INTRODUCTION

Audit Objective The Office of Audits & Advisory Services (OAAS) has completed an officers' transition audit for the Public Safety Group (the Department). The objective of the audit was to determine if there is reasonable assurance that the outgoing officer, Ronald Lane, and incoming officer, Holly Porter, took appropriate actions and filed required reports as of December 27, 2019 in compliance with California Codes, County regulatory requirements, and County policies and procedures. These requirements were explained in the instruction letter provided to each officer.

Background The County Charter, Section 801.1(a), requires that OAAS conduct such an audit when County officers leave or assume office to determine if certain affidavits, authorizations, disclosures, and reports are properly completed and processed. These actions provide for an orderly transition of officers, establish proper accountability for public assets, and promote the County's General Management System (GMS); including its key disciplines of accountability, transparency and ethical conduct, fiscal stability, and continuous improvement and innovation.

Audit Scope & Limitations The reports are the responsibility of the officer who signs them. OAAS' responsibility is to provide an opinion on the reports based upon the audit.

This audit was conducted in conformance with the International Standards for the Professional Practice of Internal Auditing prescribed by the Institute of Internal Auditors as required by California Government Code, Section 1236.

Methodology OAAS reviewed all of the reports filed by the outgoing and incoming officers, obtained supporting documentation, and performed limited internal control testing.

AUDIT RESULTS

Summary In our opinion, there is reasonable assurance that the outgoing and incoming officers took appropriate actions and filed required reports without exception, and in compliance with California Codes, County regulatory requirements, and County policies and procedures in connection with an officer's transition.
