are coordinated with APCD permits to ensure where APCD permits would be required.
- Obtain support from Barrio Logan Community Planning Group for MCAS adoption.

**Pepper Park Expansion**

- Adoption of the Balanced Plan with 2.54 acre expansion.
- Set goals for the completion of Pepper Park expansion of open space.

**Phase 2:**

- Set amortization implementation & timeline goals.
- Obtain commitment from National City by First Quarter 2021.

Action: Reduce exposures for sensitive receptors within 500 feet of Port, freeways, and industries

Course of Action
- Develop indoor air filtration program for existing residential uses and other sensitive receptors. (By subcommittee)
- Support community request for Caltrans to develop buffers (vegetative/walls) along I-5 where possible. (By subcommittee)
- Pursue all grant funding opportunities.

Phase 2:
- Support new policies for requiring all new housing & other sensitive receptors (like daycares, health & medical facilities) install landscape buffers & indoor air filtration systems. (By subcommittee)
Goal(s)/Timeline:

Indoor Air Filtration Program:
- Establish indoor air filtration program in collaboration with Port of SD, City of SD, National City, Navy & EHC.
- Installation of X number of indoor air filtration by 2022 through 2025?

Vegetative buffers
- Prepare a feasibility study in 2022 to identify locations where strategy can be implemented.
- Set goals for project construction.

Phase 2- New policies for new sensitive land uses:
- Obtain commitment by San Diego to integrate policy in BLCP Update by first quarter 2021;
- Obtain commitment by National City to integrate policy in WSP by first quarter 2021.

Estimated Timeline:
N/A

Implementing Agency, Organization, Business or Other Entity

Action: Urban Greening
Course of Action
- Support National City Pepper Park Expansion (additional 2.54 AC of open space, Balanced Plan).
- Pursue all grant funding opportunities.

Phase 2:
- Support the development of New Urban Green Spaces in National City such as Urban Mini-parks with community gardens. (By subcommittee)
- Support the proposal for Boston Avenue Linear Park creating a new Urban Green space along I-5 and Boston Ave. in San Diego. (By subcommittee)
- Support the proposal for urban greening along Cesar Chavez parkway between 25th St. and Cesar Chavez Park to encourage outdoor activity, walking, and increase pedestrian access to Cesar Chavez Park. (HDMCS project #67)

### Action: Neighborhood Resiliency & Housing Stability

**Course of Action**

- San Diego County Air Pollution Control District (APCD) and County of San Diego Health and Human Services Agency (HHSA) – Produce health equity assessments for Portside communities in order to inform CERP health outcomes.
- Propose San Diego Association of Governments (SANDAG) develop transportation and health equity study of all mobility project strategies in CERP
- Coordinate and implement assessments with SANDAG’s Public Health Working Group.
- Leverage SANDAG’s Healthy Communities Atlas.
- Pursue all grant funding opportunities (such as: Caltrans EJ Planning Grant, other planning grants, or grants for public health).

**Phase 2:**

- Support the development of polices to require a minimum of 25% of new affordable housing units be designated affordable in AB617 area.

**Strategies:**

- Collaboration
- Research
- Public Outreach
- Grants

**Goal(s)/Timelines:**

- Perform health assessment in 2021 to establish existing conditions and health equity metrics and coordinate public workshops.
- Perform health assessment update in 2025.
- Work with SANDAG to develop transportation & health equity study in 2022.

**Phase 2:**

- Establish working group with the City of San Diego and National City to align CERP goals with Climate Action Plans, TOD’s and affordable housing to identify goals and opportunities for leveraging funding for residential charging infrastructure and ZEV support, solar panel installations, restorative landscape, and indoor air filtration or other similar goals for healthy environment.
- Obtain commitment from City of San Diego by First Quarter 2021.

