

5 Things to Know About Live Bee Removal

1. Live bee removal is the process of removing live bees humanely without pesticides.
2. Live bee removal specialists are experienced beekeepers who can humanely remove and relocate bees to a registered apiary to ensure they don't return to your property.
3. Property owners are responsible for safely removing bees on their property.
4. Prevent honeybee swarms by removing hollow dead trees and sealing up all openings into attics, crawlspaces, and siding larger than 1/8-inch. All vents should have 1/8-inch screening.
5. **Do not ever try to remove bees yourself or spray them with water or pesticides.** Contact an experienced live bee removal service or licensed pest control business.

To find a live bee removal specialist, visit the San Diego Beekeeping Society:
