

Dear Resident,
Today, our insect detection specialist attempted to contact you.

We have placed insect traps in your yard, as indicated below. We do not enter an enclosed backyard unless we have previously received permission from the resident or owner. However, we sometimes place traps using a 6 foot pole over a fence or wall.

Locations: Front Yard
 Back Yard
 Side Yard

Located in: _____

Traps will be serviced over fence/wall.

We would like to: _____

Traps are serviced weekly/biweekly and removed after 6 weeks.

Gypsy Moth and Japanese Beetle traps are serviced biweekly and removed after 3 months.

When calling regarding insect traps on your property, please use the reference number below.

Department of Agriculture, Weights and Measures

PEST DETECTION PROGRAM

SAFEGUARDING YOUR FOOD SUPPLY

Keep unwanted invasive pests out of San Diego County!

The County of San Diego Department of Agriculture, Weights and Measures maintains a program to locate harmful pests that threaten California agriculture.

Traps are placed in residential, commercial, and park properties to locate infestations of exotic fruit flies, Asian Citrus Psyllid, Japanese Beetle, Gypsy Moth, and other unwanted pests.

Oriental Fruit Fly, Gypsy Moth and Mediterranean Fruit Fly

With your help, we can:

- Prevent damage to fruit, vegetables and landscape ornamentals.
- Reduce pesticide usage.
- Reduce consumer costs for fruits and vegetables.
- Protect the environment.

Thank you for making a difference!

Tell us about our customer service!
858-614-7770

We are always looking for new trapping sites. Help protect agriculture and local gardens by allowing County trappers to place insect traps on your property.

- Ideal fruit fly trapping sites have fruit trees such as apricot, peach, nectarine, citrus, guava or loquat and are at least 5 feet in height.
- Ideal Japanese Beetle and Gypsy Moth trapping sites have roses, turf or landscape ornamental plants.