### Action: Improve Transportation Efficiencies

#### Course of Action

1. Prioritize implementation of Blue line trolley grade separation at 28th St and/or 32nd St (SANDAG MMAS project L-83, & HDMCS project #62 & project #22)  
   VERY HIGH PRORITY PROJECT

2. SD/BL – Support adding traffic calming measures along Main Street between Cesar Chavez Parkway and 32nd St. to discourage truck use. (By subcommittee)

3. Pursue freeway ramp removal and relocation of I-5 Southbound onramp from Boston Ave. to 28th St. (HDMCS project #69) VERY HIGH PRORITY PROJECT

4. Boston Ave: Traffic calming improvements including potential bike boulevard between 26th St and 28th St. (HDMCS # 48 – Coordinate w/above HDMCS #69)

5. Boston Ave: Class I bikeway/multi-use path between 29th St and 32nd St. (HDMCS # 49 – Coordinate w/above HDMCS #69)

6. 28th St & National Ave: Reconfiguration of intersection to alleviate queueing issues for WB vehicles. (HDMCS # 26 – Coordinate w/above HDMCS #69)

7. 28th St & Harbor Dr: Enhanced pedestrian facilities to accommodate shipyard demand including widened crosswalks, curb extensions, curb ramps, curb ramps, and potential pedestrian scramble. (HDMCS project #38)

8. 28th St: Reconfiguration to increase capacity and improve access between Main St and National Ave. Initial study assumed 2 NB and 3 SB lanes with raised median. (HDMCS project #46)

9. 8th St & Harbor Dr: Additional and/or extended left-turn pocket to improve access from WB Harbor Drive to Naval Base Gate 9 (8th St). (HCMCS project #31)

10. 8th St & Harbor Dr: Reconfiguration of WB 8th St to allow 3 through lanes Naval Base Gate 9 (8th St). (HCMCS project #32)

11. Civic Center Dr & Harbor Dr: Dual EB left turn lanes to increase capacity for traffic from nearby I-5 SB offramp. (HCMCS project #33)
12. 8th St: Class II bike lanes connecting Harbor Dr, 8th St Trolley/Bus Station and National City communities. Pedestrian upgrades including rail crossing gates and curb ramps. Wayfinding facilities. (HCMCS project #53)

13. 24th St/Bay Marina Dr: Class II bike lanes connecting NCMT, 24th St Transit Center and National City communities. Pedestrian upgrades including rail crossing gates and curb ramps. Wayfinding facilities. (HCMCS project #55)

14. Pepper Park: Bike/pedestrian connections to Pepper Park extension proposed in National City Marina District Balanced Land Use Study (2016). (HDMCS project #19)

15. Bayshore Bikeway, National City: Relocation from Tidelands Ave to Marina Way and McKinley Ave. (HDMCS project #50)

16. NC – Support Bay Marina Drive Active Transportation Connection from east of I-5 to gates on Terminal Ave (SANDAG MMAS project # L-198, December 2018 Workshop NBSD Table)

17. NC – National City wayfinding signage project throughout National City (SANDAG MMAS project # P-32, Port Capital Improvement Program (CIP) (2014))

18. SD/BL - Support Chollas Creek Multi-Use Path from Dorothy Petway Park to Harbor Drive (SANDAG MMAS project # L-142, City of San Diego Capital Improvement Program (CIP GIS Shapefile) (2017))

19. NC – Support 8th Street urban Trail from Harbor Drive to D Ave. (SANDAG MMAS project # L-146, National City Downtown Specific Plan (2017))

| San Diego Association of Governments (SANDAG), Port of San Diego, Naval Base San Diego |  - Identify and advance if both or one location can move forward in SANDAG RTP as priority in 2021.  
  - Prioritize implementation to expedite grade separation project start in 2024. |
| City of San Diego, Port of San Diego, Naval Base San Diego |  - Support SANDAG prioritization of project. |
| For Phase 2 projects: | |
| City of San Diego |  - Review proposed actions 2, 4-8. |
| City of National City |  - Review proposed actions 9-17, 19. |
| California Department of Transportation (CALTRANS) |  - Review proposed action 3. |
| Naval Base San Diego |  - Review proposed action 16, provide support for actions 17-19. |
| Port of San Diego |  - Review proposed action 16, provide support for actions 5-19. |

**Additional Information:**

**Port-Related Activities**

The CERP steering committee created subcommittees to discuss and establish specific actions to reduce emissions from various sources within the Portside community. A subcommittee was formed to focus on key port-related emission sources and strategies to control them beyond current regulatory programs to further reduce health risks. As the fourth largest port in California, with over 500 ship calls per year, the Port of San Diego is primarily a containerized cargo, cruise ship, and automobile import Port. Those ship calls are assisted in their trade by pilot boats for navigation, tugboats for maneuvering, and other harbor craft that provide vessel services. In order to move cargo, marine terminals throughout the Port District service the calling ships with cranes, container-handling equipment, and trucks. Cargo is moved from marine terminals to its final destination with on-road trucks and trains.

