**1. SUBJECT: NOTICED PUBLIC HEARING:
2016 AIR TOXICS “HOT SPOTS” PROGRAM REPORT FOR SAN
DIEGO COUNTY (DISTRICTS: ALL)**

OVERVIEW

The California Air Toxics “Hot Spots” Information and Assessment Act was enacted by the State Legislature in 1987. It requires industrial facilities and other businesses that emit air pollutants to quantify emissions of toxic air contaminants, conduct a public health risk assessment for emissions of concern, and notify the affected public if there is a significant health risk. The San Diego County Air Pollution Control District (District) is the implementing agency for the region and is required to publish an annual report summarizing efforts and results of the Air Toxics “Hot Spots” Program (Program). The District reviews the data submitted by facilities, determines what actions facilities must undertake, and ensures those facilities fully comply with the requirements of the Program.

The 2016 Air Toxics “Hot Spots” Program Report for San Diego County summarizes the program elements and the results from the latest program year, including stationary and mobile source emission estimates, results of local Health Risk Assessments, the current status of public notifications, and presents conclusions drawn from the Program to date.

Today’s requested action is to approve the public distribution of the 2016 Air Toxics “Hot Spots” Program Report for San Diego County.
