Prodagio	Gimmel	Prodagio Case	The Department Housing and Community Development (HCD) require a document management solution for managing Rental Assistance case file documents. The Department of Housing and Community Development (HCD) manages eight different rental assistance programs. Prodagio Case Management is built on Documentum's Webtop client, and thus Prodagio is the case management centric interface used by users when accessing their data. All users accessing content in Documentum have to authenticate by inputting their user names and passwords Prodagio is used in creating and sending out housing letters including but not limited to income verification, employment verification, asset verification, rental letters, etc to assist in the qualification and communication process for low income housing. The generation of letters and reports thru Prodagio is dependent on the data that populates into Prodagio from HCD's Elite Database system. The Prodagio application will be populated with data from Elite via a nightly batch job. However, there may be a need to look at the most recent data during the day as well. In order to do this, a web service (tcp 443 https) call from the Prodagio Documentum doabase content server to the ustlvucsd113 Elite Application Server will be initiated that will give the users the up-to-date information that they need. This parameter will be used to find the entity within Elite. Gather the information for that entity and AS400 database for Tracking prop8 applications, reports and correspondence	Sensitive	Housing and Community Development Services	Daily	Daily