The tables below propose strategies that were designed to reduce emissions from port-related activities.

<table>
<thead>
<tr>
<th><strong>Action: Fair Outcome for Small Truck Owners</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Course of Action</strong></td>
</tr>
</tbody>
</table>
| • Ensure regulatory burden of truck replacement and maintenance falls on fleets rather than sublessees/
  • Ensure incentive funding puts burden on entity that will profit from grant funding. |
| **Strategies and Goals** |
| • Support CARB rule requiring larger fleets to transition over time to ZEV. Expected DPM and NOx benefits from draft rule and ISOR when available. |
| • APCD legal counsel is being consulted on language related to requirement to comply with all federal, state, and local labor laws. |

#### Additional Information:

### Action: Reduce DPM and NOx emissions from portable air compressors and other diesel sources at shipyards.

#### Course of Action
- Shipyards to require portable air compressors on site to be powered by ZEV or Tier 4 engines.
- Shipyards will continue ongoing actions to reduce emissions from on and off-road diesel equipment. Actions to reduce emissions may include retirements, replacements (to cleaner fuel or higher engine tier), exhaust retrofits, or electrification.

#### Strategies and Goals
- NASSCO, BAE Systems and HHI will implement policies by May 1, 2021.
- The number and types of action will vary depending on a variety of factors including shipyards specific equipment needs, business cycle, availability of incentives, technical feasibility and availability of zero/low emissions equipment.

#### Timeline(s):
- 2021 for portable air compressors.

<td>Port</td>
<td>Organize Event</td>
</tr>
</tbody>
</table>

**Additional Information:**

### Action: Portside residents get opportunities to learn and provide feedback on CERP strategies, air quality, and land use

**Course of Action**
- Community residents informed re: CERP, Harbor Drive study priorities, other LU priorities.

**Strategies and Goals**

**Timeline(s):**
- One event in the Portside community, or one event in Logan and one in National City, in 2021.
**Action: Reduction in exposure to emissions from waterfront employees, Navy personnel and heavy duty truck parking in the portside community.**

**Additional Information:**

**Course of Action**
- TBD

**Strategies and Goals**
- TBD

**Timeline(s):**
- TBD

---

**Action: Diesel exhaust fume emission reduction**

<table>
<thead>
<tr>
<th>Implementing Agency, Organization, Business or Other Entity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name: TBD</td>
</tr>
</tbody>
</table>

**Additional Information:**

**Course of Action**
- Support Harbor Drive improvements to reduce time trucks are transitioning through neighborhood.
- Create first come first serve diesel to electric port equipment pool.

**Strategies and Goals**
- TBD

**Timeline(s):**
- TBD
### Action: PM 2.5 and NOx Reductions

**Course of Action**
- New State Implementation Plan (SIP) Measures
- Support for a strong RTP with significant reduction in VMT throughout the region
- Support for transit as a funding priority for SANDAG and cities
- Support for early transition to ZE transit buses

**Strategies and Goals**
- Implementation underway

**Timeline(s):**
- TBD

**Implementing Agency, Organization, Business or Other Entity**

</tr>
</tbody>
</table>

**Additional Information:**

---

### Action: Reduce Toxic Emissions

**Course of Action**
- Adopt incompatible land use "phase out" plan like in National City.

**Strategies and Goals**
- TBD

**Timeline(s):**
- TBD

**Implementing Agency, Organization, Business or Other Entity**

<table>
<thead>
<tr>
<th>Name:</th>
<th>Responsibilities:</th>
</tr>
</thead>
<tbody>
<tr>
<td>San Diego County Air Pollution Control District (APCD)</td>
<td>TBD</td>
</tr>
</tbody>
</table>
### Additional Information:

Potentially political difficulty in Barrio Logan, may have to consider an alternative measure of supporting land use planning that separates incompatible land use. Proposed by Joy Williams
