Important Reminders & Updates

1. ***Protect Bees:*** BeeWhere allows you to check for the presence of beehives before you write your recommendation. You play an important role in bee protection and are responsible for protecting bees when recommending pesticides. Visit: https://beewhere.calagpermits.org for more information.
2. ***Work within the categories on your license:*** PCAs may only write recommendations for the control of pests corresponding to the categories listed on their licenses.
3. ***It is your responsibility to ensure the site and/or commodity is listed on the pesticide label*** when using pest control adviser software to write recommendations. We have seen instances where software does not evaluate the label correctly. Review the actual label to ensure your recommendation is compliant with all the requirements.
4. ***A licensed Pest Control Adviser (PCA) written recommendation is required:***
   - Anytime pesticides are used on publicly owned land such as parks, golf courses, street medians, etc.
   - When a Pest Control Business applies a Restricted Material at a non-production agricultural site such as a park, golf course, street median, etc.
   - Whenever you make production agricultural recommendations.
5. ***With the passage of Assembly Bill 2380,*** the California Food and Agricultural Code will be amended to allow increases in the maximum annual registration fees. The amendment becomes effective January 1, 2027. As a result, pesticide use registrants may experience fee increases. The County of San Diego Department of Agriculture, Weights and Measures will evaluate potential fee adjustments and conduct stakeholder outreach in spring 2027 prior to considering any proposed changes. Any proposed changes will be presented to the County Board of Supervisors and will be effective July 1, 2027.
