Comments and questions concerning this proposal may be submitted in writing before or made at the webinar, which is scheduled as follows:

DATE: Wednesday, July 21, 2021
TIME: 1:30 p.m. to 3:30 p.m.
HOW TO PARTICIPATE: Via web browser or mobile device at:

Rule 69.2.2 was adopted on July 8, 2020, and applies to existing and new boilers, process heaters, and steam generators (units) with a heat input rating greater than 2 million British thermal units (Btu) per hour to less than 5 million Btu per hour. The current rule requires that by July 1, 2021, manufacturers of any new unit to be offered for sale within San Diego County submit to the District an application to certify that each unit model complies with the provisions of the rule. This includes demonstrating that the unit was tested and complies with the emission standards specified in the rule.

It was recently brought to the District's attention that manufacturers are not able to perform the required emission standard testing on custom units until after these units have been installed. In order to provide flexibility for these types of situations, the District is proposing to amend Rule 69.2.2 to allow manufacturers to submit the application for certification after these new units have been installed and tested.
