BLOODBORNE PATHOGENS EXPOSURE CONTROL TRAINING PROGRAM EVALUATION

The Food & Housing Division (FHD) of the Department of Environmental Health (DEH) is the local enforcement agency charged with the implementation of the new California Safe Body Art Act. This new law defines requirements for Bloodborne Pathogens Exposure Control Training, and states that training shall be conducted by a person or persons knowledgeable in exposure control and infection prevention in the body art setting and who are approved by the local enforcement agency. The training program shall be updated when infection control issues, changes in the practice of body art, or new technology warrant modification.

To have your training program reviewed, please complete this evaluation form and submit to this Department along with a brief biography or resume, a copy of your coursework documentation, and a copy of your presentation.

TRAINING EVALUATION

DOES THE TRAINING PROGRAM CONSIST OF AT LEAST **TWO HOURS** OF INSTRUCTION? YES NO

IS TRAINING MATERIAL SPECIFIC TO PERFORMING BODY ART? YES NO

TRAINING INCLUDES ALL OF THE FOLLOWING:

- A copy and explanation of the Cal OSHA Bloodborne Pathogens Standard contained in CCR Section 5193 of Title 8, or its successor
 - A copy and explanation of applicable county/city ordinances that pertain to bloodborne pathogen transmission control in body art
 - Transmission, control, and symptoms of the diseases caused by bloodborne pathogens
 - Tasks involved in performing body art and how those tasks may lead to exposure to bloodborne pathogens for the client/practitioner
 - The types and uses of Personal Protective Equipment (PPE) such as disposable gloves, including an explanation of the limitations of the equipment
 - The types of tasks, proper task technique, and order of tasks before and after putting on and removing PPE, to avoid contamination
 - The importance of hand hygiene and a demonstration of proper hand hygiene techniques
 - Choice, use, and storage of disinfectants and antiseptics
 - The signage required for biohazardous materials and the importance of properly labeling chemicals and supplies
 - Hepatitis B vaccine, including safety and accessibility
- Discussion of what constitutes a bloodborne pathogen exposure (BBPE) incident, including all of the following:
- Examples of BBPE, how exposure occurred, and actions necessary to prevent/minimize future exposures
 - Risk of infection following a bloodborne pathogen exposure incident
 - Procedures to be followed after an exposure incident, including medical followup
- Opportunities for interactive questions and answers with the instructor
